Systems Administrator Systems Administrator Bridgewater, NJ Work Experience Systems Administrator Systems and Network Consulting - Changsha, CN June 2012 to Present I am a freelance Systems and Network Administrator currently living in China. While in China I've grown my own consulting business and have multiple clients across Shenzhen and Changsha. With the recent addition of an AWS Certified Solutions Architect Associate Certificate, I have been setting clients up with the fastest growing cloud in the world. Systems Engineer Alliant Technologies LLC - Morristown, NJ August 2007 to June 2011 Computer/IT Services  Managed services.  I worked in the Managed Services desk, supporting customer networks and building an internal infrastructure for the company. During my time at the company, I had rebuilt about 70% of the internal infrastructure, in addition to building numerous additions to the infrastructure such as Orion Network Monitoring, Crystal Reports, Arcserv Backup, and many more. I was also responsible for creating a common company image among all laptop models in the company based on Windows XP and Windows 7. My daily tasks included building internal servers, end user IT support, customer phone support, and implementing and manageing backup systems. In addition to all of those tasks, I was responsible for the Tier 1 Team of Managed Services and directed the technicians as necessary Education High school or equivalent Bridgewater Raritan High School - Bridgewater, NJ September 2003 to June 2007 Cisco Networking Academy Skills Active Directory (10+ years), Apache (4 years), Arcserve (Less than 1 year), Cisco (2 years), Networking (6 years), Python (2 years), AWS (1 year), System Administrator, Vmware, Linux, System Admin, Linux Administrator Certifications/Licenses AWS Certified Solutions Architect Associate May 2019 to May 2022 Additional Information SKILLS AND TECHNOLOGIES  Backup procedures with FTP and Rsync, Magnetic tape backup, Disaster recovery, Load balancing, Cisco device networking, Ruby-on-Rails, Apache, Nginx, pptpd, xl2tpd, OpenVPN, IPsec, Active Directory, Windows Server 2003, Windows Server 2007, Windows Server 2012, Windows Server 2016, , Windows Server 2019, Exchange 2003, Exchange 2007, Arcserve 12, Vmware 3.5, Vsphere 4.0, Vsphere 5, Vsphere 5.1, KVM, Xen, OpenVZ, AWS.
