Frontend Developer Frontend Developer Frontend Developer - Adomik I'm a passionate software craftsman; I love my job and I'm grateful for it as it is personally rewarding and favors humility as well as team spirit on a daily basis. I enjoy working with machines but not being treated as one ;)

Work Experience Frontend Developer Adomik December 2018 to Present R gion de Paris, France [Remote] Frontend development in an Agile context for the ad revenue optimization leader In charge of developing new features, maintaining existing code, fixing bugs and implementing new designs as well as profiling the React application to find performance bottlenecks and optimization solutions. Tech stack: React, Redux, Data-Viz, Sass Best practice: Code review, Code linting etc.

WordPress Developer Freelance/Self employed - France July 2019 to July 2019 [Remote] Developed a custom WordPress for a french personal financing blog. Did a complete responsive redesign of the blog using latest techs and added microdatas to make sure every aspect is fully categorized for crawlers to improve SEO. I've ensured that the theme's assets were fully optimized (bundled with Webpack) and light weight for an end result of a few kb of CSS and JS. I chose not to include any UI framework to preserve performance as the blog's business model is based on advertisement. Ad scripts and WordPress external plugins already tend to bring down performance so I wanted to provide the best experience for users and to avoid being impacted negatively by Google. Assets serving will soon be cached/optimized by CloudFlare.   WordPress Boilerplate (PressPack by Jared Palmer, based on Docker, Webpack, Yarn), ES6, HTML5, CSS3 Frontend Developer eProseed - Luxembourg, LU December 2017 to December 2018 Remote] Working with a remote team spread across Europe and the middle- east. I was responsible for choosing the proper technical stack and solutions and implement them within the web app. I was also in charge of sharing and communicating with my team mates and did a lot of "mentoring"/knowledge sharing to make sure that everyone was improving evenly and wasn't set aside. I also took the lead on the re-redesign of the app and developed a proper style-guide to keep styles centralized and consistent. A great opportunity to learn from everyone in an international context with colleagues from Portugal, The Netherlands, Cyprus, Lebanon, UAE Software development with React, Redux, Jest, SCSS, etc. in a monorepo (w Lerna), Agile (Scrum) methodology Fullstack Javascript

Developer Kid Gourmet April 2017 to November 2017 8 mois) Sch lcher, Martinique, West Indies [side project] Full stack development of a food art progressive web app MVP. An amazing opportunity to learn a lot in all aspects of development from devops to UI design and API development for instance. Backend: API NodeJS (Express) + MongoDB on NGINX @digital_ocean Front: Angular + Firebase + Service Worker (PWA w Workbox), Design, Integration, SEO https://kidgourmet.fr A React SSR version is currently under development. Potential launch late summer or early fall 2019 Lead Front- end Developer Carfully - Fort-de-France, MQ November 2015 to March 2017 West Indies Carfully is a peer to peer car rental start-up (marketplace) in the Caribbean. Probably the most inspiring and best human experience. I had the chance to meet fantastic colleagues with an amazing entrepreneur and "nothing's impossible" mindset.
