As more and more audio files are being digitally preserved, the workflows for handling those digital objects need to be examined to ensure efficiency. In some instances, files are being manually manipulated when it would be more efficient to manipulate them programmatically. This article describes a time-saving solution to the problem of how to split master audio files into sub-item tracks using custom software I designed for the purpose. Additional Information INTERESTS: Martial Arts, Electronics, Antiquing, Reading, Hot Tea, and Puzzle Solving.
