Hackathon. After making it through 3 rounds, I pitched our company, Wads, at the Southeast Fintech Venture Conference on November 14th, 2018. Our team secured first place and the top prize of $10,000 - beating over 150 students across 8 different universities from around the state.

To learn more about the project: https://wads.io/   For more information about our win: https://inside.uncc.edu/news-features/2018-11-27/cci-team-creates-cryptocurrency-platform-win-hackathon Additional Information Capstone Project - Java Blockchain (Onit Network)   Project Manager for a team of five other students, in which we designed and developed a blockchain protocol in Java.

  Decentralized Medical Prescription Application (Generation Blockchain Challenge)   1 of 6 finalists out of an original 74 teams that competed to build a decentralized application. I led a team of two other developers, in which we successfully built a medical prescription platform on top of the Ethereum blockchain. The final event was held at AvidXChange in Uptown Charlotte, North Carolina. We gave a 20 minute presentation in which we successfully demoed our working product on stage.
