iOS Developer iOS Developer iOS Developer (Freelance) - City of Elgin Chicago, IL Mobile Developer with multiple apps in the app store and a strong background in CS fundamentals. Looking to transition back into software development after helping start and grow a digital marketing agency.

Work Experience iOS Developer City of Elgin - Elgin, IL April 2018 to Present   Contracted to build an iOS app for the City of Elgin using Swift and an MVVM architecture.   Integrated with a Salesforce Rest API to allow users to login, submit non-emergency 311 requests, and receive updates on those requests through push notifications.   Integrated with the Twitter Rest API to pull tweet information and present a feed of relevant Elgin-related tweets.   Localized the app in both English and Spanish to serve a multilingual community.   Wrote unit tests to help identify breaking changes early and ensure code quality.   Implemented a cloud-based CI pipeline using fastlane to automate builds, testing, and deployment to test devices and the App Store. Director of Digital Marketing Blackbird Garage - Chicago, IL January 2016 to Present   Developed multi-channel acquisition strategies that allowed clients to quickly scale their ad spend to six and seven-figures profitably using Facebook, Instagram, Pinterest, and Adwords.   Managed relationships with client contacts, reported out on key insights, and led high-level planning conversations to align all stakeholders on social strategy.   Hired and trained a team of media buyers in acquisition strategy and managed them to ensure we hit client goals.   Managed relationships with ad platform and vendor contacts. Software Developer Adage Technologies - Chicago, IL March 2014 to January 2016   Developed ecommerce websites for performing arts clients using the .NET framework, EpiServer CMS, and Tessitura ticket management system.   Performed requirements analysis to identify client needs and translate them into technical specifications.   Managed client relationships through weekly status calls and emails. Associate Software Engineer Accenture - Chicago, IL August 2013 to March 2014   Ran test cases on ecommerce websites to ensure features met development requirements.   Used Selenium framework to write automated test cases that reduced the time needed to test after code deployments by 80%.   Ran smoke tests on ecommerce websites to validate successful builds. iOS Developer Intern Linehop - Chicago, IL August 2012 to August 2013   Built an iOS app for bowling alleys that allowed users to order food from the snack

bar without leaving their lanes.   Created a custom consumer-facing receipt printing solution using Raspberry Pis and Epson printers that allowed bowling alleys to receive their orders. Education Bachelor's in Computer Science DePaul University - Chicago, IL August 2009 to June 2013 Skills Swift, Xcode, JIRA, Project Management
