Senior Front- End Developer Senior Front-End Developer Seeking Sr FED/Full Stack Opportunity Homewood, IL I am a skilled front- end professional with expertise implementing responsive, grid-based UI solutions. With a proven track record building an extensive variety of public-facing solutions, I have lots to contribute to the right environment., My experience coding HTML5, CSS3 and vanilla Javascript and utilizing newer features that ES6 provides has given me well-rounded Front End development experience. I understand the fundamentals of Javascript, and have built on that knowledge by learning and leveraging available Javascript libraries, frameworks (Bootstrap, jQuery). This allows me to produce quick-turnaround, stable and robust feature branches in an Agile environment. Learning and implementing new technologies is one of my strengths. I m very comfortable setting up a new project environment, working in GitHub, using Bash command line. My back- end experience includes around three years hands-on experience with Node.js, and working with numerous packages (hapi, express, ejs, mongo, body-parser) used to integrate server requests, APIs, database CRUD processing (SQL and NOSQL), RESTFUL server routes used in single page application (SPA) view rendering. I m looking forward to some exposure to React, Redux and Angular. Authorized to work in the US for any employer Work Experience Senior Front-End Developer QsrSoft, LLC - Oak Brook, IL June 2015 to Present Produced Design Requirements documents to define workflow based on MVC concepts for several features eventually incorporated into the application. Workload includes coding of HTML5 semantic markup for the SPA, and integration of Bootstrap and CSS3/LESS to present and style web components - including detailed media query/break-point styling - to maintain expected responsive treatment for mobile, tablet, desktop and widescreen viewports. Comfortable coding and troubleshooting vanilla Javascript, along side JS frameworks such as Bootstrap, Polymer, Node, Node packages, jQuery, Highcharts to deliver real-time, data-driven content for this Cloud-based application. Expertise using JIRA for issue-tracking and GitHub, Git bash, for coding, code commits, code testing and using Jenkins for code deployments to the various environments. Comfortable using mySQL, Heidi, for creating db tables, modifying, troubleshooting SQL queries. Limited exposure to setting up server routing APIs, requests, callback functions and data handlers. Front End Developer Career Education Corporation

- Schaumburg, IL August 2014 to May 2015 role in a Sitecore .NET framework. Produced hand-coded content from layered PSD comps. Created user stories for assigned workload (tasks). Responsible for sprint task scheduling, daily stand-ups, code bug fixes. Managed, implemented vendor content into Sitecore environment. Completed website redesign and implemented Adobe Test and Target to monitor page performance and related marketing test campaigns. Managed workload of two FED developers and monitored progress via daily stand-ups.   Tools used: HTML5, CSS3, jQuery, Sitecore, Adobe Test and Target 'mboxes', Photoshop, Subversion Beyond Compare, Foundation/Bootstrap.
