SQL Database Administrator SQL Database Administrator SQL Database Administrator - SAMM IT System, Maryland Lanham, MD A self-starter, innovative, constructive, and result oriented professional, seeking opportunity to work as a SQL Server DBA that will offer an opportunity for utilization of technical knowledge and further growth. Authorized to work in the US for any employer

Work Experience SQL Database Administrator SAMM IT System, Maryland May 2016 to Present Responsibilities: Installed, Configured, and Managed SQL Server, 2016, 2012 2008, and 2005 in development, test, and production environment Installed and Configured SQL Server 2008 for testing different features and stability Installed, Configured and Maintained Fail-Over Clustering using SQL Server 2005 Installed and Configured Operating Systems, Windows Server (2000 & 2003) Installed and Configured SQL Server Reporting Services (SSRS) Configured and Maintained Replications (Transactional) Configured Log Shipping as Standby database from Production database Upgraded databases from SQL Server 2000 to 2005 in testing and production environment Planned designed, built and implemented database systems in AWS cloud. Created and maintained database objects (tables, views, index, constraints, etc. for data platform and custom applications. Upgraded databases from SQL Server 2005 to 2008 Upgraded MS Access 2000/97 databases into MS SQL Server 2000, 2005, and 2008 Migrated Oracle 10g databases to SQL Server 2008 Migrated MySQL 4.1.0 databases to SQL Server 2005 and 2008 SQL Database Administrator Darcars Automotive Group - Silver Spring, MD June 2014 to May 2016 Responsibilities: Installed, Configured, and Managed SQL Server 2000 &2005 in development, test, and production environment Installed, Configured and Maintained Fail-Over Clustering using SQL Server 2005 Installed and Configured Operating Systems, Windows Server (2000 & 2003) Installed and Configured SQL Server Reporting Services (SSRS) Configured and Maintained Replications (Transactional) Configured Log Shipping as Standby database from Production database Upgraded databases from SQL Server 7.0/2000 to 2005 in testing and production environment Migrated MS Access 2000/97 databases to MS SQL Server 2000, and 2005 Migrated MySQL 4.1.0 databases to SQL Server 2005 SQL Database Administrator July 2009 to May 2010 Responsibilities: Installed, Configured, and Managed SQL Server 2000 in

development, test, and production environment   Upgraded databases from SQL Server 7.0 to 2000 in development, testing, and production environment   Implementing business rules in Database.   Setting up referential integrity to maintain data integrity.   Creating stored procedures, triggers and other databases level constraints.   Setting up user rights integrated with Windows NT security and AD   Optimization and tuning by setting up appropriate indexes and regular data maintenance.   Participating in database modeling and logical and physical design.   Participating in the application development process and code reviews of data base objects.   Creating database design and development standards.   Bench marked and run time improved production systems.   Uploading of periodic data from remote sites.   Documenting MS SQL Server database design, implementation and configuration.   Developing scheduled task scripts.   Installing and configuring MS SQL Server Service Packs applicable.   Participated in Database Designing.   Setting up MS SQL Server and database configuration parameters.   Configuring MS SQL Server Clients.   Developing and implementing DBA maintenance plan.   Daily monitoring of MS SQL Server activity, error logs, NT event logs, space usage and security.   Developing and testing a backup and disaster recovery Plan.   Configuring and auditing MS SQL Server security.   Managing database object permissions, user accounts and passwords.   Administering NT Security for MS SQL Server.   MS SQL Server performance monitoring and optimization.   Analysis of MS SQL Server long-term performance trends.   Creation of MS SQL Server database devices, databases and database objects.   Scheduling and managing jobs on MS SQL Server.   Monitoring jobs performance and impact on normal DBA/Developer Applied SP (Service Pack) 2005 to 2008   Applied Patch on Windows Server 2003 Enterprise Edition   Strong on database Performance tuning   Writing T-SQL and Stored-Procedures   Used DBCC to check database conditions and Rebuilding indexes as well   Assisted Database Developers to optimize SQL queries and Stored Procedures

    Strong working experience in creating, modifying tables, Index (Cluster/Non-Cluster), Constraints(Unique/Check), Views, Stored Procedures, Triggers   Data Modeling, developing E-R Diagram using ER Win, Visio, and SQL Server Data Diagram   Backward & Forward Engineering with data modeling tools mentioned above   Export & Import data from Flat file, CSV file to/from

SQL Server Database using DTS, SSIS, and BCP   Export & Import data from/to databases like Oracle, MySQL, and Access to/from SQL Server   Generated Report using SSRS (SQL Server Reporting Services)   Generated Report in Excel, html, and text as well   Compliance with company policies for database security.   Strong knowledge and working experience in Database Backup & Restore   Experience with Point-in-Time Recovery   Restored Database from backup   Working experience and strong knowledge in disaster recovery   Scheduled jobs to automate different database related activities including backup, monitoring database health, disk space, backup verification   Developed Different Maintenance Plans for database monitoring   Monitor Server Activity, and solving problem as needed   Monitor SQL Server Error Log, space usage Used SQL Scripts to create, edit, view, run, and delete script files. Applied SP (Service Pack) 2005 to 2005   Applied Patch on Windows Server 2003 Enterprise Edition   Expertise in database Performance tuning   Writing T-SQL and Stored-Procedures   Strong working experience in creating, modifying tables, Index (Cluster/Non-Cluster), Constraints(Unique/Check), Views, Stored Procedures, Triggers   Data Modeling, developing E-R Diagram using ER Win, VISIO, and SQL Server Data Diagram   Backward & Forward Engineering with data modeling tools mentioned above   Export & Import data from Flat file, CSV file, Oracle, MySQL, and Access to/from SQL Server Database using DTS, SSIS, and BCP   Generated Report using SSRS (SQL Server Reporting Services)   Generated Report in Excel, html, and text from database as well   Strong knowledge and working experience in Database Backup, Restore and Point-in-Time Recovery Scheduled jobs to automate different database related activities including backup, monitoring database health, disk space, backup verification   Developed Different Maintenance Plans for database monitoring   Monitor Server Activity, Error Log, space usage, and solving problem as needed   Small business enterprise, Bahir Dar, ETHIOPIA Education Bachelor's Skills Database (9 years), MICROSOFT SQL SERVER REPORTING SERVICES (9 years), MICROSOFT SSRS (9 years), MS SQL Server (9 years), MySQL (9 years), DBA Additional Information   Over 6 years of experience in administering on-prem/cloud based SQL database environment with expertise in planning, designing, building, and implementing database systems.   Over 6 years of experience

that includes analysis, programming, support, installation, networking, and database administration.

Proven abilities to direct and troubleshoot database administration and network administration as well. Physical and Logical database design, Development, Performance Tuning (with Profiler) and Query optimization (with Show Plan and Database Tuning Adviser). User Management, Security, Backup and Recovery. Well versed in implementing and administering Windows Server 2008, 2003, and NT 4.0, SQL Server 2008, 2005, 2012, 2014, 2016 Including the back end development, writing stored procedures and triggers with Transact SQL (T-SQL), Worked with the development team in implementing Object Oriented, Client/Server applications using Visual FoxPro 5, Visual Basic 5 in the Environment of Windows 9x, Windows Server 2008, 2003, and NT 4.0, and SQL Server 2008, 2005, 2000. Strong working experience and knowledge with SQL Server Standby/Replication, Log shipping, Performance tuning, Backup/Recovery, Query Optimization and Security Management. Strong knowledge and working experiences as Database Administrator of MS SQL Server (7.0 & 2000, 2005, 2008), MS Access 2000 & 2003, Sybase, Oracle. Strong knowledge and experiences administering Web Server (IIS-Internet Information Services)including installing, and configuring and monitoring. Good knowledge and working experience on Operating Systems (O/S) include Windows Server 2008, 2003, 2000, and NT 4.0, Windows 2000 professional, Windows Professional, and MS-DOS. Working experience also includes installing, configuring, and administering the above operating system Good knowledge and working experience in designing Network in Windows 2000/2003 server Well experienced in the SQL scripting. TECHNICAL SKILLS Database: SQL Server 2008/2005/2000, MS Access 2003 & 2000, MySQL, SQL Tools: Query Analyzer, Profiler, Database Mail, SQL Mail, SQL Agent Programming: SQL, T-SQL, Store Procedures, Trigger, Web Design, ASP.net ETL Tools: SSIS/DTS, BCP, OSQL, ISQL Reporting/Analysis Tool: SSRS (SQL Server Reporting Services), Data Modeling: SSDD (SQL Server Database Diagram), ER Win, VISIO 2003/2007 Operating System: Windows NT4.0, Windows Server 2008/2003/2000, MS-DOS
