SQL Database Administrator/SQL DBA SQL Database Administrator/SQL DBA SQL Database Administrator/SQL DBA A certified SQL server Database Administrator seeking a DBA position with new challenges and opportunities to grow. I have 6 years of hands on experiences working on a large, fast paced and world class enterprise environment; supporting MS SQL Server in the areas of installation, configuration, administration, data modeling, maintenance, performance tuning, security, monitoring, implementing HA and DR solutions, and business intelligence (such as SSIS and SSRS). I have also experienced with Cloud/Azure service where I have migrated from on premises databases to Azure environment, deployed products on Azure, setup development and test environment on Azure and maintain security. I am a good team-player with excellent analytical, detail oriented, interpersonal, problem solving, and communication skills. Work Experience SQL Database Administrator/SQL DBA Bureau of Indian Affairs - Washington, DC August 2016 to May 2019 Responsibilities and Accomplishments: * Installed, Configured, and Administered SQL Server 2012, 2014 and 2016 in development, test, and production environment * Database High Availability: Installed, Configured and Managed Database Mirroring, AlwaysOn and Fail-Over Cluster * SQL/T-SQL, Triggers, And Stored Procedure: Wrote SQL, T-SQL, Stored-Procedures and triggers. Assisted SQL developers to optimize SQL queries, Stored Procedures and Triggers * Monitoring and Performance Tuning: Performed database monitoring and Performance tuning. Monitored Servers activity and worked with clients to solve different problems. Performed index and statistics management. Managed SQL Server error logs, space usage, and growth pattern. Used DBCC to check database consistency, index fragmentation/rebuilding, and statistics. Managed BLOCK and LOCK * Database Automation: Created backup jobs for different types of backup like FULL, Differential and Transaction Log. Created Jobs for database maintenance Index fragmentation, rebuild, and database statistics * Data Modeling: Worked on different Data Modeling projects using ERWin for designing Logical & Physical Database. Used Backward & Forward Engineering to create Logical and Physical database * Index/Constraints, Triggers, Stored Procedure: Created and managed Index (Cluster/Non-Cluster), Constraints * Security Management: Created and Managed users, group roles, schema, and security at object level and data encryption

* Exported & Imported data from/to Oracle, MySQL, and Access Database including flat files like text, excel, and CSV files to SQL Server 2005/2008 * Database Migration: Migrated MS SQL 2008 to MS SQL Server 2012, MS SQL Server 2014, and MS SQL Server 2016. * Backup/Recovery: Work experience and strong knowledge in disaster recovery and Rebuild databases using backups.

  Environment: MS SQL Server 2012, 2008 R2, Windows Server 2012, 2008 R2 Enterprise Edition, Idera, Toad Data Modeler, OpNet, SSIS, SSRS. SQL Database Administrator/SQL DBA Census Bureau - Suitland, MD November 2012 to July 2016 Responsibilities and Accomplishments: * Maintained mission critical production database as well as production applications including Emergency off-hour support * Installed and configured SQL Server 2008 R2, 2012 and 2014 as standalone and AlwaysOn * Automating Database tasks (Created jobs, alerts, and schedules for database maintenance tasks) * Wrote SQL/T-SQL codes, stored Procedures, Triggers and Functions * Helped database developers to tune up SQL/T-SQL Queries * Applied Service Packs and hot fixes * Performed database backups, restored database from backup * Replication: Configured and maintained transactional and merge replication * Security Management: Access and security management like creating Logins with appropriate roles. Creating users and groups and granting and revoking privileges for data security * Migrated MS SQL 2008 to MS SQL Server 2012, MS SQL Server 2014, and MS SQL Server 2016. * Mirroring: Configured and Maintained Database Mirroring * Performed Performance Tuning: Using Idea, SQL Server profiler, Windows performance monitor and Database engine tuning advisor to analyze and fine tuning of long running queries and stored procedures and slow running servers * Documentation: Created documentation for installation, monitoring procedures, security policies, configuration changes, migration procedures, and best practices * Reporting Services: Installed, configured, and maintained SQL Server 2000/2005 Reporting Service   Environment: MS SQL Server 2012, 2008 R2, Windows Server 2012, 2008 R2 Enterprise Edition, Idera, Toad Data Modeler, OpNet, SSIS, SSRS. Education Bachelor's in Management in Finance Sufia Institute of Science & Technology Skills Data modeling, Database, Ms sql server, Sql server, Sql Additional Information TECHNICAL SKILLS: SQL Server Tools: SQL Server Management Studio, Business Intelligence Development Studio,

Query Analyzer, SQL Profiler, SSIS and DTS designer and wizard, Database Tuning Advisor and Index Tuning Wizard, SQLCMD, Upgrade Advisor, SQL Configurating manager, Client and Server Network Utilities. Databases: MS SQL Server 2016, 2014, 2012, and 2008R2 Languages: SQL, T-SQL, and PowerShell   Operating Systems: Windows Server 2012/2008R2/2008 Enterprise/Standard Edition, 2003 Enterprise/Standard Edition, Windows 2000 Advanced Server, Windows 7 and 10 Professional. Data Modeling Tools: ERWin, Idera, MS SQL Server Database Diagram Reporting Tools: MS SQL Server Reporting Services 2012, 2008R2 Ticketing Tools: ServiceNow and JIRA   TECHNICAL SUMMARY: * Strong working experience with the new features of SQL Server 2016/2014/2012/2008R2/2008/ such as Always on High availability groups, database mirroring and recovery. * Deep understanding and working experience of SQL Server (SQL 2008/SQL 2008 R2/2012 / 2014/2016), includes installation, configuration, and maintenance of standalone and Clustered Servers [Active/Active and Active/Passive Cluster Design] * Optimizing and Performance Tuning such as Query Optimization, Performance Tuning using execution plan, Profiler, Database Tuning adviser and Windows Performance Monitor tools to resolve Dead Locks or long running queries and slow running server. * Strong knowledge and experience in configuring and administering High Availability Solutions like Database mirroring, AlwaysOn, Server Clustering, Replication and Log shipping. * Create and set-up Database maintenance plans and Jobs for Database monitoring, maintenance and Automation. * Knowledge of Microsoft Best Practices with regards to configuration of SQL data/log, tempdb, backup drive locations. * Applying Service Pack (SP) for Databases instances, and patching SQL servers with hotfixes. * Cloud/Azure experience includes migrated from premises databases and Legacy products on Azure, deployed products on Azure, Setup development and test environment on Azure. * Migrating databases from other databases management plat forms like Oracle 10g using SSMA. * Upgrading databases from MS SQL Server 2008, 2008R2 to SQL Server 2012, 2014. * Deploying Databases in Test, Dev, UAT and Production environment * Expert on Backups and Recovery including Point-In-Time and DR solutions with SLA, RPO and RTO * Strong working experience in creating and supporting database administration scripts and schedules using T-SQL. * Working experience in configuring

and setup mail server for database mail notification. * Good customer support experience in providing end-user support on a day-to-day basis * Working experience with SAN and RAID. * Worked on Linked and Remote Servers to run queries between SQL servers and other data sources using ODBC, OLE DB drivers * Installed and maintained SQL Server Reporting Services [SSRS] 2008 and 2008 R2/2012 * Experience in creating and scheduling SSIS/DTS packages * Good experience in writing and debugging SQL Server stored procedures/triggers and documenting issues/resolutions of SQL Server Applications * Self-motivated; proactive; a team player; Strong analytical and problem-solving skills * Can learn new software and technologies rapidly * Develops or maintains stored procedures, including designing, coding, testing, debugging, and installing.
