Front End Developer Front End Developer West Palm Beach, FL Authorized to work in the US for any employer Work Experience Front End Developer A Financial Tech Startup. - West Palm Beach, FL August 2015 to Present Responsibilities Front End Development. UI/UX.   Accomplishments Designing and implementing various features for a new version of the user dashboard.   Skills Used Interface development using the following technologies: JavaScript libraries and frameworks including AngularJS, jQuery, Underscore, Highcharts and Google Charts for data visualization, Node, and Gulp for build processes and workflow automation. PHP to extend and interact with the Drupal CMS and assist with the development of an automated email campaign. RESTful services. Bootstrap and Sass for styling. Git is used through the Pantheon.io platform for source control. Front End Development Intern Szl.it - Durham, NC November 2012 to 2014 Responsibilities I assisted with various aspects of product development by making design suggestions, improving content, and implementing changes to the current code base as well as refactoring legacy code for a prototype web application that was used for internal testing and demonstrating proof of concept to potential investors.   Accomplishments Contributed to the increase of content sources for improvement of the user experience.   Refactored the existing front end code base left by a previous developer and implemented changes requested by the product development team.   Skills Used HTML5, CSS3, JavaScript/jQuery, AJAX, Ruby, Data Extraction, Git, Trello, Agile Development, and Mobile First design methodologies. Education Front End Development http://www.frontendmasters.com - Online 2015 to 2015 BS in Psychology University of Central Florida - Orlando, FL 2007 to 2011 Skills HTML5, CSS3 (Bootstrap, Sass), JavaScript (jQuery, AngularJS, Node, MongoDB, etc), AJAX, PHP, Grunt & Gulp, REST APIs, Python, Ruby, MySQL, PostgreSQL, UI engineering, Git Links http://www.americanconsolidatedusa.com   http://mean-fit.herokuapp.com https://twitter.com/ForexRecap http://pokomon.herokuapp.com http://github.com/jbrady89 Additional Information I've been programming since August of 2012. Since then I have worked on several different projects that have upgraded my skillset along the way.   Highlights include: -Recreating the MacPaint drawing application using HTML5, CSS, and JavaScript.   -Designing, architecting, and developing Single Page Applications with complex user interactions.   -Creating an automated

Twitter account using Python and the Twitter REST API. (Link above)   -Used Python to collect and analyze millions of tweets as part of an algorithmic investment strategy. (Project on github)
