Sr.AEM Developer Sr.AEM Developer Sr.AEM Developer ? Experienced professional in IT industry with strong experience in Web content management (WCM) & J2EE development technologies with solid experience of Object Oriented Programming (OOP) as well as Test-Driven Development (TDD) in all phases of Software Development Life Cycle (SDLC). ? Overall 8.1 years of IT experience. ? Overall 4.2 years of hands-on AEM experience in development of content management solutions using Adobe AEM Content Management System. ? Experience in AEM 6.4,AEM 6.3, AEM 6.2, AEM 6.0, AEM 5.6.1. ? Experience in developing Static and Dynamic Editable Templates, Classic and Touch UI Components, creating and launching Workflows and customizing out of the box Widgets. ? Experience in developing different applications using CRXDE, Eclipse IDE and Rational Application Developer (RAD). ? Experience in Workflow development and integrating AEM with other applications. ? Strong experience with setting up AEM using Maven and standard Eclipse tools. ? Knowledge of using MVC and version control tools like SVN and GitHub. ? Experience in using Management (DTM). ? Worked with MSM in AEM for creating Blueprints, live copies, configuration of rollouts. ? Creating custom OAK indexes to make search faster. ? Strong knowledge on Packaging, deploying AEM code to multiple environments, quick changes using package manager, hotfixes, etc. ? Experienced in using CRXDE and Eclipse IDEs to develop CMS applications. ? Experience in Integration of the System modules, Writing Test Cases, Bug Fixing and Enhancements. ? Extensive programming in Web Technologies likes JSP, JavaScript, XML, AJAX, jQuery, Adobe AEM APIs, Apache Sling, OSGi bundles. ? Good web page design skills using HTML (HTML5), CSS3, Ajax, jQuery, JSP and Java Script and making them cross browser compatible. ? Good knowledge of web services and has technical understanding of SOAP protocol, REST full architecture& WSDL. ? Good understanding of J2EE Security framework. Having experience in configuration of SSL on Web Logic server. ? Expertise in developing and implementing enterprise solutions for distributed software products and applications using Java technologies. ? Expertise in writing SQL queries with RDBMS skills in MySQL, SQL Server and Oracle, etc. ? Have excellent experience in application servers Apache, Tomcat and JBoss ? Experience with Agile process methodology. ? In depth knowledge of RUP's Iterative Software

Development Life Cycle (SDLC) process and Agile/Scrum Software Development ? Experience in using Maven for build automation ? Experience in extensively on SOA and proficient with Java/UI development using Top-Down and Bottom-Up approaches. ? Experience in end-user testing or acceptance testing known as User Acceptance Testing (UAT). ? Experience with connecting and working with third party repositories and experience in using GIT and SVN for source code control. ? Strong knowledge on Adobe Analytics, Google Tag Manager and Adobe Dynamic Tag Manager. ? Experience in client interaction for business requirements analysis, presentations for business and technical requirement document and functional design document. ? Experience in working and helping colleagues with team challenges. ? Good analytical and logical skills with strong communication skills. Work Experience Sr.AEM Developer BBVA Compass - Birmingham, AL December 2018 to March 2019 Responsibilities: ? Created touch UI components and rendered HTML using Sightly/HTL Language. ? Worked with6.4 SP2 version. ? Worked on structured content fragment models. ? Used new OSGi R6 annotations while creating OSGi services. ? Strong experience with setting up AEM using Maven and standard Eclipse tools. ? Knowledge of using MVC and worked on version control tools like SVN and GitHub. ? Worked on Client Libraries. ? Created test classes using JMockit framework. Environment: AEM 6.4 SP2, HTML5, CSS3, Java (JDK 1.8), Eclipse, Maven, Log4J, Apache Felix, Apache Sling, JSP, JIRA, Web Services, SDLC, OSGi, Servlets, Sightly HTML, JavaScript, Bootstrap, Brackets. Sr.AEM Developer American Express - Phoenix, AZ June 2017 to November 2018 Responsibilities: ? Created touch UI components and rendered HTML using Sightly/HTL Language. ? Migrated from AEM 6.3 to 6.4 version. ? Worked on experience fragments and content fragments. ? Used new OSGi R6 annotations while creating Servlets, schedulers, listeners, workflows. ? Worked on Sling Pipes utility to clean up some existing properties in content. ? Worked on AEM Client Libraries specific to components and template level. ? Worked on Multi Site Manager (MSM) to develop live copy from blueprint, such that the structure and content can then be used on the Live Copy. ? Implemented Image renditions by changing DAM Update Asset workflow model for continuous and consistent experience of content across all devices. ? Integrated JIRA system with Workflow functionalities. ?

Writing activation and deactivation workflow models using various components such as process, participant, and dynamic participant steps. ? Developed the application for responsiveness to different screen resolutions using Bootstrap and CSS media queries. ? Implemented Utility Tools to make content cleanup easier. ? Collaborate with Architects on the design and architecture for our team's deliverables. ? Created Web-services both Restful based. ? Documented each and every user story. Review of Code and prepared test cases using Jmockit framework. ? Worked on page optimization better performance of previously existing web pages. ? Create Users and Groups for workflow management. ? Document each and every user story. Review of Code and prepared test cases. ? Develop custom components, customized forms for Internet and Intranet sites of the company. ? Coded JavaScript for page functionality and Pop up Screens and used HTML to make dropdown menus on web pages and display part of a web page upon user request. ? Used jQuery core library functions for the logical implementation part at client side for all the application. ? Main code changes were done in JSP, JQuery, and AJAX and JavaScript environment. Environment: AEM 6.3, AEM 6.4, HTML5, CSS3, Java (JDK 1.8), Eclipse, Maven, Log4J, Apache Felix, Apache Sling, JSP, JIRA, Web Services, SDLC, OSGi, Servlets, Sightly HTML, JavaScript, Bootstrap, Brackets. AEM Developer Hyatt Hotels - Chicago, IL January 2016 to May 2017 Responsibilities: ? Involved in gathering requirements from Business users and analyzing the requirements. ? Created reusable Touch UI components using HTL AEM 6.2. ? Created custom templates for generating pages using Adobe experience manager. ? Worked on Digital Asset Management (DAM), to manage and store all the media. ? Worked on Multi Site Manager (MSM) from live copy for multi-language for global site using i18n internationalization and language copy. ? Setup and configured Authoring and Publishing environments, replication agents, AEM dispatcher to cache the landing pages html and serve as the static pages from Apache. ? Integrating AEM with Adobe target and Analytics. ? Create and maintain customer-facing Adobe AEM content management systems. ? Used Log4J for logging and tracing the messages. ? Involved in integrating with java script frameworks like Bootstrap, Angular Js and npm. ? Development of modules and OSGI bundles. ? Developed custom components, customized forms for Internet and Intranet sites of the

company. ? Held responsible for designing and implementing cloud-based solutions, including private, community and public cloud deployment models. ? Server monitoring and implementing automated/custom maintenance tasks. ? Integrated AEM using client libraries containing Angular JS for reading and Posting JSON data. ? Provided estimates, designs, and specifications for AEM templates, components, and workflows. ? Integrated web pages using HTML, Angular JS, CSS, Java Script and JQuery. ? Worked on Forms customization by developing the custom form fields, writing the custom constraints for form fields and specifying the global validation resource type at the form level.   Environment: AEM 6.2, CRXDE Lite, Slightly, DAM, JCR, MSM, CRX, Workflows, Scene 7, OSGI, Apache Jackrabbit, Forms, HTML 5, CSS 3, JavaScript, Java, jQuery, Ajax, JSON, XML, Eclipse, Maven, Sublime Text, GIT, JIRA, Bit Bucket, Brackets, Rest, Agile. AEM Developer Silicon Labs January 2015 to December 2015 Responsibilities: ? Installed and configured version 5.6.1 (2014). ? Part of migration project from 5.6.1 to 6.0 (2015). ? Installed CRXDE Integrated development environment and Configuration of the project with Subversion version control. ? Involved in creating customized templates, components customizing AEM DAM (Digital Asset Management). ? Maintained the Content Management System (CMS) and provided support for the application. ? Worked on style sheets to maintain the structure and improvise the appearance of Webpages. ? Involve with content management strategies, architecture and multichannel content delivery. ? Wrote test cases for testing of AEM components and templates in both authoring and publishing environments. ? Developed sling servlets to perform various actions. ? Involved in daily meetings and worked in Agile Environment. ? Involved in complete AEM related design and framework development using templates, components, AEM bundle, JCR/Sling API. ? Worked on Multisite Manager (MSM) to get same structure and content on all the versions of the website. ? Maintenance and packaging of content, delivery and installation across all environments. ? Performed AEM customization on foundation components, core CMS and workflows to extend functionalities, improve performance as per the requirements. ? Developed digital consumer experiences based on a foundation of the Adobe AEM product suite, including AEM, CRX, andDAM. ? Used JIRA for project management and bug tracking. ? Developed unit test cases for modules

developed. ? Provided estimates, designs and specifications for AEM development modules. ? Used Apache Maven for build automation. ? Developed reusable components in CQ. ? Developed UI using HTML, CSS and JavaScript.   ? Implemented REST, Apache Sling, AEM for Custom Coding. ? Used log4j for logging the messages. ? Involved with content management strategies, architecture and multichannel content delivery.   Environment: AEM 5.6.1, Java (jdk1.6), J2EE, JSP, Servlets, Java Script, HTML, CSS, Ajax, jQuery, Apache Maven, JSP, JavaScript, CSS, HTML, Oracle, Maven, Web Services (SOAP, REST), Eclipse, Log4j. Java/J2EE Developer Colliers International - Minnetonka, MN January 2012 to December 2014 Responsibilities: ? Involved in the application development using Java platform. Model View Control (MVC) structure implementation. ? Responsible for providing the client side JavaScript validations and usage of HTML, JavaScript, XML, JSP, CSS as per the requirements to enhance the Portal UI.   ? Used Spring Core for Dependency Injection. ? Mapping of ORM objects to tables using the Hibernate as the persistence framework. ? Involved in different service classes, used across the framework. ? Implementation of Web Services using Axis for the integration of different systems ? Developed applications using J2EE technologies like Spring Boot, Spring MVC on the business layer and the persistent layer using Hibernate as ORM tool. ? Testing of Web Services using the Postman. ? Used HTML, CSS, Spring MVC, JSP, and JQuery, JavaScript, Angular.js in the development and the designing the UI. ? Gradient effects through the development of the CSS style sheets. Developed navigation, icons and layouts. ? Code review and configuration build management for the application using Maven. ? Implementation of business logic, validation Frame Work using Spring Web flow and Spring MVC. ? Implemented Web tier of the application through the usage of Spring MVC framework.   ? Implementation of clean separation of layers through the usage of different design patterns like Factory pattern, Singleton and DAO pattern. ? Serialization in the flattening of the objects. ? Used core java concepts like Collections while developing server-side services. ? Data storage using DB2 and used PL/SQL for queries. ? Worked with IBM Web Sphere Application Server Developer Tools for Eclipse by using lightweight set of tools to assemble, develop and deploy Java EE, Web 2.0, and mobile applications. ? Involved with GUI using JSP, Java Script and HTML. ? Involved in using

continuous integration tool (CI/CD) Jenkins. Created builds using Maven and pulled the project code from GitHub repositories. ? Experience with Garbage collection and multithreading. ? Experience with Concurrency, Exception Handling, File handling.   Environment: Java, J2EE, Java Script, JSP, HTML, CSS, XML, SOAP, Hibernate, MySql DB, Spring Boot, PL/SQL, Log4j, JQuery, Angular JS, Eclipse, IBM Web Sphere Application server Java Developer Cadila Pharmaceuticals - IN August 2010 to December 2011 Responsibilities: ? Designed the application using J2EE patterns and developed Java Beans for business logic. ? Developed the presentation layer using Struts Framework and Responsible for coding all the JSP, Servlets used for the Used Module. ? Developed the JSP, Servlets and various Beans using Websphere 5.x server. ? Wrote Java utility classes common for all of the applications. ? Designed and implemented highly intuitive, user friendly GUI from scratch using Drag and Drop with Java/ Swing and CORBA. Extensively used multithreading concepts. ? Deployed the jar files in the Web Container on the IBM Websphere Server 5.x. ? Hands-on experience in installing, configuring and deploying application on Websphere Portal Server. ? Designed and developed the screens in HTML with client side validations in JavaScript. ? Developed the server side scripts using JMS, JSP and Java Beans. ? Adding and modifying Hibernate configuration code and Java/SQL statements depending upon the specific database access requirements. ? Involved in Database design and development. Involved in SQL scripting. Involved in the system integration and testing. ? Design database Tables, View, Index's and create triggers for optimized data access. ? Developed Web Services using Apache AXIS tool. ? Designing of the system as per the change in requirement using Struts MVC architecture, JSP, DHTML.   Environment: Java 1.2.3, Servlets 2.2, Enterprise Java Beans 1.1, SQL Server, JSP, HTML 4.0, JavaScript, UML, Weblogic 5.1, ASP .net, IIS, MTS, COM Component, Windows NT. Education Bachelor's in IT Government Engineering College - Gandhinagar, Gujarat 2011 Skills Content management, Html, Javascript, Jenkins, Json, Scripting, Xml, Eclipse, J2ee, Java, Jboss, jquery, Ajax, Css, Iis, Iis 6, Tomcat, Aix, Apache, Linux Additional Information Technical Skills: Content Management AEM 5.6.1, 6.0,6.2,6.3, 6.4.   Web Technologies XML,CSS/CSS3, JSON, Angular JS, HTML/HTML5,Linux Shell Script, jQuery.   Languages

JAVA/J2EE JavaScript, SQL Programming HTML 5, CSS3, JavaScript, Ajax, UNIX Shell Scripting.

Application Servers JBoss, Tomcat, Apache web-server Databases & Tools Oracle 9i, 10g, SQL

Server 2000, 2005 & 2008; IIS 6.0/7.0 Tools RAD, Eclipse, IntelliJ, Rational Rose, NetBeans, Toad,

SQL developer Continuous Integration Software Jenkins, Bamboo Environment UNIX, IBM AIX

4.3, Sun Solaris 2.7/2.6, MS-DOS 6.22, Windows 95/98/NT/2000/XP.
