Database Administrator Database Administrator Database Administrator - IFCJ Chicago, IL EXPERIENCED IN SQL Server Administration and Design   Seasoned SQL Server database administrator with over 5 years of Strong Experience with SQL Server 2000 through 2016 Administration   Production support in a 24/7 environment and project support.   Interacts with clients, application team and project managers to design, implement and support solutions to meet client needs   Install and Upgrade SQL Server 2008, 2012 and 2014 database standalone / cluster instances   Service packs   High Availability Solutions- Database Mirroring, Log Shipping, Always On etc   Performance tuning and optimization   Complex database environments, Production, Development and Test Environments   TECHNICAL EXPERIENCE   Translating business requirements into conceptual, logical and physical data models   Administering, Managing, Developing and configuring SQL Server database design,   Performance tuning and query Optimization   Production level support for onsite and offshore - On Call 24/7 environment   SQL Server Performance Dashboard Reports for Monitoring   Performance Baselining   High Availability Solution- Clustering, AlwaysOn, Database Mirroring and Log Shipping   Disaster Recovery Strategy   Query Store, Import/Export Wizard, SSMS, SQL Profiler, Extended Events, Red-Gate tools etc. Replication Models (Snapshot/Transactional/Merge)   Clustering Setup, Troubleshooting and Management   CMS Reporting-Member enrollment   Virtualization   Good T-SQL Writing skills Temporal Tables   Knowledge of SQL Azure   SSIS packages to facilitate ETL process   Designing and creating the extraction process (logical extraction and physical extraction methods) to facilitate data warehouse   Administering SSAS (SQL server Analysis Services) SSRS (SQL server reporting services)   Designing, developing, testing and troubleshooting ETL packages that implement complex ETL processes. Work Experience Database Administrator IFCJ - Chicago, IL 2018 to Present Job Responsibilities: Responsible for daily database administration and maintenance, ensuring security, integrity and performance of database servers. Also provided support and oversite of data integration with eternal vendors and fulling data segmentation requests. Troubleshooting database configuration, performance and reliability issue. Maintaining database documentation on a monthly basis and migrated backup files from on-prem to Azure blob storage.

Tested disaster recovery and failover plans. Developing, deploying and maintaining extract, transform, and load (ETL) processes. Supported other department to effectively and reliably use data stored with external vendors. Auditing data held by external vendors to ensure integrity and timely synchronization. Researched products, frameworks, trends and tools to improve the efficiency and deploying the use of third-party tools for monitoring and report. SQL Server Database Administrator Accenture - Houston, TX 2014 to July 2018 SQL Server DBA MODAJPRO IT - Houston, TX 2014 to June 2018 Houston Texas (2014- June 2018)   ROLES & DUTIES   Production level support for onsite and offshore Clients   System monitoring   Integrated Temporal Tables   Troubleshooting client connectivity   Lock resolution   SQL Server Performance Dashboard Reports for Monitoring   Performance Baselining   Manage indexes to improve performance   Schedule jobs using SQL Server Agent   Developed routine jobs for data integrity check   Code deployment into Production   Information Risk Management Control   Tables Design, views, Stored procedures, Function etc.   Managing Server and database security and identity   Managing Firewall Rule, Triger, Row version, Temporal Tables, Change Data Capture (CDC) etc   Column Store Index for performance   Contained Databases   Task Automation   Indexes Maintenance   Stabilized Performance   SQL Server Profiler, Extended Events, Query Store and Database Engine Tuning Advisor (DTA) for performance   Implementation of snapshot isolation and DDL triggers   SQL Azure   Stable Replication Topology   Comprehensive Backup plan and disaster recovery strategies   Installed SQL Server 2008 on advanced servers, applied security fixes   SQL Server Upgrade   Installed and configured MS SQL Server 2008 R2, supported all Production and development servers   Maintained database response times in 24X7 Production environments   Developing SQL scripts for maintaining administration tasks   SSIS, high performance data integration solutions, ETL packages   SQL server Reporting services (SSRS) delivering enterprise, Web-enabled reporting to create reports that draws content from a variety of data sources   SQL server analysis services (SSAS) online analytical processing (OLAP) and data mining tool   Capacity Planning and resource allocation   Monitoring standby databases to ensure high availability Education Bachelor's Skills DBA, ETL, Sql Server, Ssis, Sql Dba

Certifications/Licenses MCSA May 2019 to Present I acquired a Microsoft Certified Solutions Associate this year and this certification examination requires 2 exams passed to certify an individual of interest an IT professional and givng him/her the license to execute their task effectively and efficiently.
