Java Developer Java Developer Austin, TX Work Experience Java Developer Tata consultancy service August 2015 to October 2017 Java Developer   Hands on experience in Data Migration using Java, also with the elemental usage of Spring Batches and MySQL. Have successfully migrated data for two clients: Lansforsakringer Bank(Sweden) & Oman Housing Bank(Oman). Worked as a backend Java developer for a web-based application (Wealth management) for Vanguard Bank. Also developed a few JSPs and designed front end screens using HTML and CSS.

   Participated in active discussion with the architect team throughout the process, helped in suggesting changes to the design and went through several high-level design review cycles to improve the product.   Drove the validation team in successfully testing the protocol successfully. Participated in test document planning reviews, came up with several test cases including negative testing, performance testing, corner cases, etc.   Helped in assigning the bugs (in JIRA) at the right priority and delegating the work to other test engineers in helping with debugging of the issues and closing in a timely manner.   Helped in driving the product successfully to the customers and continuously addressing the customer issues as and when they are assigned. Education Bachelor of Engineering in Computer Science Visvesvaraya Technological University 2011 to 2015 Skills Eclipse, Java, Hibernate, Spring, Jboss, Jsp, Struts, C++, Git, Javascript, Ms project, Svn, Visio, Xml, Database, Jdbc, Mysql, Css, Tomcat, Web logic, J2Ee, Java J2Ee, Core Java, MVC
