SR. Database Administrator SR. Database Administrator SR. Database Administrator - CBRE Plano, TX ? 11+ years of experience in administrating and Architect as MS SQL Server 2016/2014/2012/2008R2/2008/2005/2000 LEAD Database Administrator (DBA) in Windows environment. ? Leadership and managerial skills with cost-effective orientation and ability to manage resources efficiently and motivate teams to maximize levels of productivity. ? Solid experience in architecting and managing large scale, enterprise-level relational database management systems. ? Experience in implementing Always On Availability Groups in SQL Server 2014 & 2016. ? Extensive experience in implementing high availability and Disaster recovery concepts like Always On, Clustering, Mirroring and Replication (Snap Shot and Transactional). ? Expert in Data Integrity, Performance Tuning and Query Optimization. ? Experience in Database design (Logical and Physical), Performance Analysis and Production Support for very large (VLDB) and Complex Databases. ? Experience in Microsoft Azure Cloud & AWS for creation and configuration of VMs. ? Extensively used the native tools like index tuning wizard, database tuning advisor, SQL Server Profiler, Extended Events, Performance Monitor, Activity Monitor, and Event viewer for performance analysis. ? Strong experience in mentoring team members, documentation and 24/7 on call production support. Authorized to work in the US for any employer Work Experience SR. Database Administrator CBRE - Dallas, TX June 2012 to Present Responsibilities: Leading a Team of 3 DBAs, 24x7, 365, Production SQL DBA team that supported and maintained multiple high availability client databases on a MS SQL 2016/2014/2012/2008/2005/2000 both clustered and stand-alone platforms on Windows Server 2016/2012/2003 servers in Production/QA/Dev environments. ? Manage database budget, licenses and vendor management relationship. ? Respond to database issues and inform management. Follow through and establish permanent fixes. ? Develop and manage both long and short-term goals for staff. ? Create, track and update project schedule, communicate project status to the team members and to management. ? Built, managed and maintained, clients facing SQL Server OLTP database production environments for critical applications supporting 999 SLA's model with High Availability, Backup & Recovery. ? Worked to configure, monitor, troubleshoot and support 3 nodes HA

environments working with SQL Server AlwaysOn High Availability in between two data Centers. ? Installed and configured SQL Server Failover cluster for active-passive on multiple nodes. ? Migrated close to 50 Databases (10 Applications) from on-premise to Amazon EC2. ? Worked on migration of SQL 2005/2008/2008R2 to SQL2014\2016. ? Total overhaul of SQL database security to remove individual access to all production systems and instead manage them with Active Directory. ? Worked on Transparent Data Encryption. ? Install, configure and use third party backup and monitoring tools such as CommVault. ? Performed day to day DBA operations, managed Logins and security, worked on performance & tunings as well as capacity planning activities. Environment: AWS Cloud(EC2), TDE, CommVault, SQL Server 2016-2000 Enterprise Edition, TFS, Spotlight Sr.MS SQL Server DBA ISN - Dallas, TX October 2011 to June 2012 Responsibilities: ? Installed and configured MS SQL Server 2005, 2008R2 and 2012 on Windows Server and applied service packs/Hot fixes. ? Perform database migration from SQL Server 2005/2008R2 to SQL 2012. ? Responsible for multi-Tera byte data set ISN system. ? Responsible for providing 24x7 on-call support to keep the systems available. ? Responsible for creating and troubleshooting stored procedures, tables, views, functions, triggers and indexes. ? Regularly checking database integrity for consistency and validate the disk space proactively. ? Created database maintenance plan job to Rebuild the Indexes and update statistics on regular intervals for better performance. ? Configure various Replication, Log shipping and Mirroring and maintain them using native monitoring tools. ? Verify and analyze SQL Server error logs on the servers by using SQL log and windows event viewer. ? Involved in improving database performance using SQL profiler, Trace Flags, Execution Plan and Engine Tuning Advisor, Extended Event mechanism and DMV. ? Working with installation and configuration SQL Server Integration Service. ? Working on creating complex SSIS packages for data transportation. Environment: MSSQL Server 2005/2008R2/2012, Windows 2003/2012, SSSIS, Database Tuning Advisor, Profiler, Migration, Replication, Database mirroring, T-SQL. Database Administrator AT&T - Fort Worth, TX March 2009 to September 2011 Responsibilities: ? Experience of handling 5+ TB Database. ? Assist with verification of data integrity, database performance (deadlock, locking, blocking, etc.) and validate

the data migration completion. ? Administrating and Monitoring Database Mirroring and Replication (Transactional) on SQL Server 2008R2 ? Checking the SQL error logs for any errors that may have occurred over Migration night. ? Work on day-day tasks like backup failure tickets, daily disk free space reports and application related supported work. ? Checking Database Health by using DBCC Commands and DMVS. ? Maintaining DTS packages. Migration of DTS packages into SSIS packages. ? Pulling files from several sources using VB scripting language in DTS/SSIS. ? Pulling data for ConnectTech reports from IBM DB2 9.1, Oracle 10g. ? Testing the code on the UAT server and putting back into production. ? Schedule and conduct project Update/Status meetings.

Environment: SQL Server 2005/2008R2/, DTS, SSIS, SSAS, Windows 2003/2008. Jr.MS SQL Server Developer/DBA Microsoft - Redmond, WA February 2008 to October 2008 Responsibilities:

? Installed, configured, designed, created, managed security and maintained customized database on SQL server 2000/2005/2008. ? Responsible for design, implement, and communicate database solutions that meet the client requirements. ? Implemented a SQL purging process for Old claim data as per business requirement. ? Troubleshooting and resolving database integrity issues, performance issues, blocking and deadlocking issues, Connectivity issues and Security issues etc. ? Responsible for ensuring that production SLAs are met, upgrades are delivered without disruption of business in case of any failures. ? Monitoring the data files, log file space issues, blockings, Tempdb space issues and disk space issues. ? Applying data fixes into production as necessary, and triaging data-related tickets raised in production. ? Involved in designing, developing, debugging and testing of reports in SQL Server reporting services (SSRS). ? Providing monthly metrics regarding database usage and Contributed to Technical Documentation. ? Provided 24/7 support by actively monitoring the job history, alerts. Environment: SQL Server 2000/2005/2008, Windows 2003/2008 Server, SSRS, T-SQL, Profiler, SQL Server tuning advisor, Putty Education Master's Skills Ms sql server, Sql server, Postgresql, Sql, Mongodb, Ssrs, Team foundation server, T-sql, Etl, Visual studio, Application software, Ms office, Analyzer, Windows 2003 Additional Information TECHNICAL SKILLS: Languages T-SQL Operating Systems Windows 2003/2008/2012/2016 Databases MS SQL Server 2016/2014/2012/2008R2,2008, 2005, 2000 and
