Software Developer Software Developer Software Developer Bellingham, WA Authorized to work in the US for any employer Work Experience Software Developer Cox Media Group - Atlanta, GA February 2016 to Present   Worked with UX and product owners to develop components that could be reused between multiple news properties. Technology stack included React, Javascript, npm, SCSS/SASS/CSS, Custom Elements & HTML primarily.    Maintained Amazon Alexa Skills for 50+ radio properties using AWS Lambda.    Participated in the pilot project for the CMS chosen as the successor for the next generation newsroom.    Quickly adapted while the company shifted from a custom CMS (written in Django) to an industry standard one (Methode). Contractor The Caktus Group - Raleigh, NC February 2015 to February 2016    Worked mainly as a back end web developer in Django (Python web framework). Technology stack included Ubuntu, NGINX, Postgres & Jenkins (for deployment & testing). Assisted with front end development using JavaScript, SCSS/CSS & HTML. Software Developer Worthwhile - Greenville, SC May 2010 to February 2015 My career at Worthwhile began as an intern. It was a great way for me to get familiar with the company, and to identify areas where I needed to learn more. The level of learning I received far surpassed what you could learn in a classroom. I love to read, but I ve discovered that I learn even more from experience like I have here at Worthwhile.    As a web developer, I create efficient and reliable web and mobile applications. I work in Django and other development platforms to accomplish client goals through intentional, strategic development. Education Bachelor's in Information Systems Management Bob Jones University - Greenville, SC 2005 to 2010 Skills CSS, Git, Javascript, HTML 5, MYSQL, PHP, Python, Django, React, ES6, AWS, PostgresSQL, Jquery
