Front End Developer Front End Developer Front End Developer - Wells Fargo Fremont, CA

Authorized to work in the US for any employer Work Experience Front End Developer Wells Fargo

October 2018 to Present Working on Chatbot application panel using HTML5, CSS3, JavaScript,

React, Redux with an eye towards simplicity, reliability, performance, scalability, and extensibility. ?

Working on Chatbot application panel using HTML5, CSS3, JavaScript, React, Redux with an eye

towards simplicity, reliability, performance, scalability, and extensibility. ? Made custom node

modules in React and used them across different applications. ? Made sure that the React

application have high performance using the in-depth knowledge of React lifecycle methods. ?

Created asynchronous Redux actions using redux thunk middleware to retrieve data from backend

(APIs). ? Developed and worked with reusable components with customizable styling in React by

following DRY principle. ? Documented request and response JSON objects for proper

implementation of APIs according to application requirements. ? Implemented Ag-grid for the

server-side processing and displaying large amounts of data on frontend. ? Worked with React UI

component libraries like Reactstrap, Formik, React-datetime, and Yup. ? Responsible for

development of highly-responsive user interfaces using media queries, flexbox, and SCSS. ?

Optimized components for maximum performance across web-capable devices and browsers. ?

Followed Agile software development using tools like JIRA and participated in scrum status

meetings every week. ? Used Git as a version control tool using GitHub as a platform. React.js

Developer Integra Technologies February 2018 to September 2018 Designed and developed web

application using React, Redux, JavaScript, HTML5, and CSS3. ? Used Redux-Promise

middleware with Axios library to retrieve data from backend. ? Collaborated with designers to create

paper prototypes and wireframes for the design of the web application. ? Used React Router to

enable navigation from one view to the next to perform application tasks. ? Used Nesting, Variable

and Mixing features of SASS Preprocessor along with following BEM methodology. ? Used media

queries for mobiles tablets and desktop layouts. ? Applied page optimization techniques like lazy

loading, image optimization and HTTP requests reduction using CSS Sprites. ? Prepared and

developed test cases for unit testing using Jest and Enzyme. ? Worked in the Agile/Scrum

development environment with frequently changing requirements and actively participated in scrum. ? Used Git as a version control tool. JavaScript Web Developer Oditi Global Solutions Pvt. Limited July 2013 to August 2015 Responsible for development of web-pages using Vanilla JavaScript, jQuery, CSS3 and HTML. ? Performed maintenance updates and added new features on existing sites. ?
