Scrum Master Scrum Master Scrum Master - Connections Education LLC Silver Spring, MD I have 5 years of hands-on experience of Agile Methodology and have worked on Agile frameworks such as Scrum, Kanban and SAFe as a Certified Scrum Master. Prior to becoming a Scrum Master, I worked as a database admin. My 7+ overall years of experience in an IT environment, dealing with multiple software life cycles from concept, design, development, testing and delivery have given me seasoned experience as a Scrum Master. I am a goal-oriented and results-driven individual with outstanding professional capabilities, and I am authorized to work in the USA for any employer.

Work Experience Scrum Master Connections Education LLC - Columbia, MD April 2017 to Present Oversaw the frameworks used in the app creation.   Suggested Ionic framework because of its efficiency and fast to market environment.   Held daily stand up meetings, backlog grooming and retrospective meetings to track the project progress.   Improved team velocity by incorporating capacity planning into sprint planning sessions.   Removed team impediments daily to allow the team to deliver the sprint goals and deliverables   Created business requirement documents and acted as the liaison between the business and software development team during high-level review sessions to drive and execute action plans, meet deadlines and industry standards.   Liaison between developers and project stakeholders; fostering quality communication between engineering disciplines.   Coordinated all Scrum Ceremonies including Sprint Planning, Daily Standups, Sprint retrospectives, Sprint Demos, Story Grooming and Release Planning.   Worked on business survey modernization.   Worked with contracting team to make sure contracting team performed per the estimated velocity to deliver product on time.   Managed all Scrum boards and documented Sprint backlog items and tasks using JIRA.   Tracked and communicated team velocity and other development metrics and to all affected teams and management.   Removed all obstacles that may interfere with the ability of teams to deliver assigned goals Scrum Master Xerox Corporation - Rochester, NY May 2014 to April 2017   Spearheaded Agile/ Scrum implementation plan to move Xerox from Waterfall to Scrum to further the organization's streamlined approach to software development   Trained the entire Xerox Department of Human Resources (DHR) apps group, and parts of the State of MD in Scrum to better understand agile practices and principles   Contributed

to the authorship of PMO artifacts such as the Xerox Project Charter that redefined the organization's role within the Agile Framework going forward   Coordinated Scrum ceremonies: Sprint Planning, Daily Scrum, Sprint Review (Demo), Retrospectives, Backlog Refinement to ensure continuous inspection and adaption of software development lifecycle   Identified impediments and dysfunctions to the teams and the Agile/ Scrum process within organization to limit transitional setbacks and maximize team output   Negotiated feature and deliverable scope and schedule through excellent client (Product Owner) management to ensure a quality finished product   Engaged clients, stakeholders and end users to incorporate usability and interface needs in the design to make certain delivered product reflects exact specifications   Organized and scheduled training of internal and remote users in Agile/ Scrum methodology. Oracle Database Administrator New York Times - Manhattan, NY March 2011 to February 2014   Implemented two types of standby databases supported by Data Guard, logical standby and physical standby databases in 11gR2 on two node RAC   Have hands on experience in Hot/Cold Backups, Recovery and Cloning of databases using RMAN with VERITAS Net Backup and Commvault.   Implemented Active Data guard, creating both Logical and Physical Standby databases in 10g, 11gRAC & 12C environment for production databases.   Configured and managed Data Guard extensively for Production databases of sizes ranging from 50GB to 5TB.   Experience in Installing OEM 12c Cloud Control and upgrading the 11g management agents to 12c agents.   Cloning/duplication of database with RMAN and user-managed (hot/cold) backups.   Migration of databases to 12C from Oracle 10g and 11g.   Implemented and maintained Oracle 11g Data Guard/standby databases for fail-over purposes.   Also worked on Network data encryption to improve security and also implemented SSL wallet to secure connections.   Developed RMAN backup strategies for cloning the test databases with the production environment and worked on RMAN active-active duplication.   Experience with Logical backups EXPDP/IMPDP extensively used for Re-hosting the application using Golden Gate and worked with conventional EXP/IMP for migrating data from 9i to 10G.   Scheduled RMAN backups, purge jobs, Maintenance Jobs using DBMS_JOBS, DBMS_SCHEDULER, Crontab and $UNIVERSE.   Designed and implemented different backup strategies like Cold, Hot, RMAN with

Flash Recovery Area and Logical Backups EXPDP/IMPDP.   Tools/Utilities Used: Oracle RMAN, Toad, OEM, DBMS STATS, Data pump, SQL TRACE, TKPROF, Education Bachelor's in Math and Computer Science University of Buea - Buea October 2004 to September 2007 Skills Jira, Database, Oracle, Forecasting, Capacity planning, Agile Scrum, Certified Scrum Master
