Front- end Developer Front-end Developer Front- end Developer Omaha, NE I am a passionate individual who enjoys writing detailed code and problem solving. Throughout my career, I have relied on hard work and creativity to produce multiple websites, mobile applications, and other successful projects. I have 4 years of experience with HTML, CSS, and Javascript. I believe web development is exciting and constantly evolving. This is why I have spent the last couple years learning/implementing ES6, ReactJS, and Python into my projects. Work Experience Front- end Developer Calvin Solutions April 2014 to Present Created complex websites while hitting deadlines and exceeding client expectations. Gained valuable experience in a team environment while working on a project from conception to final product. I pride myself on being a self-starter with an attention to detail and being resourceful in finding the right way to accomplish a solution. I excel at incorporating HTML, CSS, and Javascript to create a desired outcome. Websites and Projects https://github.com/Shawn77 WebSites: ? Created a website for marketing and distributing of product for a local whiskey company based in Manhattan, NY. ? Used JavaScript/ CSS/ HTML to create forms that would account for product selection, shipping, state tax, estimates, etc. Used JavaScript libraries for sections that showed customer reviews. ? Designed and maintained a website for an all-girl band that plays shows across the Midwest. ? Created a webpage that would display a countdown thru JS of upcoming shows. Used jQuery to build a carousel of band members bio s. Interactive website allowed for constant updating of new events and shows. ? Developed a website for a local church group to help with volunteer work and raising money for multiple causes. ? Used a combination of CSS, HTML, and JavaScript to help develop a secure website that would allow for fundraising The site used several JSON & Mustache.js libraries to help with page interaction. Javascript: ? Quiz applications: ? Highlights my understanding of the map function and also other CSS libraries. ? Clocks, Timers, Stopwatches: ? Demonstrates knowledge of getTime() and other date related methods. ? Games: Frogger, Pong, Space Invaders, Breakout: ? Projects focused on incorporating HTML5 Canvas methods and use of ES6 concepts. Python and React: ? Webcrawler: ? Used Python to create an application that would search websites for images or text. ? React To Do list: ? Incorporates my experience of combining

NPM, Babel, and Webpack into React projects.
