Java/AEM Developer Java/AEM Developer Java/AEM Developer Collierville, TN 4+ years of professional IT experience emphasizing on various phases of the development/ maintenance projects as a AEM and Java Developer. Experience in application development using Java/J2EE technology such as Java, J2EE, JSP, Servlets, EJB, Spring, JDBC, Hibernate, Web Services (SOAP & RESTful). Experience with Web Content Management (WCM) applications using CQ5/AEM 6.x. Knowledge on DAM (Digital Asset Management) features of CQ5, writing & customizing DAM asset workflows. Good experience in Adobe CQ5 suite including OSGi, Apache Sling, Apache Felix, DTM, AJAX, JSPs, bundles etc. Knowledge on employing JCR for developing applications on Adobe CQ5. Experience on development tasks of CQ5 software including building templates, components, Ext-JS custom components, setting up the security, page creation frameworks etc. Installed, administered & deployed Day CQ5/AEM, CRX platforms on to different environments. Application development experience using Core Java, multithreading, Collections, Generics and Swing. Experience with Hibernate 3.0 persistence framework and Dependency Injection using Spring framework. Experience with Design patterns like Singleton, Factory, Session Facade, Business Delegate, Data Access Object, Data Transfer Object. Hands-on experience in developing system and web application using ADO.NET and ASP.NET with C# as programming language. Experience of working with RDBMS like MySQL, SQL Server, Oracle and developing Stored Procedures, Triggers, Views, Functions and SQL Queries. Experience in Web application development using - HTML, CSS, JavaScript, XML, WSDL, UML. Experience in Continuous Integration and Continuous Delivery techniques being used during SDLC. Development experience with IDE's like Eclipse, JDeveloper, Netbeans, InelliJ IDEA and BlueJ. Experience in working on projects using Agile Methodology - Scrum, Sprint Planning. Authorized to work in the US for any employer Work Experience Java/AEM Developer FedEx - Collierville, TN January 2018 to February 2019 Responsibilities: Designed and developed AEM building blocks including templates, components, dialogs, widgets and workflows. Developed CQ custom workflow templates and modules for WCM lifecycle management and adobe target integration. Maintained the Content Management System (CMS) and provide support for AEM application in

authoring environment. Wrote JSPs using custom tag libraries and AEM tag libraries. Creating templates, page components, content components and client libraries using Adobe Experience Manager (AEM). Work on Sling Servlets and OSGi Services to pull data from remote web-app services and also wrote custom business logic to maintain Content Repository Extreme (CRX). Developing HTML, CSS, JQuery and ExtJS for designing and developing custom AEM components. Worked on CQ component development for both classic UI and touch UI using Sightly. Developed JavaScript to implement client side validations and AEM authoring validations. Used Maven build tool to maintain Project dependencies and also use Jenkins as continuous integration tool for timely builds. Documenting Java classes using API-docs and Rest Client. Assessed the impact of the issues created to have a right visibility for the problems/defects. Interacting with business team for clarifications on the requirements of migration. Used Jira for bug tracking and project management. Participating in daily scrum meetings, story discussion, story points and in sprint planning. Environment: AEM 6.2, J2SE, J2EE, DAM, Sling, OSGi, Eclipse, CRXDE Lite, Components, Templates, Sling Servlets, CRX, Sightly, Adobe Social, Adobe Analytics, DTM, JCR, EJB, XML, JavaScript, MS SQL, Oracle, PL/SQL, MS Visio, GIT, Web Services, SOAP, Jenkins, Maven, RESTful, Linux. Java/AEM Developer Sony PlayStation - San Mateo, CA February 2017 to December 2017 Responsibilities: Understanding the client requirements and preparing requirement specification detailed design, coding, testing and documentation. Working on AEM product suite, including CQ/AEM, CRX, and CQ WCM. Development of templates, page components and custom components which are available in out-of-box components. Work on Sling Servlets and OSGI Services to pull data from remote web-app services and also wrote custom business logic to maintain Content Repository Extreme (CRX). Development of static web pages, landing pages, category landing pages using content management system, Adobe CQ5. Provided estimates, designs, and specifications for CQ5 templates, components. Creation of the content structure hierarchy (region, languages nodes, etc.) and modularizing the content according to functional units. Worked on in slightly Setup and configure Authoring and Publishing environments. Working in the DAM for the maintenance of the media files. Create and maintain

customer-facing Adobe CQ5 content management systems.   Participated in requirements gathering sessions, understanding the business requirements, converting them to functional specifications.   Creating all web-related material by coding in Sightly, HTML, JavaScript, CSS, and through the use of applications such as Internet explorer and Firefox.   Developing Servlets, JSP pages, Beans, JavaScript and worked on integration.   Effectively supported the production instance by assisting the user and participated in the client meeting calls and project trainings.

Environment: J2SE, J2EE, AEM 6.2, DAM, Sling, OSGI, Felix, CRXDE Lite, Components, Templates, Sling Servlets, CRX, Sightly, Adobe Social, DTM, JCR, EJB, XML, XSLT, JavaScript, MS SQL, Oracle, PL/SQL, MS Visio, Eclipse, Web Services, SOAP, RESTful, JDBC, Hibernate, Linux, Windows 2003 Server. Java/AEM Developer 1 Alliance Group LLC - Virginia Beach, VA February 2016 to December 2016 Responsibilities: Responsible for analysis, design, development and integration of UI components with backend using AEM and Java/J2EE.   Used Spring MVC framework to implement the MVC design pattern.   Created JAX-Web Services to interact with other applications using SOAP and WSDL file.   Developed web applications in AEM in coordination with software development teams   Assisted in designing, coding and testing of complex software applications.   Developed custom components, templates, and customized forms for Website Customized AEM sidekick for enhanced authoring experience.   Designing and implementing customer engagement strategies to support multi-site, multi-channel, multi-lingual delivery environments   Create OSGi Bundle for deployment through Apache Sling   Customizing workflows for publishing   Create and integrate content-driven applications on top of the AEM/CQ core platform   Using Sightly, HTML, CSS, JQuery and ExtJS for designing and implementing custom CQ components.   Perform CQ5 customization on foundation components, for customer's core CMS and workflows to extend functionalities, improve performance or fix issues on project level. Created HQL queries to perform various database operations.   Involved in bug tracking for the application using the Jira and Bugzilla tools. Environment: Java/J2EE, AEM 6.1, Sightly, HTML5, CSS3, JSON, JQuery 1.7, ExtJS, Apache Sling, Apache Jack Rabbit, CRX, CRXDE Lite, JPA, JDK, Spring MVC, Restful Web services, Apache Tomcat 7.0. Software Engineer 1 Alliance Group LLC -

Gurgaon, Haryana June 2013 to November 2014 Responsibilities: Involved in design, development, and testing phases of SDLC (Software Development Life Cycle). Participated in the team meetings to discuss the status of the project. Used JSP and JSTL for developing UI components. Designed and developed Servlets and JSP's for system controls and dynamic content generation using MVC architecture. Developed GUI using JSP, HTML, CSS and JavaScript. Wrote code for connection statements to establish the connection to database using JDBC. Developed and tested the SQL code for stored procedures, triggers and transactions. Involved in database design using Normalization techniques. Utilized Multithreading and concurrency concepts. Contributed in the development of the business logics using the Servlets. Designed database queries for updating, insertion and retrieval of asset information and rates. Environment: Java, Servlets, JSP, EJB, XML, JavaScript, MySQL, SQL, PL/SQL, MS Visio, Eclipse, JDBC, CSS, Display Tags, Apache Tomcat etc. Education Master of Science in Information Technology Valparaiso University - Valparaiso, IN January 2015 to May 2016
