Front End Developer Front End Developer   Have designed and developed more than 50 Front End Projects over 4.6 years of expe- rience with pixel precision across all browsers and devices.   The projects and websites developed covers a wide range of platforms such as B2C,   B2B, Internal tools, CMS, Cardboard virtual reality websites, Online TV Channels, Micro Sites, Email Templates, Unity3D games, Facebook and Mobile Applications, Corporate Sites and So on.   I have worked for many reputed Clients such as BMW, Bank of Newyork, Virgin, Mazars, Historical Royal Palaces (United Kingdom), Akka Polis, Pygott & Crone and many oth- ers.   With just a team size of 2 i have designed and developed two websites which gets traffic more than 40 Million visitors a Month.

Have excellent communication skills and experience in facing clients customer service, giving demo and presentations to the clients, training and writing instructions for the clients/internal staffs.

I am very good at problem solving, quick learning, work under pressure, have ability to handle multiple projects at a time and always happy and looking forward to learn new technologies every day.   I am looking forward to progress my career as a Lead Front End Developer where my skills and knowledge is tested/challenged and eventually enhanced day to day with the work I do and with the knowledge i share and learn from my team and colleagues.
