Java Developer Java Developer Java Developer - Highmark Health Solutions Pittsburgh, PA 4+ years of experience in implementing Java/J2EE projects, working through Analysis, Design, Development, Testing, Implementation in Client/Server and web-based architecture systems. Proficient with Software development methodologies like Agile (Scrum) Methodologies and Waterfall. Expertise in RESTAPI's development with Spring Boot configuration and maintenance of Micro Services with Eureka discovery platform, Launching and configuration of AWS instances with load balancing. Experience in working with the NoSQL Database like MongoDB and Cassandra to manage extremely large data sets. Proficient in developing Web Services, related technologies &frame works: REST, JAX-WS, JAXB, JAX-RPC, AXIS and Jersey, SOAP UI and generating client's client using Eclipse for Web Services consumption. Implemented the module using Multithreading to make the transactions asynchronous. Extensive experience in SQL, Stored Procedures, Functions and Triggers with different RDBMS such as MySQL, Oracle, MS SQL Server, DB2. Worked on deployment, installation, configuration and issues with Application servers like Apache Tomcat, IBM WebSphere, BEA WebLogic and JBoss. Experience in implementing Design Patterns like Singleton, Factory, MVC, Data Access Object and Business Delegate. Proficient in core Java concepts like Collection Framework, Multi-threading, Generics, Annotations, Serialization, Thread pools, JavaBeans, Externalization. Expertise in developing test cases with Mockito and Junit, determining application functionality. Experience on different IDEs such as Eclipse, Spring Tool Suite, and IntelliJ. Work Experience Java Developer Highmark Health Solutions - Pittsburgh, PA May 2019 to Present Involved in requirement analysis and participated in the design of the application using UML and OO Analysis Design and Development. Implemented MVC web frameworks for the web applications using JSP/Servlet/Tag libraries that were designed using JSP. Used SQL, PL/SQL and Stored Procedures for Oracle back-end database. Involved in configuring the database to Oracle9i Involved in developing a branded portal using the administration tool on web Sphere Application server. Used JDBC to configure files to access the database. Developed and tested Java Server Pages (JSP). Developed reusable AJAX components for web-tier. Developed customized JSP tags for project Developed reusable DHTML components

for enhanced user interaction. Monitored/Improved the performance and behavior of web applications. Implemented business validations for product pricing and product availability for Order Entry. Developed JUnit test cases for unit testing. Configured iBATIS2.0 for data access layer with Spring1.1 framework Involved in peer-to-peer code reviews Involved in usability and accessibility design issues of the system. Designed and developed Web pages using JSP, HTML, JavaScript, and JSF Environment: Java, JSP, Struts 1.1, JMS, WebSphere Application Server, JDBC, XML, XSL/XSLT, Windows NT, Oracle 9i, JUnit, JSF and CVS. Java Developer FedEx Services, TN, Collierville January 2019 to April 2019 Designed UI component with AJAX and JavaScript libraries (J Query), AngularJS Used Agile methodology and attended daily and weekly SCRUM meeting to update working status etc. Developed and tested modules using Agile(Scrum) methodologies Developed server-side application using Spring MVC, Spring AOP, Spring IOC, Spring Security, Spring Batch. Designed and developed various Micro services using spring boot, with microservice architecture using REST framework. Also, used Hibernate for integration with spring framework. Developed the User Interfaces with HTML, CSS, AJAX, JSP, JavaScript and JQUERY for presentation. Implemented Restful web service using Jersey for exchanging information of unstructured data of No SQL database Mongo DB which is connected through Java Mongo DB Driver. Deployed, test, and debug applications on WebSphere and Tomcat application servers and on Windows platforms. Developed unit test cases using JUnit and Log4j for logging. Environment: Java 1.8, Spring 4.1.1, Spring Data JPA 1.5.2, Spring Boot 1.2.3, Spring Data Commons 1.7.2, Oracle12c, Micro Services, Angular.JS, Ajax, Apache Camel, Tomcat 8, UML, Web Services (REST), UNIX/LINUX, Dockers, Jenkins, Slf4j, GIT, XML, XSLT, DOM, GIT. Java Developer Commonwealth of Massachusetts State Health / DXC Technologies, TX July 2017 to January 2019 Actively involved in the development, testing and maintenance phases of Software Development Life Cycle (SDLC). Developed Database access components using Spring DAO integrated with Hibernate for accessing the data. Designed dynamic and browser compatible pages using HTML5, CSS3 and JavaScript and Angular JS. Integrate the dynamic pages with Angular JS to make the pages dynamic. Developed Custom Tags and JSTL to support custom

user interfaces.   Used CSS3 style sheets for presenting data from XML documents and data from databases to render on HTML5 web pages.   Used JavaScript for server side validations.   Used Tiles Framework to create standard, reusable presentation components.   Implemented Design Patterns like MVC, Front Controller, Singleton, Factory etc.   Used Spring Framework for integrating Hibernate for dependency injection.   Used Hibernate ORM tool in data access layer to map the object view of data into database and to provide access and update information in the database.   Used SOAP Web Services for getting credit card information from third party and used SAX and DOM XML parsers for data retrieval.   Extensively used Eclipse for writing code.   Used Maven as a build tool and deployed on WebSphere Application Server.   Developed test cases on JUnit.   Used Log4J for logging and tracing the messages.   Environment: HTML5, CSS3, JavaScript, AJAX, Bootstrap, Foundation, Java8, J2EE, Spring (IOC, AOP, MVC, JPA), Spring Boot, Spring Security, Microservices, Hibernate, WebSphere, Agile TDD, RESTful, JSP, JMS, JTA, MongoDB, Oracle, PL/SQL, Selenium, Maven, Log4j, Junit. Java Developer Amazon Development Center (INDIA) Private Limited July 2013 to July 2015   Part of Agile team developing the application using Agile Methodology.   Involved in requirement analysis, design, coding and implementation.   Involved in designing and developing Buy-Online and Chargeback Automation modules.   Used Struts MVC pattern to maintain the Admin Portal.   Used Spring framework features like IOC, MVC, AOP and Hibernate Template.   Involved in developing business components and managed transactions using Spring declarative method.   Experienced developing and delivering mission-critical data platforms for real-time analysis for production use.   Designed and Developed Web services using SOAP and REST API.   Implemented DAO layer using Spring JDBC Template and Hibernate Template API.   Involved in unit testing and system testing and also assisted QA people for preparing test scripts for the system testing.   Used SQL, PL/SQL in constructing views, indexes, stored procedures relational database models.   Responsible for the successful execution of Project Planning and Deployment cycles.   Provided end to end support for the system and involved in coding and testing.   Environment: Java, J2EE, Spring, Servlet, JDBC, JavaScript, J Query, SOA, Struts, JAX-RS, Eclipse, SOAP, services, Hibernate, XML, Maven, JIRA, Log4j, Sonar, Oracle,

SVN, Encryption, Apache Tomcat, WebSphere Server. Education Master's in Engineering Management in Engineering Management Marshall University May 2017 Electrical Engineering Jawaharlal Nehru Technological University 2013 Skills Java, Hibernate, Java J2Ee, J2Ee, Spring
