Full Stack Software Developer Full Stack Software Developer Full Stack Software Developer - OutlayR Work Experience Full Stack Software Developer OutlayR - Culver City, CA November 2018 to Present OutlayR is a Social Commerce Influencer Exchange application Social Commerce Merchants can search for Social Media Influencers to recruit for their social media-based sales campaigns. OutlayR provides these Social Media Influencers with the tools and support necessary to post to/search for specific campaigns within their specialties.   Rapidly prototyped a variety of full-stack features, including RESTful APIs with C# and ASP.NET Web API 2, server-side views with C# and ASP.NET, MSSQL backend to support a frontend single page application that utilizes ReactJS, Ajax, and JSON.   Developed back end procedures in SQL to retrieve the information needed to complete certain operations.   Optimize web application routing based on user roles & privileges.   Utilized SendGrid to successfully send emails through the site depending on the currently signed-in user and target recipient.   Built API, controllers, and services to meet the quality standards of the team.   Performed code review and refactoring to ensure code quality and establish best practices.   Quickly gained confidence from tech leads to perform tasks efficiently during time constraint situation to provide quality results   Adhered to Scrum methodologies of Agile processes by driving weekly demonstrations and discussions with client, communicating status through Trello boards and daily standups, and using TFS to manage shared codebase and perform continuous integration builds. SpaceX - Hawthorne, CA November 2017 to November 2018 Assisted in over 10 successful launches to support private and government related missions. Expeditiously adapted and became an asset to the team. Also, provided weekend support when necessary to achieve the short-term goals of the company. United States Navy - Point Mugu, CA June 2013 to June 2017 Point Mugu, CA JUN 2013 - JUN 2017 Comprehended and utilized publications, circuit, schematics, and wiring diagrams to isolate faults on aircraft equipment. Quickly becoming a subject matter expert, trained a team of 10 on proper troubleshooting techniques to achieve the mission of the team.
