Front End Developer Front End Developer Front End Developer Seattle, WA I am passionate about developing high-quality user experiences with rich, responsive UI driven by semantic markup, the latest in CSS and modern JavaScript. I have deep expertise developing highly-designed, mobile-optimized, CMS-driven sites for Fortune 500 companies.   Technical Skills: HTML5, CSS3, JavaScript, jQuery, Inky, ASP.Net MVC, C#, Node, Gulp, Grunt, JSON, LESS, SASS, Sublime Text, Slack, JIRA, Confluence, Crucible, Bitbucket, GitHub, Subversion, ES6, Babel, Modernizr, Browserify, Bootstrap, Waterfall and Agile/Scrum methodologies Authorized to work in the US for any employer Work Experience Front End Developer Amazon.com - Seattle, WA August 2018 to February 2019 Wrote view code, styles and JavaScript application code. Achievements: Built a data-driven, customer-facing, internationalized web portal.   Assessed the needs for and implemented accessibility solutions.   Routinely collaborated with a multi-disciplinary team to meet project goals. Web Developer Microsoft - Redmond, WA February 2017 to July 2018 Maintained and updated MVC code for a highly-trafficked, data-driven website on a daily deployment cycle. Prototyped UI enhancements for web and marketing emails. Implemented designs and contributing to UX improvements. Achievements: Wrote onboarding documentation for new developers. Updated the Azure website to meet WCAG 2.0 AA accessibility standards.   Built flexible Razor view templates and partials used in creating data-driven emails.   Helped to establish and document the development workflow for scalable email marketing.   Senior Front End Developer www.wearepop.com - Seattle, WA December 2011 to November 2016 Built microsites and corporate websites for many companies including Nintendo, Microsoft, Target and Xbox. Implement UI design for responsive websites and mobile web applications. Achievements: Contributed to project codebase, writing custom utility classes and extending base classes while observing existing design patterns.   Presented to my team on the common uses of jQuery and their native JS equivalents.   Collaborated with senior level design directors to establish optimal user experiences. Built responsive websites for modern and legacy browsers.   Established unparalleled rapport with our peer development team in Costa Rica, leading to an increase in interoffice communication, productivity and morale.   Integrated styles, markup and JS into .Net templates for use with Kentico,

an enterprise-level CMS. Developer Peak Systems - Seattle, WA April 2011 to December 2011 Mobile and web UI development. Achievements: Built microsites and web apps for global clients using HTML5, CSS3 and JavaScript. Implemented Qwest/CenturyLink web app rebranding. Web Developer GreenRubino - Seattle, WA August 2010 to December 2010 Front- end, middle-tier and back- end development, SQL database design, unit testing, and QA. Achievements: Wrote SQL database stored procedures and functions. Rewrote middle-tier and back- end C# code to facilitate new web application functionality. Web Designer/ Developer Rankin Design - Bellevue, WA January 2000 to September 2005 Construct websites for clients. Achievements: Led the company in making websites a strong counterpart to print-based marketing.
