Technology Analyst Technology Analyst Technology Analyst - Infosys Ltd Oracle Database Administrator (DBA) with 5+ years extensive experience demonstrating success in designing, implementing and supporting next generation database solution. Proficient in Oracle Enterprise Manager Grid Control (OEM12c), implementation of high availability solutions Golden Gate, (RAC) with 9i, 10g, 11g and 12c D/R disaster recovery infrastructure (Physical and Logical Standby) using Data Pump, Data Guard technologies. Work Experience Technology Analyst Infosys Ltd - Indianapolis, IN Present   Installation, Configuration and Troubleshooting Golden Gate 12c Software   Configuration of Golden Gate for Classic and Integrated Capture components   Configuration of Golden Gate High availability using Oracle ACFS on Grid   Experience in performance tuning of Oracle Golden Gate process to achieve zero lag time   Experience in Oracle Golden Gate 11g/12c replication setup across heterogeneous database vendors   Expertise in Oracle Golden Gate installation, configuration, troubleshooting Golden Gate issues.   Establishing standards, policies and procedures for Golden Gate replication administration.   Implementation of High Availability solutions with Oracle RAC, Physical and Logical Standby Databases (Data Guard) and Replication using Golden Gate.   Implementation of Golden Gate for Active-Active Replication between the Datacenter for High Availability.   Implantation of Uni-directional and Bi-directional replication using various versions of Golden Gate   Configured different levels of replication such as DDL replication, DML replication for table level, schema level, database level using Golden Gate.   Implementing and maintaining database security (create and maintain users, roles and assign privileges) Upgrade of Golden Gate from version 11.2 to 12.1.   Performed near zero downtime database upgrade from 11g to 12c using Golden gate with rollback strategy in place Oracle Database Administrator The William Carter Company - Atlanta, GA December 2017 to 2019   Extensive experience in Installation, Migration, Database Upgrade, Backup and Recovery using RMAN utility, DR, RMAN, ASM, 10g RAC administration, data pump, performance tuning of Oracle Database Provide database system management functions on Oracle 10g, 11g, and 12c   Implement Oracle Enterprise Manager Grid Control (OEM12c) for centralized monitoring and administration of the Test, QA and Production databases.   Engineering and administration of Oracle standalone and

RAC clustered (11g, 12c) database environments   Work with the system DBAs to implement changes and performance improvements.   Implement and configure Oracle Golden Gate software on Unix/Linux platform for both Unidirectional and Performs Bidirectional replications   Manage database security by creating, assigning appropriate roles and privileges to users depending on the user activity, auditing, and performing other security related tasks including Transparent Data Encryption.   Perform capacity planning of Oracle server environment and provide recommendations to management to sustain business growth.   Provide development and design assistance to development and other application support teams   Ensure system integrity, efficiency and performance through management of core system resources (CPU/Memory/IO Performance)   Assess and perform systems utilization and headroom reports to assist in troubleshooting and performance tuning   Evaluate and manage existing software and licensing configurations, systems and the design, implementation and management of new/improved systems   Provide 24X7 support for Oracle 10g/11g databases on windows/Linux platforms   PROFESIONAL EXPERIENCE IT System/Oracle Database Administrator Fast Data Ltd - Lagos, NG July 2011 to November 2017   Perform maintenance of the data backup systems.   Deploy bug fixes, patches and security updates to ensure system readiness, performance, resource   Gather data pertaining to client needs, and use the information to identify, predict, interpret, and evaluate system and network requirements   Monitor server performance, network capacity, and security issues.   Assist with audits on existing software to verify authorized use and license certification   Remain up-to-date on products available in the market; support new technologies.   Disaster Recovery Testing; working with multiple departments in testing disaster recovery plans.   Designed, installed, configured and maintained High Availability (RAC, RAC One Node, Data Guard etc.) Database solutions.   Monitored backup operations, and schedules manual backups as needed   Perform installations and configurations of grid infrastructure, databases, clients and much more.   Researched, tested, and made recommendations of data validation tools   Provides recommendations to management on behalf of the team   Developing functional process diagrams for Oracle database services.   Providing support to developers working on SQL, including development of best practices, hands on demos,

and knowledge transfer   Assisting with procurement of hardware, software, and services   Monitor Oracle trends for hardware, system and user load utilization   Responded to and resolved database access and performance issues.   Performed capacity planning of Oracle server environment and provides recommendations to management to sustain business growth   PROFESIONAL EXPERIENCE IT System Administrator Guarantee Trust Bank March 2009 to July 2011   Manage Server and storage area for network support and upgrades   Produces basic infrastructure and application documentation and design.   Administer and maintain the Symitar financial system.   Administer and maintain Windows, AIX, and Linux operating systems.   Administer and maintain SAN (Storage Area Network) systems.   Communicates and coordinates various vendors when additional in-depth technical assistance is needed   Performs software and hardware upgrades in accordance with bank policies and procedures   Performs network troubleshooting to diagnose common network problems.   Supports the Remote Desktop User Environment.   Perform maintenance of the data backup systems   Monitor server performance, network capacity, and security issues   Responsible for compliance with all Federal regulations including Bank Secrecy Act NG   Provides project support for software and hardware projects   Remain up-to-date on products available in the market; support new technologies.   Handle trouble tickets related to server and system performance   Maintain with onsite resources to troubleshoot issues Education Diploma in Statistics in Statistics Yaba College of Technology Skills Database, Microsoft sql server, Sql server, Oracle, Oracle 10g, Pl/sql, Sql, Linux, Red hat, Unix, Unix shell, Rman, Vm, Java, Confident, Written and verbal, Fast learner, Team player, Windows 2003, Loader Additional Information TECHNICAL SKILLS Operating System: Oracle VM, Oracle Linux, Red Hat, Windows 2003/2008 Server Languages: SQL, PL/SQL, UNIX Shell Script, Java Database: Oracle 10g, 11g & Microsoft SQL Server   Tools/ Software: SQL Developer, SQL*Plus, SQL*Loader, Oracle Enterprise Manager (OEM), DBCA, Data Pump, Data Guard, RMAN, Oracle Schedule PERSONAL STRENGHTH Excellent in work ethics, communication and analytical skills Excellent team player Excellent in organizational written and verbal communication skills. Fast learner and confident approach to work Work very well in both team and individual environment.
