Software Developer Software Developer Software Developer - INTRA Corporation Canton, MI Work Experience Software Developer INTRA Corporation - Westland, MI March 2016 to Present Hired to maintain, upgrade, and develop on our internal software suite. Learned our software suite from the ground up and was able to develop "applications" using it. Created standalone software using VBA, VB.NET, or VB Script to help ease and promote a more efficient work flow for other departments in the company. Upgraded our software suite from VB6 to VB.NET Some experience with integrating hardware and software Worked on customer projects that required an agile workflow. Frequent interactions and experience with customers and clients Our goal would change constantly due to customer requests causing me to adapt and provide solutions quickly and efficiently. Had to organize our code and report bugs/SCR's using Visual SourceSafe and Mantis Bug Tracker. Took on these SCR's as part of our maintaining and upgrading of software. Assisted other programmers, service techs, and bench hands with programming issues related to our software. On rare occasions assisting in issues related to our software would require me and a small team to travel to the field where the issue was taking place on plant floor. Deli Clerk Meijer - Canton, MI February 2013 to March 2016 Education Bachelor of Science in Our Design Seminar University of Michigan - Dearborn, MI September 2012 to December 2016 High School Diploma Dearborn High School - Dearborn, MI September 2008 to June 2012 Skills Visual studio, Android studio, C#, C++, Lisp, Software development, Vb.net, Vba, Vbscript, Vb6, Assembly language, Android, Unix, Java, Matlab, Sql, Assembly, Excel, Microsoft office, Powerpoint
