Worked in a productive and collaborative way, and also in the implementation of new processes aimed at reducing company costs. In this role, I emphasized an initiative to implement weekly meetings with the managers of each company team, where the issues that appeared during the week were discussed, in order to anticipate possible problems and remedy existing ones. This generated a proactivity in the teams, which reduced the time spent with the solution of defects in the System. Another initiative was the reallocation of the employees' schedules, so that at no time would the clients be unassisted of support. Also implemented the Scrum methodology in the development team, which streamlined the process of delivering system improvements and bug fixes.
