Pricing Intern Pricing Intern Dallas, TX Currently pursuing Masters in Information Technology and Management from University of Texas at Dallas. I am employed as a teaching assistant where my job responsibilities include teaching JAVA, SQL and Excel to undergraduate and graduate students.In addition, I am serving as President for 3 biggest student organisations of UTD covering technical and social service fields   During summer internship at Essilor as a Pricing Analyst Intern, my major responsibilities were to work on Relative Pricing Index project which gives a relative score to each customer/client based on their historical sales and considering different rebates.Alongside, I worked on different price-lists for the products and understood the concept of pricing of a system which includes understanding data from all the systems of an organisation.   Before coming to UTD, I started my career at Accenture with development of pricing interfaces in java and informatica for a multinational pharmaceutical client which handles millions of transactions on daily basis. To pursue my interest in web development i have done freelancing and have created few e commerce websites.   Craving for creating a worldwide useful product/system with help of my technical and managerial skills was the driving factor for initiating a startup named GoEazy Cooks which benefits working class people to have healthy hygienic and nutritional food prepared by a trained professional and this system allows you to break your monthly bonds and headache of handling blue collar people at a cost of Rs2per minute.Even after having a good breakthrough during first 8 months of sales , due to lack of financial resources we had to call off its operations   Later joined a startup name YourDost working on a noble idea of helping people with mental stress and depression through online platform as a Full stack Software Developer to understand the intricacies of a 1yr old startup and to understand how we can help society through a different manner. Authorized to work in the US for any employer Work Experience Pricing Intern Essilor of America, Inc. - Dallas, TX May 2018 to July 2018   Managed SQL database tables and utilized SQL queries to optimize query performances in production   Analysed the data trends with the integration SQL and SAS environment   Successfully resolved complex Tableau dashboard and Business Objects reporting issues   Customize and create SQL views for ad-hoc reporting and update SQL-SAS integration junction database Full Stack Web Developer YourDost Healthcare - Bengaluru,
