Sr. PHP/Drupal Developer Sr. PHP/Drupal Developer Sr. PHP/Drupal Developer - Tandemseven Vernon Hills, IL   Around 9+ years of experience as a Senior PHP/Drupal Developer and Software Engineer in Design, Development and Implementation of various Client/Server, Web-based applications.   Extensive experience on Web Technologies using PHP, HTML, CSS, JavaScript, AJAX, and JQuery.   Highly experienced in Drupal 6, 7 Installation, Configuration, Module and Theme development, content management.   Experience in developing a content management package (e.g. core Interwoven technologies like Team Site)   Proficiency in rapid UI developing using JQuery and Java script.   Experience on working with CSS Backgrounds, CSS Layouts, CSS Positioning, CSS Animations, CSS Text, CSS Borders, CSS Margin, CSS Padding, CSS Table, Pseudo Classes and Pseudo.   Experienced in developing e-commerce applications with Joomla, Magento, WordPress and OS Commerce.   Experienced with ZEND MVC Framework and ZEND_X libraries for developing enterprise applications.   Developing and installing modules and plugins in different CMS like Joomla, Word press.   Experienced in Drupal user access management, administration, performance and security.   Experience with e-commerce on Drupal utilizing Drupal Commerce.   Well versed with complete Software Development Life Cycle (SDLC) process, expert in Analysis, Design, Development and Implementation of PHP Applications.   Significant experience in web development tools like APTANA STUDIO, Adobe Dreamweaver CS3, Spring Tool Suite, Eclipse, and Firebug.   Strong on Object Oriented Programming (OOP) Concepts using PHP. Good Knowledge in Core Java Programming.   Experience in SQL Injection   Experienced in Model View Controller (MVC) architecture based Web Application Development.   Excellent experience on MVC frameworks like Cake PHP, CodeIgniter, Symfony, Open Cart for developing enterprise applications.   Experienced in Drupal themes, modules and familiarity with the Drupal API and hook system.   Experienced with multiple version control tools like SVN, CVS, and TFS Source Control. Experienced in developing strategies for Search Engine Optimization (SEO)   Experienced in IDE's like Dreamweaver, Notepad++, Net beans.   Skilled in WAMP, LAMP and XAMPP platforms. Extensively developed Stored Procedures.   Performed database optimization by utilizing Normalization, Indexes, Triggers and Constraints.   Extensive knowledge in Linux operating system

including file system organization, System administration and commands   Experience in developing UNIX shell scripts.   Knowledge in using SOAP protocols and JSON data-interchange language.   Proficient in Integrating Google API's and Social networking API's like Facebook Graph API, Twitter API and REST Web services to the application.   Configured and Run Cron jobs using Unix Commands.   Excellent analytical skills accompanied by good written, interpersonal communication, documentation and testing skills.   Excellent Team player and can work individually. Authorized to work in the US for any employer Work Experience Sr. PHP/Drupal Developer Tandemseven - Vernon Hills, IL December 2015 to Present Responsibilities: Requirements gathering from business and defining specifications for the system.   Worked in a team, Involved in developing the UI, layout and front-end programming (HTML) from wireframes.   Built Web pages that are more user-interactive using jQuery plug-in for Drag and Drop, AutoComplete, AJAX, JSON, Angular JS, and JavaScript, Bootstrap.   Designs, Develop Custom Drupal Modules using Drupal 8 for implementing REST API.   Developed mockups and prototypes using VISIO.   Did extensive Javascript and JQuery programming to give AJAX functionality for the website.   Used Bootstrap with JavaScript, HTML and CSS.   Installed and configured Drupal 8 in the UNIX environment and performed various Content Management System modifications for the Websites.   Implemented Symfony2 framework for better use of MVC concepts.   Built s AJAX pages using PHP to display current server time   Involved in the development using JQuery and PHP and designed applications in AJAX with rich user interfaces.   Development experience with Zend, Net Beans, Notepad++, JEdit   Modification and customization of the Drupal and WordPress themes.   Worked with MySQL which includes configuration, query optimization, full-text search indexing and de-normalization Expert in handling the administration of MySQL database using PHPMyAdmin.   Developed and design security token for in order to verify only valid users can request to API.   Developed new modules call schedule by using JQuery full calendar and Ajax for front-end and back end.   Worked on Stack Zend PHP, Apache Web Server, SVN, Oracle, JavaScript, Jquery   Worked on HTML5/CSS and JQuery in a Drupal based CMS environment   Performed image/graphic slicing and optimization using Adobe Photoshop.   Used JIRA, Stash, Bamboo, Confluence Project

development tools   Excellent work done in writing queries, stored procedures, triggers and functions in SQL Server, Oracle, DB2 etc. Environment: PHP, HTML 5, XHTML, CSS, AJAX, JavaScript, MySQL, JQuery, Windows, Apache, MVC Frame Work, CSS, Angular, Drupal 7, 8, Symfony2, WordPress. Sr. PHP/Drupal Developer FMR, Triangle Park - Durham, NC June 2014 to November 2015 Responsibilities: Developed and maintained Ruby on Rails web applications. Developed Contact Fill Application using Drupal8 and installation and integration of the Application online.   Maintained high volume availability demands using open source tools such as Linux, Apache, PHP, and MYSQL.   Extensively used JQuery Table sorter plugin as a data grid for sorting and freezing headers and footers for many tables which holds huge data related to vendors under the specific Contract vehicle.   Developed configuration programs to compatible to different browsers and resolutions on Chrome, IE, Firefox & Mozilla.   Also created few web applications for clients for a website in Angular2 using Typescript.   Worked with symphony, design patterns like singleton pattern, registry pattern and model view control pattern in Magento framework.   Worked with the Database Schema design and normalization for database accessed by the procedural PHP pages.   Used the Model View controller (MVC) framework to build modular and maintainable applications.   Created Images, Logos and Icons that are used across the web pages using Adobe Flash and Photoshop.   Developed user interface using PHP, CodeIgniter, NOCMS, bootstrap, AJAX, JQuery, HTML, CSS.   Developed Configurable shims for modular JavaScript. Displayed good UX   Create find wish list functionality provides unique responses when an invalid user name is submitted to the application.   Worked with the Database Schema design and normalization for database accessed by the procedural PHP pages   Implemented the presentation layer with HTML, XHTML, JavaScript, AJAX, and CSS, JQuery other libraries   Worked with integrating search engine optimization (SEO) functionality within an MVC framework using constantly evolving legitimate techniques to improve website ranking in the major Search Engines. Environment: PHP, HTML5, JavaScript, JQuery, CSS3, MYSQL, Photoshop, Adobe Flash Professional, Report Builder, Ubuntu 12.04, LAMP WordPress, MySQL, CSS, JavaScript, AJAX, HTML/XHTML, XML, Zend framework, Drupal. PHP/Drupal Developer VERIZON - New Brunswick, NJ November 2012 to April

2014 Responsibilities: Working very closely with designing team to provide great user interface. Worked on JavaScript (including Object Oriented practices) and AJAX Used Jquery for creating different menus and dialog boxes and also used different jquery plugins for calendar, calculator and printing options. Used various inbuilt PHP functions to write complex code and achieve various functionalities. Created web based event Calendar and other application related to it for the ease of the user. Developed code using KOHANA framework. Implemented AJAX and JQuery on Front-End to make the web page more dynamic. Worked on PHP programming, including OO, procedural, data structures and design patterns. Development of a service system Symfony2 framework based. Involved in Testing and maintaining high standard of codes. Designed the Custom theme as per the clients need Conceived and designed database tables in MySql 5 Embedded PHP & HTML formatting and JavaScript Validations Used SVN to maintain current and historical versions of files such as source code and web pages. Build AJAX pages using PHP to display current server time Environment: Joomla, WordPress, JQuery, PHP, MySQL, HTML, XHTML, CodeIgniter, Zend, Symfony2. PHP/ Web Developer CMC Limited Hyderabad September 2010 to October 2012 Andhra Pradesh Responsibilities: Involved in creating and managing databases using MySQL Involved in back-end coding to manage static pages using CodeIgniter (MVC), JavaScript, JQuery, CSS and HTML. Identifying and solving issues caused by plugins or feeds under PHP, MYSQL, HTML, CSS, JavaScript and JQuery Technology. Modifying PHP, HTML, CSS, Java script, JQuery according to project requirements. Worked on developing web pages using AJAX, JavaScript, AngularJS, HTML5, Dojo, NodeJS, JQuery, JSON, XML, and REST Responsible for implementing timely, high-quality text and HTML5/CSS3& incorporate Responsive Design techniques in the web content Back end development and maintenance of websites using PHP and MySQL. Efficiently developed code for different modules by using Oracle SQL, PLSQL and Shell scripting. Designed interfaces in Photoshop, Flash, Notepad++, Corel Paint ShopX2, Image Ready & WordPress. Worked with PHP/MySQL, HTML/CSS, Java Daemons for Google Maps API development Web application development, written in PHP/MySQL, JQuery and Bootstrap, using historical data manipulation. Written AJAX driven JSON consuming JavaScript

functions to save User selections such as radio button, drop-down menu selections into a cookie. Updating themes, database and plugins. Redesigning the application pages according to client requirements. Designed sites in Photoshop, slicing it and then convert it in HTML in tabular format. Used advanced level of HTML5, JavaScript, CSS3 and pure CSS layouts (table less layout) Used the Model View controller (MVC) framework to build modular and maintainable applications. Design & development of Key functionalities of the application and creation of relevant UML artifacts and design documentation. Setup testing environment for Unit Test as well as Front end testing using PHP Unit, Selenium test cases. Environment: REST API, OAuth, PHP 5.1, HTML 4, XHTML, CSS, AJAX, JavaScript, MySQL, JQuery, Windows, Apache, MVC Frame Work, JQuery, CSS. PHP/ Web Developer Apcrat Inc June 2008 to August 2010 Responsibilities: Responsible for foundation develop and design of system on WordPress, Drupal and Open Cart E-commerce framework. Developed the front-end web page by using HTML5, CSS3, Bootstrap and JavaScript, taking advantage of the frameworks AngularJS. Debugging and troubleshooting existing code using Firebug and Developer Tools. Integrated source code and version control systems subversion (SVN). Follow complete SDLC methodology in development of this project. A comprehensive detail and technical design were produced Involved in the JavaScript Client side for improvising the User Interface Developed forums Developed a PHP live chat system Managed different staging and production server for system. Managed the Linux server and configure Cron Jobs Managed the Linux server (CentOS) and configured Apache, PHP and MySQL. Deployed in Linux Server. Created users and setup privileges for the servers and users. Involved in Database design and implemented in MySQL. Involved in testing the usability of the application. Involved in writing test cases. Involved in Maintenance and debugging the application. Environment: CMS, HTML 4.0, CSS 2.1, PHP, Java Script DOM, MySQL, Linux - CentOS, Apache 2.0. Education Bachelor's Skills HTML (9 years), JAVASCRIPT (9 years), MYSQL (9 years), PHP (9 years), BOOTSTRAP (8 years) Additional Information Technical Skills: Web Technologies: HTML 5, CSS 3, JavaScript, JQuery, AJAX, Web Services (SOAP, REST API's), Social Networking API's, AngularJS, Bootstrap, JSON Languages: PHP, MySQL, JavaScript, AJAX, JQuery, C. Web

Design: Macromedia Dream weaver 8, Notepad++. CMS/Frameworks: WordPress, CodeIgniter, CakePHP, Drupal 6,7 and 8, Zend, Symfony, Smarty Template Engine. Applications/ Tools: MS Office, MS Visual Studio, Blender, Photoshop, Corel Draw, Dream Weaver, Illustrator, Flash, Git. Operating System: Windows, Macintosh, Linux. Tools/Open Source Software: LAMP, WAMP, XAMPP, winSCP3, Putty, SVN, SSH, My Eclipse IDE Tools: Eclipse 3.0/3.1, Dreamweaver CS3, ZEND studio Applications/ Tools: MS Office, MS Visual Studio, Blender, Photoshop, Corel Draw, Dream Weaver, Illustrator, Flash, Git
