Software Developer/ Front end Developer Software Developer/ Front end Developer Front end Developer New York, NY   Around 4 years of IT experience as a Front- End/Web/UI Developer with active involvement in designing and developing the websites.   Extensively used HTML, CSS, HTML5, CSS3, Bootstrap, JavaScript, AJAX, JQuery, AngularJS.   Used Bootstrap for responsive design and.   Proficient in developing using AngularJS Forms, Events, Validations, Modules, Factory Services, DOM, Expressions, Directives, Controllers, filters.   Expertise in client scripting language and server scripting languages like JavaScript, jQuery, JSON, Bootstrap, Node.js, AngularJS, Backbone.js.   Extensively used the JavaScript frameworks jQuery.   Worked on responsive design using media queries, bootstrap and Angular UI bootstrap, etc.   Developed web applications using AJAX, Object Oriented (OO) JavaScript, JSON and XML.   The Angular JavaScript framework for building web applications is highly efficient to use with the other latest frameworks.   Hands-on experience using JQuery plugins and JavaScript Frameworks like Angular JS in web application.   Experience in created web related modifications and changes using Photoshop.   Experience in designing web pages with menus and paginations using JavaScript and JQuery plugins.   Good understanding of advanced JavaScript libraries and frameworks, such as AngularJS.   Extensive experience with CSS3 and leveraging best practices, modifications of existing CSS files to enhance the user experience.   Used HTML, CSS and JavaScript to render the dynamic web pages (presentation layer) for the application.   Experience in cloud stack such as Amazon AWS.   Performed website optimization and faster page loading using CSS sprites.   Used JIRA for bug tracking.   Experience in using various tools and IDE's for designing and development like Eclipse, NetBeans, Adobe Photoshop, Notepad, Sublime.   Excellent understanding of relational databases involved in application development using MySQL.   Developed the UI with AngularJS as filters, root scope, custom directives, single page applications and templates. Responsible for checking cross browser compatibility and have good experience on different browsers such as Safari, Google Chrome, Mozilla, Internet Explorer, etc.   Skilled at writing SQL, Designed Stored procedures, Functions & Triggers.   Experienced in Design, Development of web-based Applications using Apache Tomcat.   Experience in deploying applications on Windows

environments. Hands on experience with Integrated Development Environments (IDE's) and tools like Eclipse, Strong verbal and written skills. Good problem solving and communication skills. Able to work in a diverse environment, shares responsibility for the team's success or failure, and self-motivated to contribute towards team/company goals. Authorized to work in the US for any employer Work Experience Software Developer/ Front end Developer Government of Gujarat - Gujarat, IN September 2011 to February 2015 Project: Stock Management System. Responsibilities: Involved in various phases of Software Development Life Cycle (SDLC) of the application like Requirement gathering, Design, Analysis and Code development. Worked on Angular JS which combines web applications with Model View Controller capability to make development and testing of code efficient. Developed UI using HTML5, CSS3, Bootstrap, AngularJS for interactive cross browser functionality and complex user interface. Produced content pages with CSS3 layout and style markup presentations and Also used JavaScript methods and properties. Used AngularJS for page functionality, pop up screens and drop-down menus on the webpage Designed and implemented the user interface using HTML5, XHTML, XML, CSS3, JAVASCRIPT, ANGULAR JS and NODE.JS. Developed CSS3 style sheets to give gradient effects. Developed page layouts, navigation and icons. Applied industry best practices and standards when project requirements were lagging. Design custom buttons to have some config options so that some functionality can be added. Integrated process into build system which auto-generates REST API documentation from source code improving API documentation quality and availability while reducing maintenance costs. Experience and proficiency in developing application using JavaScript frameworks. Create Grid Panel to hold different component. Used the responsive utilities of the Bootstrap frameworks to facilitate the design displaying properly on different devices. Worked on NPM to manage the dependencies through command line. Used CSS Sprites to decrease the number of HTTP requests and increase the load time of web pages. Has worked in AngularJS for client-side scripting and synchronizing applications. Add image icon to different buttons to make those buttons more visible. Developed a Utility function to increase the reusability of the code in different places. Object is extended to override some built in class to

improve some UI components. Object is created to remove the history from the previous preview grid. Implemented an auto mode where the JavaScript automatically cycles through and Also selects each tab periodically until a tab is explicitly selected. Worked on various cross browser (Chrome, Safari, Firefox and android native browsers) compatibility issues. Compile a system design procedure proposal that meets every requirement and follows agile methodology. Implemented application deployment on Apache Tomcat web Server. Used SVN for Source Control and Version Management. Designed interactive pages with W3Cstandards. Analyzed the requirements and designed the flow of task using flow charts and dependently designed flow between pages of the UI. Created event driven Web Forms using C# .Net and implemented form validation using Validation controls using both Custom validation and JavaScript was written for Client-side validations and also used the new validation. Worked with ASP.NET Web Forms, Web Services, and State Management, caching features, configuring optimizations and securing the web application. Developed the Code-behind files in C#.NET and VB.NET. Been an active team player, helped in fixing bugs and also carried out troubleshooting. Converted the mock-ups in to hand-written HTML, CSS and JavaScript code. Produced semantically appropriate, standards compliant markup, and produced Rich User Interfaces. Coordinate with business and solicit usability requirements Ability to test and debug using developer tools and the console required Involved in developing a user centric market driven site redesign. Used JavaScript and JQuery for validating the input given to the user interface. Created web content and tested all the websites with multiple browsers, operating systems, and screen resolutions. Performance tuning by caching the appropriate data objects. Developed and maintaining the layouts using CSS for all intranet applications compliant with W3C Environment: HTML5, CSS3, Bootstrap 3, AngularJS, NodeJS, AJAX, JSON, Bootstrap, Web Services, Agile Methodology, JIRA, GitHub, Bower, JavaScript, jQuery, SQL Server, Windows NT, UNIT TESTING, Windows 7 professional. Education Master's in Computer Science Northwestern polytechnic University August 2016 Bachelor's in Computer Science Engineering Gujrat University - Gujarat, IN August 2011 Skills .NET (3 years), AJAX (3 years), APACHE (3 years), CSS (3 years), ANGULARJS (3 years) Additional Information Technical

Skills: HTML/ HTML5, CSS/ CSS3   JavaScript, jQuery, JSON.   LESS, SASS   AngularJS, Node.JS   NPM, Bower   AJAX   JQUERY   Visual Studio, Eclipse, NetBeans   Apache Tomcat Windows, Linux, Ubuntu, Mac OS X, UNIX, LINUX   T-SQL, PL/SQL   My SQL, SQL Server, Oracle   PHOTOSHOP, FLASH   Waterfall, Agile, Scrum
