Database Administrator Database Administrator Database Administrator Laurel, MD Expert in 8i, 9i, 10g, 11g 12c Database Administration Expert in 10g and 11gR2 and 12c Real Application Cluster (RAC) on ASM Expert in Oracle Database Design Expert in Data Guard Administration Expert in Data Warehousing Expert in Grid Control Administration Expert in Performance and SQL Tuning Expert in RMAN Backup and Recovery Expert in Disaster Recovery Expert in PLSQL Expert in Database Migration, Upgrade and Patch Application Lead and Project Management Oracle DBA Instructor Authorized to work in the US for any employer Work Experience Database Administrator xfinity/ comcast - Arlington, VA November 2016 to Present   Design and implement new state of art RAC database on Oracle 11g and 12c   Install, configured and Managed Oracle 11gR2, and 12c multiple 2 node RAC database.   Manage several 2 nodes RAC database on Linux.   Managed 11gR2 Grid Infrastructure i.e. ASM, CLUSTERWARE   All RAC databases managed are on ASM storage.   Managed RAC database on Production, Test and Development databases.   24/7 database support.   Managed RAC database using CRSCTL, SRVCTL and Grid Control   Application of CPU and PSU patch on RAC database in rolling manner.   Configure and setup Oracle 11gR2 and 12c Data Guard.   Managed Data Guard using Data Guard broker.   Automation of Data Guard log monitoring process between the Primary and Standby.   Creation and management of Oracle table partitions in a data warehouse environment.   Design aProvide technical expertise and knowledge leadership in the design, implementation and maintenance of relational database management systemnd implemented Oracle backup strategy for multiple databases senior and lead oracle database Architect and adm Hanover, PA September 2016 to September 2016   Oracle technical and database lead   Design and implement new state of art RAC database on Oracle 10g and 11g   Managed Oracle 10g 11 node RAC on Linux   Install, Configured and Managed Oracle 11gR2, 9 node RAC database   Manage several 2 nodes RAC database on Linux   Add and removed nodes from 10g and 11g RAC cluster   Managed 11gR2 Grid Infrastructure i.e. ASM, CLUSTERWARE   Upgrade of oracle 10g 11 node cluster to 11gR2   Upgrade of several 2 node RAC from 10g to 11gR2   Migrated 16 Terabytes database from Oracle 10g to 11g.   Managed Terabytes of data in an Oracle Data Warehouse   All RAC databases

managed are on ASM storage.   Managed RAC database on Production, Test and Development database.   Managed RAC database using CRSCTL, SRVCTL and Grid Control   Application of CPU critical patch on RAC database in rolling manner.   Configure and setup Oracle 11gR2 Data Guard.   Managed Data Guard using Data Guard broker.   Troubleshoot and resolved log gap in Data Guard Configuration   Design and implemented Oracle backup strategy for multiple databases   Implemented the use of Oracle Recovery Manager (RMAN) and Oracle Recovery Catalog to backup the databases   Upgrade single instance databases from 10g to 11gR2.   Performed various performance goal oriented database tuning.   Use explain plan, AWR, ADDM various Oracle Advisors to tune the database.   Tuned various materialized views.   Tuned various slow running query   Performed instance tuning, memory tuning query tuning and complete database tuning.   Resolved various complex issues with the database.   Develop and enforce database related policies, standards, naming conventions, operating procedures and best practices. Develop a strategic plan for the database development that supports the organizations   operational requirements.   Developed and managed PLSQL Stored Procedures, Functions, Triggers and Packages used by the database instance.   Documented Database structure, changes, problems, issues for future reference. Database Administrator Aeropostale Inc - New York, NY May 2013 to 2014   Partnered with project management teams on development of scope and timelines.   Oracle technical and database lead   Design and implement new state of art RAC database on Oracle 10g and 11g.   Design and implement new state of art RAC database architecture on Oracle 10g and 11g.   Design and implement Oracle backup strategy for multiple databases   Upgrade Oracle databases from various versions to new versions.   Provide technical expertise and knowledge leadership in the design, implementation and maintenance of relational database management system   Performed various performance goal oriented database tuning.   Develop and enforce database related policies, standards, naming conventions, operating procedures and best practices. Develop a strategic plan for the database development that supports the organizations operational requirements   Documented Database structure, changes, problems, issues for future referenceDesign and implemented OraImplemented the use of Oracle Recovery Manager (RMAN)

and Oracle Recovery Catalog to backup the databasescle backup strategy for multiple databases Performed database restore and recovery of terabytes of data on a RAC database   Use explain plan, AWR, ADDM various Oracle Advisors to tune the database   Tuned various materialized viewsTuned various slow running query   August 2014 toSeptember 2016 Education Associate Skills Coding (Less than 1 year), Data conversion (Less than 1 year), Data extraction (Less than 1 year), Database (4 years), Linux (2 years), Oracle Dba, DBA, Oracle Database, MYSQL, DB2, Sql Server, Sql Dba Additional Information Skills   Database analysis   Database administration Analytical problem solving   Coding data   Data conversion and migration   Microsoft SQL Information systems management   Structured query language (SQL) expert   UNIX/LINUX Analytics and problem resolution   Data extraction   Database servers   Capacity and scalability planning   Proficiency in TCP/IP protocols   Optimizing and performance tuning   GUI and tools Strategic planning and review   Data generation tools   Oral and written communications
