Software Developer I Software Developer I New York, NY   2+ years of experience as Front-End Web Developer creating highly scalable web Applications including requirement analysis, design implementation, testing with emphasis on Object Oriented JavaScript and Client Server technologies.   Expertise in developing end to end applications using MEAN stack - MongoDB, ExpressJS,   Angular 7.0/6.0/4.0/2.0/1.x, NodeJS along with Javascript and JQuery.   Solid understanding of using Angular 7.0 Components, Directives, Pipes, Reactive/ Template Driven Forms, Router to implement various functionalities, along with Guards to protect routes.   Experience and understanding of component interaction using Observables, rxjs Subjects, input/output decorators and Services.   In-depth understanding of using D3.js and Fusion Chart in Angular 7 to create Dynamic Data Visualization.   Good understanding of user authentication using JWT (JSON web tokens) for performing Server-side validations.   Experience with server-side scripting language Node.js. Used several npm packages such as express, mongoose, passport JS, body-parser etc along with it.   Excellent understanding of databases involved in application development using Relational Database like MySQL, and NoSQL database such as MongoDB.   Possess extensive knowledge on OOPS concepts hands on experience with object-oriented JavaScript and Typescript.   Involved in all phases of SDLC using SRUM/Agile Environment. Used various tools such as Git as Version Control System (VCS) and using Azure Devops for continuous integration/continuous deployment of builds.   Knowledge of various IDEs like Visual Studio Code, cloud 9, Eclipse, JS fiddle, Sublime text.   Experience in working with REST API testing tool like, Postman.   Quick Learner, ability to work independently and adapt to the emerging new technologies and paradigms. Work Experience Software Developer I AECOM October 2018 to Present Responsibilities: Involved in Agile/SCRUM based approach to develop web-based application.   Take on end to end ownership of front-end development and working closely with product managers & team leaders.   Revamp existing applications by adding various modules depending on requirements and responsible for creating, maintain and improving UI and bring consistency to UI layout.   Use all possible features of Angular 7 framework to build, modify and plugin front end to the backend.   Developed internal iOS assessment application using XAML and

with various plugins of Xamarin and C# for UI, used SQLite for backend.   Manage source codes versions with version control systems such a git/GitHub.   Work in multidisciplinary team with other professionals such as back-end developers and web designers.   Build and maintain SharePoint sites for efficient sharing of project resources. Environment: HTML5, CSS3, JavaScript, Bootstrap 4, jQuery, REST APIs, Angular 7, NodeJS, REST, AWS, SharePoint 2013, Azure DevOps. SOCIAL MEDIA MARKETING CONSULTANT VIRTUAL ASSISTANCE INTERNATIONALS March 2016 to July 2016 Responsibilities: Off page SEO including Social media marketing, article marketing, email marketing, blog/forum posting, wen content/ article writing, administrative /secretarial work, email management, calendar management & presentations.   Created prototypes in HTML5, JavaScript and CSS3 for different UI pages for different clients.   Developed few web page components with different styling using semantic-UI, bootstrap and css3 as per client requirement.

 Used High charts and D3.js for creating Graphs and charts according to JSON/ Raw data provided by clients. Environment: HTML5, JavaScript, CSS3, semantic-UI,bootstrap, High charts, SEO. WEB DEVELOPER SATVA DESIGN STUDIO August 2015 to January 2016 Responsibilities: Involved in creating Single Page Application using AngularJS in Front-end and NodeJS in backend.   Implemented Two-way data binding for efficiently managing view data and model data.   Created various controllers and dynamically loaded them as per the view in the application.   Used RequireJS to optimize the performance of the AngularJS application   To efficiently manage data among controllers, created various services in AngularJS.   Extensively used $http services to consume backend REST APIs by handling promises in the front-end.   Used $location and $routeParams services to handle routes as per the requirement.   Designed and implemented UI layout using HTML5, CSS3, SASS, Bootstrap and used Task runner to automate the compilation from SASS to CSS.   Used $emit, $broadcast and $on for different controllers to be notified for various events.   Implemented routing using $routeProvider to perform navigation in the app at the configuration level.   Implemented form validations using various form events like, ng-pristine, ng-touched, ng- dirty and used ngClass to give desired styling to invalid fields.   Created various REST APIs in NodeJS and ExpressJS as middleware. Performed Database operations using

mongoose as ODM for the MongoDB database.   Used Robo mongo now Robo 3T which is a shell-centric and cross-platform MongoDB management tool Environment: HTML5, CSS3, JavaScript, Bootstrap, jQuery, REST APIs, AngularJS, MongoDB, NodeJS, Express JS. JR. WEB DEVELOPER KEDAR SOFT - Ahmedabad, Gujarat February 2013 to April 2014 Responsibilities: Developed all the UI pages using HTML5, CSS3, Bootstrap, vanillaJS, jQuery.   Developed page layout, navigations and presented designs and concepts to the clients and the management review.   Used Bootstrap and Media Queries to develop pages with responsive design.   Worked on different modules including the error validation of forms and links, realized via jQuery and JavaScript.   Extensively worked with making APIs calls to fetch the data from the back - end as JSON response and parse it on the UI for manipulation.   Worked on Cross-Browser compatibility and fixed the bugs for several browsers.   Used AJAX to facilitate dynamic and asynchronous manipulation.   Performed DOM manipulation using DOM and DOM functions. Environment: HTML5, CSS3, jQuery, JavaScript, Bootstrap, AJAX, JSON, SQL Server 2008. Education Master of Science in Computer Science in Computer Science Texas A&M University Kingsville May 2018 Bachelor of Engineering in Computer Engineering in Computer Engineering Gujarat Technological University May 2015 Skills Angularjs, Bootstrap, Html5, Sass, Visual studio, C#, C++, Git, Html, Javascript, D3.js, Mongoose, Typescript, Jenkins, Json, Xml, Eclipse, jquery, Ajax, Css, PHP, HTML 5 Links https://drashti2277.github.io Additional Information TECHNICAL SKILLS   Web HTML/HTML5, CSS/CSS3, LESS, SASS, Bootstrap 4.x, Semantic-UI, Technologies: JavaScript, Typescript, ES5, ES6/ES7, AJAX, JQuery, AngularJS/2.x/6.x/7.x, RequireJS, Rxjs, Express.js 4.x, NodeJS, , High charts, D3.js, Angular charts, Angular gauge, axios, mongoose, Passport js, Passport-local, Paper.js, bycrypt(NodeJS library), Npm, XML/JSON, REST APIs, CRUD, DOM manipulation, C++, C#. Tools: Visual Studio Code, Visual studio 2010(Web applications), Cloud 9, Sublime text, Eclipse IDE, Robo 3T (Robo mongo), Jasmine, Karma, JIRA, Gulp, Grunt, Jenkins. Database: MySQL 5.x, SQL Server 2008, MongoDB 2.x, DynamoDB Operating Windows XP/Vista/7/8, MAC OS X, Linux Systems: Version Control: GIT, GITHUB, Azure DevOps.
