Java-Liferay Developer Java-Liferay Developer Java-Liferay Developer - Youngsoft Inc Detroit, MI Experience in full life cycle software development with emphasis on Object Oriented, J2EE, UI development and client, server technologies. Exceptional organizational, analytical and communication skills. Featuring expertise in MVC web-frameworks and other programing languages. Passion for Web 2.0 trends, API's and other disruptive technologies. Worked on Liferay 6.2, Liferay 7.2, OSGI architecture. Experience in startups, financial, banking and healthcare/insurance domains. Expertise in working with JAVA/J2EE, HTML, CSS, JavaScript, jQuery, Restful Web services (REST), Servlets, JSP, Spring, Hibernate, jUnit. Hands on experience in using development tools like Eclipse, Intellij, RAD, WebStorm. Well versed with using version control systems - Git, SVN, Mercurial. Interact with product owner in requirements analysis, design reviews, testing and documentation for application being developed in Agile environment. Sponsorship required to work in the US Work Experience Java-Liferay Developer Youngsoft Inc - Wixom, MI December 2017 to Present Youngsoft is a technology and consulting company based in Michigan. Its partnership with Liferay has given them the depth to serve organization's portal initiatives and continue to remain ahead of its competitors. I worked on developing an intelligence and data-visualization application for Delphi's needs. Responsibilities: Develop new features based on OSGI based architecture, Java 8 and latest trends in functional and object oriented programming. Present the data visualization for various process in the factory. Design the existing page using Content Management Interoperability Services, Java Content Repository and WebDAV so that marketing people can edit the content using WYSIWYG editor. Decouple the existing and future applications with a modular, fast and responsive features. Use CICD (continuous integration and continuous deployment) techniques, tools to make sure the changes made make all the way to production along with proper rollback plans. Develop secure, real-time alerts for Splunk and other alerting tools using proper proactive programming techniques. Design the front-end of application using mobile-first, best UI / UX standards using NPM, Node.js, Sass, mobile-first, responsive web-design. Providing root cause analysis for production issues. Used jQuery to perform UI validations and load the DOM. Implemented service modules in a

multi-tiered architecture.   Unit-testing using jUnit and Mockito.   Dependency management using Gradle.   Used the workflow, MessageBus and various other concepts of Liferay to achieve the results.   Developed custom modules using ReactJS. Environment: Liferay IDE, Java8, Tomcat 8.0, jQuery, JavaScript, ReactJS, OSGI, CSS, Git, Oracle DB. Java Full Stack Developer Blue Cross Blue Shield of Mississippi - Flowood, MS May 2017 to November 2017 BCBS of MS is a leading healthcare insurance company. I worked on creating a new software for subrogation claims processing. Responsibilities: Develop using IBM RAD and used iBatis to connect the underlying databases (MySQL, DB2).   Used Struts-Spring implementation to support the existing application.   Developed application on IBM websphere-application-server.   Developed several Restful services in Java to support iOS and Android apps.   Used AS400, DB2, SQL-Server to cater various needs in the project.   Used a variety of design-patterns to structure the project.   Created a peer-peer video connectivity solution using WebRTC.   Developed quick modules using Spring Boot. Environment: IBM RAD, Java, J2EE, Websphere application server (WAS 8.0), AngularJS, Javascript, CSS, DB2, SQL server. Java-Liferay Developer US Bank - Houston, TX February 2017 to May 2017 US Bank (US Bancorp) is a national bank that constitutes the consumer and commercial banking. It is known for its gift cards. I worked on the application FSVportal. It is a centralized portal, where the huge number of websites can be created and configured by horizontal scaling using Liferay. Responsibilities: Developed Portlets based on GenericPortlet, MVCPortlet and LiferayPortlet.   Used spring framework to inject the DAO and Bean objects, auto wiring the components.   Worked extensively on Liferay portal and good knowledge of JSR-286 standards. Participated in migration from Liferay 6.2 to Liferay 7.0.   Worked on development of Hibernate, including mapping files, configuration file and classes to interact with the database.   Worked on jQuery, Liferay Portlets and Spring MVC to fix the defects in a timely manner.   Used JSP, Liferay, JavaScript, jQuery, AJAX, CSS3, and HTML5 as data and presentation layer technology.   Worked on Tomcat Application Server and Maven to deploy the projects developed using Eclipse IDE and integrated with MySQL, DB2 Database to connect DB using iBatis.   Environment: Liferay Portal 6.x/7.x, Tomcat Application Server, Java, J2EE, iBatis, MySQL, DB2, Spring, Spring MVC, HTML5,

CSS3, JSP, JavaScript, jQuery, JSR-286, Jenkins, Hudson. Java UI Developer American Express - Phoenix, AZ October 2016 to January 2017 The American Express Company, also known as AMEX, is an American multinational financial services corporation. I worked on corporate credit cards management application. Modules I worked include Global Identity management, My Data, Global registration. Responsibilities: Responsible for implementing new change requests (RFC's). Involved in daily Scrum meetings, coordinating with the off-shore team and explaining the Sprint cycle to client in grooming sessions. Developed restful web services for accessing the stored procedures as part of MyData project. Expertise in using Spring JDBC and integrating the restful services with Spring. Used REST API with JAX-RS and resteasy to develop web services. Implemented several design patterns like delegate, adapter, factory, worker while involved in development activities. Design of new templates in the existing application using Spring JDBC, IBM DB2 as the database. Add new functionalities in the application by re-designing servlets, JSP's and Xml configuration files. Involved in migrating the application from Infrastructure as a service - IAAS in Jboss EAP 6.2 to Platform as a service - ePaas, Enterprise cloud platform (eCP). Well versed and comfortable working with devops concepts and Jenkins. Involved in installing Splunk forwarders on several servers and designing the dashboards as per the client needs. Power-user level of expertise in using Splunk. Developed the front-end part of the application using AngularJS, Typescript. Involved in designing the UI screens of the application using jQuery. Experience in developing applications in Eclipse and testing them using SoapUI. Extensive use of tools like JIRA, CA Agile central (Rally), Lara, Jenkins. Used Git, SVN as version control. Took part in the documentation and knowledge transfer sessions. Environment: Java/J2EE, Platform as a service, Infrastructure as a service, Eclipse, Intellij IDEA, Maven, JBoss EAP 6.2, AngulaJS, TypeScript, IBM Datastudio, Splunk, SoapUI, Git, Tortoise SVN, Jenkins, XL-Release. Java Developer Adroit IT services Pvt Ltd - Hyderabad, Telangana August 2013 to August 2014 Adroit Software services is an off-shore software development firm offering reliable services that cover customized software development, Web-application development, Agile software development and Web-Design. Responsibilities: Responsible for implementing high-quality text, HTML5/CSS3

and incorporate responsive design techniques in the web content. Responsible in using Spring Framework MVC for controlling request handling and developing controller classes to switch between JSP. Decomposed complex orders into the most basic components. Transformed Service Orders from a generic telecom structure to a organization specific structure. Wired the components in application-context.xml and writing DAO classes to call the DB SPs using spring framework. Emails customer notifications at pre-defined order milestones. Unit testing with Junit. Used GIT as a version control. Took part in documentation. Environment: JAVA/J2EE, HTML, CSS, JavaScript, Web services (REST), Servlets, JSP, Spring, Hibernate. Education Masters in Computer Science in architecture Illinois Institute of Technology - Chicago, IL May 2016 technology GITAM University - Visakhapatnam, Andhra Pradesh Skills Java, Javascript, React, Angular
