Web Developer Web Developer Web Developer - Hobby at Home North Middletown, NJ Looking for a job where I can use my strong experience with LAMP stack. Work Experience Web Developer Hobby at Home 2012 to Present Driven by great passion, patience, and problem solving skills, I have learned object oriented PHP and MySQL. My latest project is a core MVC web app with pretty URLs. I have it in four levels of user authentication: level 0 has no authentication and is useful for simple dynamic websites; level 1 has only one user access that can add comments and change user information; level 2 has an admin that can add and manage new users, and users that can add comments and change their user information; level 3 has a webmaster that can add and manage new admins, then the admins can add and manage new users, then the users that can add comments and change their user information. The access is done using either user id or email address. The passwords are hashed, the remember-me-tokens are hashed and salted, the forms have CSRF and XSS protection, and the login part has brute-force hacking protection. I used this as the core for the full scale online study tool for my chemistry students at https://mrpavel.us PHP Web Developer Self starter - Middletown, NJ 2009 to Present 2009 - Present Linux Power User Installed and customized Linux Debian, Ubuntu, Kali, and Arch on computer workstations, servers, laptops, virtual machines (VirtualBox/Vagrant), and Raspberry Pi.
