Software Developer Software Developer Software Developer - Thanos Consulting LLC Dallas, TX Authorized to work in the US for any employer Work Experience Software Developer Thanos Consulting LLC May 2017 to Present   Transform business requirements and research into winning delivery solutions that meet performance goals.    Developed RESTful API endpoints using Node.js Express, Serverless, AWS Lambda Functions, MongoDB, JSON Web Token for authentication and authorization of security configurations in Node.js and Mongoose for Object Relational Mapping.   Consume RESTful API endpoints as services on the client using Angular and React.    Accessed RESTful API endpoints from ngRx effects to load data into ngRx store.    Managed application state using Redux in both Angular and React applications.    Re-designed monolithic applications into more flexible and maintainable applications with microservices.    Followed agile methodologies like Pair Programming, Test Driven Development and Code Coverage threshold to implement solutions in leanest possible way and to ensure micro services have less defects, memory leak and performance bottlenecks.    Implemented coding standards and refactoring in every stage to provide flawless code.    Implemented Node.js and MongoDB RESTful API endpoint unit and e2e tests using Mocha and Chai testing frameworks. Full-stack Developer Citigroup February 2015 to April 2017 Designed and developed responsive web pages using HTML5 CSS media queries, Twitter Bootstrap, jQuery, AngularJS, AJAX and JavaScript.       Experienced in developing React Components. Used Axios library with ReactJS for making AJAX calls.    Extensive knowledge and work experience with Typescript new features like block scope, type restrictions, decorators, arrow functions, classes, interfaces, modules (imports and exports)    Worked with Angular 2+ to develop single page applications, and with NgRx/Store for managing state in Angular applications.    Worked with React Router to develop Single Page Applications    Worked with ECMAScript 6 features to build JSX and used Babel for ES2015    Extensive and thorough knowledge working with MEAN/MERN stack for developing applications    Used Node.js and Express framework extensively for development of RESTful web services and middleware configurations.    Developed style-guides to ensure pattern and design consistency across all pages on the website. UI/ Web Developer Thanos Consulting LLC February 2012 to February 2015       Designed the website and

created/developed web interfaces. Created Responsive Designs (Mobile/Tablet/Desktop) using HTML5 & CSS3. Created appropriate concept models, site organization, navigation, page layouts and interaction to support company's needs and goals. Used Dreamweaver as HTML Editor for designing new pages. Responsible for content and UI Development and Developed HTML prototype documents with CSS Style Sheets. Turned the application into a Highly Interactive, using AJAX web development techniques. Experienced on implementing Angular.JS in creating animations based on CSS classes experienced on implementing Angular.JS in creating animations based on CSS classes Involved in implementing data grid/tables using Bootstrap and Angular.JS for front-end client facing of the single page applications Did Cross - Browser coding, for making pages compatible with all browsers. Tasked with migrating all existing apps built in Angular 1.5 to version 2.0. Migrate all Angular 1.5 components to Angular JS 2.0 API over time. Performed validation of completed sites including the debugging and testing of code and built dynamically generated dropdown lists using Ajax, jQuery UI and Angular JS. Education B.Sc. in Management Information Systems Devry University - Dallas, TX December 2011 Skills TESTING (5 years), CSS (7 years), jQuery (7 years), API (5 years), HTML (8 years), JAVASCRIPT (8 years), WEB SERVICES (7 years), AWS (8 years), MONGODB (4 years), .NET (2 years), ALGORITHM (6 years), AMAZON DYNAMODB (4 years), Amazon Elastic Compute Cloud (6 years), DATA STRUCTURES (6 years), DYNAMODB (6 years), EC2 (6 years), ECLIPSE (7 years), FRAMEWORKS (7 years), Git (8 years), JAVA (5 years), JUNIT (5 years), MYSQL (9 years), OOP (7 years), PYTHON (8 years), RAD (4 years), Subversion (5 years), SVN (5 years), VISUAL STUDIO (7 years), WEBSPHERE (5 years), DATABASES (5 years), Android (5 years), HTML 5 (8 years), PHP (6 years) Additional Information SKILLS Languages: Python, Java, JavaScript, ES6, Typescript, HTML and CSS Databases: MySQL, PostgreSQL, MongoDB Web Dev Frameworks: React, Angular, Serverless, Express Libraries and Runtime: Node.js, jQuery, React-Native, Redux, RxJS Unit and E2E Testing Frameworks: Jasmine, Karma, Mocha, Chai, Sinon, JUnit Agile: Pair Programming, Test Driven Development (TDD), Code Coverage Others: Data Structures, Algorithm, Functional Programming, OOP, Microservices, GraphQL Tools: Amazon

Web Services: EC2, S3, DynamoDB, VPC, Codepipeline, AWS Lambda Functions, API Gateway

Application Containers: Docker and Kubernetes    Editors: Visual Studio Code, Visual Studio, WebStorm, Atom, Intellij, Eclipse, Sublime, IBM RAD WebSphere 8.5    Integrated Development Environments (IDEs): Angular CLI, Create-React-App, Chrome Dev-Tools    Package Managers: NPM, Yarn, Bower    Source Control: Git, GitHub, GitLab, Tortoise SVN    Task Runners: Gradle, Maven, Webpack, Gulp, Grunt    Collaboration: JIRA, BitBucket, Confluence, Trello    Build Environment: Bamboo, Jenkins
