React Developer React Developer Web Developer Vancouver, WA Authorized to work in the US for any employer Work Experience React Developer 503 Collective - Portland, OR February 2019 to Present I am responsible for development in both React and React Native applications in an agile environment using React JSX and Typescript. Typical duties include, integration of third party React libraries including Formik, React Bootstrap, and Auth0, developing and consuming JSON/RESTful APIs and using tools such as Postman, creating React Class and Functional Components using hooks. Technologies include MacOS, Microsoft Visual Studio, Atlassian Jira, Bitbucket and Git. The development environment is start up based, we are building a complete system, backend, middleware and front- end for a large well established client in the automobile sector. There is a small team of dedicated developers on this project who in a short amount of time have built something that we are all very proud of, and I often joke that we are swiss army knives not developers. Full Stack Web Developer Beaming White - Vancouver, WA May 2017 to January 2019 As a LAMP stack developer, I am responsible for helping to build and maintain websites, integration of third party API's, and development of applications that will be used both internally and for consumers.   Custom content solutions and site builds are implemented using Laravel, Vue JS, JavaScript, J Query, Ajax, PHP, MySQL, Eloquent ORM, Propel ORM, Bootstrap, HTML5, CSS3, and Github.   I work closely with multiple departments to assess their technology needs and implement solutions that meet the demands of an ever-changing business environment.   I have built multiple sites that support retail products, including integrations with Groupon, Shipstation, Authorize.net, and Paypal. For the pre-existing brands I have done site maintenance for WooCommerce, Open-Cart and Custom PHP builds, including the integrations necessary to support local and offshore commerce. I have developed multiple WordPress plugins based on specific internal needs.   My most recent projects include a custom CRM and an Inventory Management Software Application. Front End Web Developer HTML Global - Glenview, IL April 2016 to February 2017 I was responsible for full stack web development and site maintenance for a variety of clients including North Chicago Community School District D187. As a full stack developer it was my responsibility to use design principles for UX / UI and create site mock-ups, then collaborate with

clients and address their feedback in the site implementation.   Custom content solutions and site builds were implemented using JavaScript, PHP, MySQL, HTML5, CSS3, SFTP/SSH Management, WordPress, Bootstrap, AngularJS, Testing using Frameworks and the Chrome Developer Console, and Hosting on multiple platforms including Media Temple, Engine, and Digital Ocean.   I would manage many of my own projects, budgeting hours for design, development and client training considerations, client facing and customer communication.   Management of offshore resources including budgeting, oversight of workflow, meetings, and progress reporting to other internal departments.
