Front End (UI) Web developer Front End (UI) Web developer Sr Front End (UI) Web developer Chicago, IL   Around 6 years of experience in Design, Development and Implementation of Web and Client/Server and Enterprise Application development.   Excellent working knowledge and thorough exposure on compatibility issues with different versions of browsers like IE, Mozilla FF, and Chrome.

    Experience with responsive web development technologies HTML5, CSS3, PHP, JavaScript, jQuery, AngularJS, TypeScript, Angular 4/5/6 with MongoDB and Firebase, Bootstrap, NodeJS, SASS, JSON and XML.   Experience in working with Angular 4/5/6 modules, services, templates, directives, services and dependency injection to create a SPA.   AJAX driven web service calls using JavaScript and jQuery framework.   Experience in Developing Applications Using CSS 3 Media Queries, SASS, LESS and Responsive Web Design making the Web Pages Fluid across Multiple Devices. (Grid, Fluid layouts and Break Point Approaches)   Good Understanding of Document Object Model (DOM) and DOM Functions.   Expertise in Client Side designing and validations using HTML5, CSS and Java Script.   Designed and developed HTML Wrappers using HTML5, JavaScript and CSS3.   Skilled in working with software tools like Dreamweaver and Microsoft Visual Studio.   Sound Understanding and good Experience with Object Oriented JavaScript and Implementation.   Good Experience working with High Traffic Websites. Knowledge of complete SDLC of the project involving Design, Development, Testing and Implementation of the Project.   Extensively worked on agile methodology.   Proficient in database development: MySQL, PostgreSQL   Experience in development tools like Net Beans IDE, MS Visual Studio 2015, Sublime Editor and Adobe Dreamweaver.   Knowledge on building and maintaining approximately 100 LAMP-based web applications, WordPress and custom PHP sites, and AngularJS mobile apps built with Cordova   Strong communication skills, time management and Team skills with an intention to work hard to meet project deadlines in a fast-paced environment. Work Experience Front End (UI) Web developer TW metals - Chicago, IL August 2018 to Present   Worked on some of the new features of Angular 6 like new if-else syntax, ng-templates, form validators, Router etc.   Created custom elements, HTML imports, shadow DOM to allow fully encapsulated custom elements by using Angular 6.   Implemented databinding and MVC using

Angular 5 for front-end development of a current web application. Created Typescript reusable components and services to consume REST API's using Component-based architecture provided by Angular 4. Developed the User Interface using HTML 5, CSS, JavaScript, JQuery and AJAX. Working with Angular.js routers, forms, modules, DOM, events, expressions, controllers, filters and Http request. Heavily Involved in UI Responsive Designs of the project, used HTML, jQuery, CSS/CSS3, JavaScript and DOJO, Bootstrap, Node.Js. Designed XML files for maintaining contents like video, images and audio and display them in Flash Application Used AJAX and JSON to make asynchronous calls to the project server to fetch data on fly Following agile methodology with daily standups and regular sprints and used JIRA for tracking tasks and bugs. Involved with bug fixing on functionality, performance and designing issues with JavaScript and JQuery Worked on pop up screens and dropdown menus on web pages using JavaScript, CSS3, jQuery, and AJAX to make UI functional. Writing Unit test cases using Jasmine, Karma for Angular 2 components and implemented Angular CLI with production bundling. Created AngularJS Controller which Isolate scopes perform operations in UI. Wrote modular CSS using SASS with object-oriented approach for reusability of styles throughout the application. Implementing fully responsive mobile first UI elements leveraging Less/Sass for styling Worked with source version control GIT to manage the code repository. Built Single Page Applications (SPA), Responsive Web Design (RWD) UI and HTML Wireframes using HTML5 Grid Structures/Layouts, CSS3 Media Queries, Ajax, Angular JS, and Bootstrap. Used Angular JS to develop MVC app [Models, Views and Controllers] that integrated with the back-end REST-FUL Services using AJAX ($http) to perform GET and POST data to backend servers. Responsible for all client-side UI Validation and implementing Business logic based on user selection using jQuery, jQuery UI and Angular JS Front End (UI) Web developer AstraZeneca - Philadelphia, PA January 2017 to July 2018 Designing and developing the business portal using Angular 4/5 along with HTML5, CSS3, JavaScript and Type Script. Used JQuery to make the HTML, CSS interact with JavaScript functions to add dynamism to the web page. Creating Angular 2 components and custom directives for application functionality and pipes for heavy DOM manipulation and implemented lazy loading and AOT to

improve application quality and performance in low bandwidth connections.   Worked extensively on

Angular 2, Typescript SPA domains   Worked with backend programmers to troubleshoot Java

Script related issues with front-end connectivity   Messaging front and back API interfacing using

Tibco or MQ middleware for Market Data storage to Data Warehousing, backend Sybase, Oracle on

UNIX or Application Servers for Web development of Product for Intranet clients.   Worked

one-on-one with client to develop layout, color scheme for his website and implemented it into a final

interface design with the HTML5/CSS3 & JavaScript using Dreamweaver along with front end part

widget seen on page and app.   Utilized various JQUERY plugins to build Rich Internet Application

(RIA) to make it look more intuitive, additionally using to create plugins auto complete, validation,

drag and drop and more exceptionally used jQuery template for markup.   Used Ajax, JSON with

jQuery for request data and response processing and successfully implemented Auto

Complete/Auto Suggest functionality using Ajax, JQuery, DHTML, Web Service call and JSON.

Used the Node.js and AngularJS MVC Frameworks in the development of the web applications

Involved Finding out the bugs, broken links and missing images etc. and rectifying them.   Designed

the email blasts using Adobe software and then implemented them using HTML and Java script.

Demonstrated implementation and up-gradation of JavaScript Library. Involved in configuring the Git

repository and maintain the version control using Git.   Implemented AJAX functionality to speed up

web application.   Used Firebug to debug JavaScript, to analyze DOM objects of the page and to

change the page layout   Widely used Optimization technique in existing code   Used JSON for

data transfer between front end and back end Environment: HTML5, CSS3, SASS, JavaScript,

Angular 2/4/5, RxJS, Typescript, Agile, Bootstrap, REST API's, Webservices, Jasmine, Karma, JIRA

and Visual Studio, Node.js. Web developer GAA Speed Jet - Mumbai, Maharashtra July 2014 to

June 2016   Interacted with key players and stakeholder to understand their existing applications

and understand scope and deliverables of the project.   Overviewed and reassessed the design of

the existing application and draft a new architecture with team.   Designed CSS based page layouts

that are cross-browser compatible and standards-compliant   Developed HTML prototypes and

ready XHTML documents with CSS style sheets   Created reusable HTML templates and style

sheets based on UI standards and guidelines. Performed functional tasks using specifications and wireframes.   Developed data formatted web applications and deploy the script using client-side scripting using JavaScript   Used Cascading Style Sheets (CSS) to maintain design consistency across all web forms   Designed dynamic client-side JavaScript codes to build web forms & simulate process for web application, page navigation and form validation   Developed web pages with functionalities like login, register, forget password, Filters using Java Script and HTML   Developed code to call the web service/APIs to fetch the data and populate on the UI using JQUERY/AJAX.   Worked on AJAX controls like Update Panel to manage the post back of the web page to server, AJAX Script Manager and Script Manager Proxy controls to register JavaScript and web service files.   Used MySQL to access and update data from the database   Carried out extensive verification and testing to set MySQL database free from SQL injections throughout course of database development and management   Created admin for data manipulation and reports using PHP, MySQL, and HTML   Environment: HTML, CSS, JavaScript, jQuery, Angular JS, Bootstrap, JSON, Perl, Ajax, Photoshop, MVC Web developer Intern ProCAE - Chennai, Tamil Nadu July 2013 to May 2014   Responsible for development of front-end code variations and creation of responsive landing pages using HTML, CSS & JavaScript by translating provided design mockups.   Provided support for cross platform browser implantations.   Elegantly implemented page designs in standards-compliant dynamic XHTML and CSS.   Redesigned and developed organization's website using HTML/CSS/JavaScript   Worked with other members in addressing bugs, maintenance of website   Designed user Interface for the project using HTML, CSS, and Flash Environment: HTML, XHTML, CSS, JavaScript Education Bachelor's Mumbai University Skills CSS (5 years), HTML (5 years), JAVASCRIPT (5 years), USER INTERFACE (5 years), AJAX (4 years) Additional Information TECHNICAL SKILLS Operating Systems Windows 10, 7, XP, Linux, IOS Programming Languages JQuery, Angular JS, SQL Web (UI) Technologies HTML, XHTML, DHTML, XML, HTML5, CSS, CSS3, JavaScript, AJAX, JSON, Angular JS and jQuery XML Technologies SAX and DOM (parsers) Databases Oracle, MySQL, Mongo dB, MSSQL Server Application Servers WebLogic, Apache, Tomcat Browsers IE, Mozilla and Chrome, Safari

Development Tools Eclipse, Dreamweaver, Web Matrix, Web storm, TextPad, Firebug, MS Visual Studio for web. Open Source Tomcat, log4J, JUnit, Ant, Putty, WinSCP, Tortoise, vspehereclient Configuration Control CVS, SVN, GIT Methodology Object Orient Analysis, Design and Development using UML Project Management Tools Jira, Rally, Scrum works, Team track
