UI Developer UI Developer UI Developer - LATCH Philadelphia, PA   Have 6+ Years of development experience in all phases of software development life cycle including requirement analysis, Debugging, Applications design, Development, Integration, Maintenance, Installation, Implementation, Testing of various client/server and web applications.   A motivated proactive professional coupled with strong analytical and adaptive skills in implementing various business applications and products using JAVA/J2EE technologies.   Extensive experience in various JAVA technologies including Core JAVA/J2EE (EJB, Servlets, JSP, JDBC)and JAVA web framework along with web services (SOAP, RESTFUL) and Database related technologies.   Experience in designing and developing Service Oriented Architecture using SOAP.   Knowledge in Javaenterprise Technologies such as EJB, JMS, Custom Java Tag library, JDBC.   Experienced UI developer with the experience of developing web applications using all the latest and greatest web technologies like HTML5, CSS/CSS3, JAVASCRIPT, ANGULAR JS, JQUERY, REQUIRE JS, NODE.JS, GRUNT, BOOTSTRAP, LESS, BOWER, JASMINE, JSON, RESTful Services.   Proficient in developing web applications using HTML5, CSS3.   Proficient in JavaScript, jQuery & Angular JS.   Developed single page applications using Angular JS.   Implemented customized user interface for the user using Node.js.   Experience in applying the latest software development approaches including MVC.   Expertise in building device independent UI designs using both media queries and frameworks like Twitter Bootstrap.   Well versed using JavaScript and jQuery for manipulating the mark-up and data operations using jQuery and AJAX.   Sound understanding and good expertise with Object Oriented Programming concepts, Object Oriented JavaScript and implementation.   Good understanding in implementing web application using Angular JS framework.   Strong experience on Angular routing concepts, components, filters, MVC architecture, expressions, directives.   Implemented MVC framework using Angular JS that manages to split our application into various components.   Expert in writing custom directives, custom services, and also two-way data binding.   Experience in XML and XSLT.   Experience with IDE's like Eclipse, Webstorm, NetBeans and Intellij.   Expertise in using debugging tools like Firebug and built-in IDE debuggers for troubleshooting existing code.   Designed web pages using wire framing tools,

storyboards, user flows.   Conducted user research and evaluated user's feedback.   Worked closely with system analyst to understand the technical requirements of the projects.   Worked closely with Photoshop designers to implement mock ups and the layouts of the application. Design and development of Web pages using HTML, CSS including Ajax controls and XML. Experience on working with CSS Backgrounds, CSS Layouts, CSS Pre-processors (SASS, LESS), CSS Animations.   Have experience with relational data bases (RDBMS).   Involved in designing and developing the GUI for the user interface with various controls.   Good understanding of developing application from scratch and also migration of projects.   Good experience in building cross browser compatibility applications using HTML5 and CSS3.   Experienced in all phases of SDLC like Requirement Analysis, Implementation and Maintenance. Extensive experience with Agile (SCRUM).   Experience in Jasmine, Karma, Mocha & Chai frameworks for testing JavaScript code.

  Designed the table less web applications using CSS (2.1/3) and with the help of tags as per W3C standards.   Excellent understanding of GITHUB.   Experience with service oriented architecture and multi-tier applications.   Expert knowledge on PostgreSQL/PostGIS.   Excellent knowledge on databases like MYSQL, ORACLE 9i/10g/11g, Mongo dB, SQL SERVER 2005.   Great knowledge on big data.   Great knowledge and understanding server-side scripting languages like PHP. Have experience with Scalable Vector Graphics(SVG).   Excellent knowledge on Python language.

  Worked in an environment which uses cloud services like Amazon Web Services (AWS). Analyzed the business requirements and also the user needs.   Experience with NOSQL data bases like MONGODB, which stores the JSON data.   Involved in the Software Life Cycle phases like AGILE and estimating the timelines for projects.   Very good experience in Document Object Model (DOM) and DOM Functions.   Highly motivated, reliable analytical problem solver and trouble-shooter with strong attention to detail.   Demonstrated ability to complete projects in deadline oriented environments.   Capable of quickly learning and delivering solutions as an individual and as part of a team.   Possess good team-management and leadership qualities. Work Experience UI Developer LATCH - New York, NY October 2015 to Present Responsibilities: Working as a senior JAVA/frontend developer for developing the components which are used by

several teams.   Core technology stack used in projects are: HTML/HTML5, CSS/CSS3, LESS, JAVASCRIPT, ANGULAR, JQUERY, BOOTSTRAP, NODE.JS, BACKBONE.JS, REACT.JS, GRUNT, GULP, BOWER, JASMINE.   Involved in discussions with the Business Analysts to identify the technical requirements.   Heavy interaction with UX/UI teams in various geo locations.   Agile Story research/grooming/tasking/interacting with other teams/developing.   Implemented application using Open Web Application Security Project (OWASP) guidelines; Working on complete SDLC including creating design documentation, development (with browser compatibility), unit testing (in multiple browsers) of application and deployment on Web Logic server (Java Portal Environment). Used Java Platform for defining object relational metadata.   Developed GraphicalUserInterfaces(GUI) using struts, tiles and JavaScript.   Used JSP, JavaScript and JDBC to create web Servlets.   Extensive use of JAXB to convert the XML schemas into objects to use in the application.   Creating GUI using JSP, JavaScript and JQuery and developed the front end screen using AJAX and externalJS.   Developed Page layouts, Navigations and presented designs and concepts to the clients and the management to review.   Handled Payments and transactions, Credit Card/Bank Account Validations on the Client side.   Developed ecommerce shopping cart and checkout functionality that requires complex rules and logic and integration with backend systems.   Worked on CSS Preprocessors (SASS, LESS)   Development the whole application module using front- end frame works such as JavaScript, jQuery, AngularJS, React.JS.   Created customfilters based on the business requirements.   Used Angular JS controllers, views, and services for new website features.   Created custom directives in AngularJS for re-usable components.   Responsible for creating event handlers and document manipulation using the AngularJS library, which is built on the top of JQuery.   Used Angular JS to create maintainable and testable single page applications and also implemented two-way data binding.   Used various filters for sorting, filtering and formatting the data across the application.   Designed & implemented web pages that are compatible in mobile with cross-browser compatibility across several browsers. Involved in writing application level code to interact with APIs, Web Services using AJAX, JSON and XML.   Analyzed and optimized pages and page design for maximumperformance.   Responsible

for the design of web applications right from the conceptualization stage to its implementation and maintenance.   Responsible for checking cross browser compatibility and hence worked on different browsers like safari, Internetexplorer, Firefox and Googlechrome.   Responsible for making responsive web pages including mobiles devices using bootstrap and media queries.   Designed the table less web applications using CSS, Less CSS and with the help of tags as per W3C standards.   Performed unit testing after writing the code.   Worked with RESTful web services for communicating between client and remote server.   Worked with teams where requirements are constantly being implemented, tested and improved.   Worked closely with SQA team in fixing the reported bugs/defects and checking cross platform compatibility.   Environment: HTML/HTML5, CSS/CSS3, Less, Sass, JavaScript, Angular, Angular UI, jQuery, bootstrap, AJAX, JSON, AngularJS, AngularJS 2.0, D3.js, requirejs, node.js, Backbone.js, grunt, gulp, bower, MAVEN, Jenkins, J2EE, JSON, PhoneGap, SVN, Mongo DB, Agile, Rally, Java, MySQL, pl/sql, & oracle Front End Developer COVENTRY HEALTH CARE - Downers Grove, IL February 2015 to September 2015 Responsibilities: Worked as a senior java/ front- end developer using technology stack: Java/JEE, HTML5, CSS3, LESS, JAVASCRIPT, ANGULAR, JQUERY, BOOTSTRAP, REQUIREJS, NODE.JS, BACKBONE.JS, GRUNT & BOWER.   Worked extensively in Agile (scrum) based environment for all biweekly sprint deliverables.   Responsible for Design and development of Web pages using HTML, CSS, JAVASCRIPT, Angular JS JQUERY, AJAX, JSON.   Used AngularJS for creating custom services and filters, and also created two-way data binding by using this framework.   Worked with MVCarchitecture in the web application.   Created top button and bottom buttons by using AngularJS.   Used AngularJS to develop the page level components and customized (Angular directives, services & factories) the out of box directives for additional functionalities.   Used the lightweight container of the Spring Frame Work to provide architectural flexibility for inversion of controller(IOC)   Used hibernate ORM to automate the mapping between SQL databases and objects in Java.   Developed user friendly web based GUI using JSP, CSS, HTML, and DHTML.   Co-ordinated with BA group for better understanding of functional requirements analyzed and designed the business requirements to documented and implemented.

Performance optimization using front- end best practices like JS/CSS magnification aggregation, and modular resource load on demand. Expert in designing web applications and web contents utilizing various Search Engine Optimization techniques(SEO). Converted wire frames to web pages with behavioral design development (BDD). Validated input values to make sure that they will be accepted before they are submitted to the server. Responsible for developing, editing, publishing and managing content on the external Web pages and internal layouts. Real time integration with JSP usingStruts/Tiles/Spring web flows/frameworks. Defined text alignment, size, borders, and many other typographic characteristics. Used JavaScript to make dropdown menus on web pages and displayed part of a web page upon user request. Worked extensively with the File management and image libraries. Fixed bugs and provided support services for the application. Tested/De-bugged web browser using Firebug. Managed and implemented all code changes via SVN. Deploying builds across development, staging and production instances and maintaining code integrity. Extensively used jQuery in conjunction with angular, angular lite to create components. Used angular to develop the page level components and customized (Angular directives, services & factories) the out of box directives for additional functionalities. Created LESS files and used grunt to preprocess and generate the CSS files. Developed CSS based page layouts that are cross-browser compatible and standards-compliant. Responsible for making responsive web pages using twitterbootstrap and mediaqueries. Used jQuery for basic animation and end user screen customization purposes. Created several distribution packages which are shipped for the reusability. Used Mongo DB along with Node.js, as a database to store JSON. Used PhoneGap partially to debug the issues in the hybrid applications. Worked in packaging and shipping the components for the deliverables. Worked on several grunt tasks for automating the tasks. Worked on Bower to resolve dependencies. Expert knowledge of java and middle tier services, especially with the REST end points. Excellent knowledge of databases like Mongo DB, oracle, MySQL. Environment: HTML/HTML5, CSS/CSS3, Less, JavaScript, Angular, Angular UI, jQuery, bootstrap, AJAX, JSON, AngularJS, requirejs, node.js, grunt, bower, MAVEN, Jenkins, J2EE, JSON, PhoneGap, SVN, Mongo DB, Agile, Rally, Java, MySQL, pl/sql, and oracle. UI

Developer Cybage Software pvt ltd 2013 to September 2014 Responsibilities: Designed web application user interface, interaction scenarios and navigation based on analysts, interpretations of requirement and use cases.   This is a configuration widget written in CSS3, Java Script, JQuery framework, Angular JS in UI Layer with tag library, application deployed and tested on Linux. Designed and Developed JavaScript framework, which is wrapper on top of JQUERY framework and AJAX, based UI Configuration widgets.   This system was written in Ajax, OO JavaScript, JSP, JQuery, HTML and CSS.   Used JavaScript and CSS for UI Design Mockup. Written code in JQuery/JavaScript /CSS/AJAX for the navigation oriented application.   Created Dynamic Integration of JQuery Tab, JQuery, and other JQUERY component integration with Ajax   Has worked on Angular JS which combines web applications with Model View Controller capability to make development and testing of code efficient.   Implemented JQuery Filter search a JavaScript tool for adding a little search widget next to any page listing. This will hide all the list items that don't match the word that are being searched for.   Extensively used JQuery plug-in like Isotope and Masonry plug-in for multi column layout, Search plug-in, calendar plug-in, Ajax-queue plug-in, and Auto populating multiple select-boxes.   Has worked on Jasmine that is especially used for testing java scripts.   Developed UI and implemented for some plug-in using JavaScript, HTML, CSS and XML.   Writing and implementing CSS 3 throughout the site, both as in-line and imported files. Writing and implementing JavaScript throughout the site, both as in-line and imported files.   Used GitHub as the distribution version control system.   Designed rich user experience prototype for managing users and roles.   Involved in Testing and fixing bugs and documented the application step-by-step process.   Writing JavaScript for Node.JS applications that is useful for interacting with server and network applications.   Has worked on JQuery mobile which is based on HTML 5 for designing user interfaces for web applications.   Has worked on JavaScript OOP, Selenium, Cucumber JS for synchronization of data.   Environment: HTML4/HTML5, CSS/CSS3, JavaScript, AJAX, jQuery, GitHub, perforce, XML, SQL, Python, Windows Platforms & IDE- Eclipse. Front End Developer SBI Life insurance, IndiaJUN 2011 to December 2012 Responsibilities: Developed front end UI applications for the business and software systems which consists of IEEE standards.

Used the functionalities to write code in HTML5/HTML, CSS3/CSS, Angular js, JavaScript, JQUERY, Ajax, JSON, and Bootstrap with MySQL database as the backend. Developed server side REST style web services and called them from angular controllers. Developed JQuery code using an XML Http Request Adapter to send a AJAX request to the server-sidecode and also implemented a call back function to handle the results. Implemented JavaScript source code and embedded nested handling logic using JQuery event handlersand call back functions. Web application development for backend system using Angular with cutting edge HTML5 and CSS3techniques. Developed the JQuery callback functions for implementing asynchronous communication using AJAX. For new website features wrote Angular controllers, views and services. Coding, styling, testing of reusable JavaScript, CSS3, HTML5 widgets/ libraries for complete UI controls. Designed user friendly navigation for displaying various sections of data using JQuery. Created Dynamic Web Pages using Web Controls and developed forms using HTML5. Styling pages using CSS3.0 and developed JavaScript for user interfaces. Frequently met with the project manager to review project goals and to create proposals for futuredevelopments, researching their fields for UI design. Environment: HTML, CSS/CSS3, JavaScript, JQUERY, AJAX, Firebug, chrome dev tools, SQL SERVER 2000, MS Office and online tools. Front end Developer Zen Softech pvt ltd October 2009 to May 2011 Responsibilities: To analyze the requirements and develop enhancements that will mostly benefit users. Used HTML, CSS, JavaScript to develop websites. Modified the existing website by adding suitable naming conventions and coding standards. Worked with user interfaces and applied usability principle to portals. Primary role was to improve GUI, solve the navigational issues and provide support to the senior web developers. To control the usability, aesthetics, speed and communication of the websites. Used Wireframes to draw the user requirements. Developed clickable prototypes in HTML, DHTML, Photoshop, CSS and JavaScript. Tested web sites and fixed any existing bugs using Firebug. Provide maintenance to several websites. Responsible for code optimization and test the website across different browsers. Environment: HTML, JavaScript, CSS, Adobe Photoshop, DHTML, MS Office, Firefox, Windows XP. Education Bachelors in Computer Sciences&

Engineering JNTU University Additional Information SOFTWARE SKILLS: Programming Languages: C,C++, JAVA/J2EE, PHP, Python,JavaScript, Restful Web Technologies: HTML5/4, CSS3, LESS, SASS, JavaScript, Angular, AngularJS 2.0 JQuery, Bootstrap, AJAX, grunt, bower, XML, XHTML and JSON. Operating Systems: Unix, Linux, Windows and Mac. JavaScript Libraries JQuery, Backbone.JS, AngularJS, Node.js Debugging Tools Firebug, Chrome Developer Tools, IE Developer Tools. IDE Eclipse, Dreamweaver, IntelliJ, NetBeans and Sublime Text Defect Tracking Tools: JIRA, Test Director, Quality Center and Rally
