Senior Database Developer Senior Database Developer Senior Database Developer - Arrowhead General Insurance Agency San Diego, CA Experienced Information Technology solution Provider with 10+ years' experience in the IT field focusing on web development, database administration, providing hardware, software and custom application solutions. I have an unquenchable thirst to master and utilize new technology and share my findings with the people around me. I'm a strong advocate of finding new ways to leverage existing solutions, and purchasing new solutions that can extend and advanced current capabilities while providing business friendly returns on investments. I'm very hands---on and like to work directly with users, managers, customers and various stakeholders to gain a greater depth of understanding on what is wanted, needed, or not working so I can help steer the team and solution in the right direction. I strongly advocate collaboration and building communication channels within an organization, so one's rapport can be leveraged to drive a consensus, bring everybody onboard, and increase a projects chance of success.
