Front End Developer Front End Developer Front End Developer Olympia, WA Authorized to work in the US for any employer Work Experience Front End Developer Washington State Department of Social and Health Services - Lacey, WA May 2019 to Present Web Developer Ceasars Entertainment - Las Vegas, NV July 2017 to May 2019   Currently working with React, TypeScript, HTL, Bootstrap, and Less creating end user components for website creation in Adobe AEM CMS. Additional working experience utilizing Java creating component models to pull information from stored data fields.   Developed a modern user interface using CSS Grid, Flexbox, JavaScript and Adobe AEM Screens to provide patrons live up to date stats, betting odds and leaderboards.   Built new components for two major site redesign projects using TypeScript, jQuery, Less with BEM methodologies and Kotlin to handle data and render HTML with Kotlinx DSL.   Aided in migrating AEM 5.6 to AEM 6.2 which involved converting multiple components from JSP to Kotlin to render server side HTML and refactoring JavaScript files to TypeScript.   Diagnosed and remedied technical debt resolving over 700 linter errors, which helped improve build time and performance. Reducing Kotlin lint by 45% and CSS lint by 33%.   Responsible for helping create and maintain components for Caesars Entertainment's 50+ property, casino and market sites. Web Developer Freelance/Self employed - Las Vegas, NV December 2016 to July 2017   Used GatsbyJS and Styled Components to develop a site which consumed a Wunderground weather station API to display con- ditions for Willie McCool park and flying field.   Created static sites using HTML, Bootstrap, CSS, JavaScript and jQuery for a handyman and hair stylist that were hosted with Github Pages.   Migrated an outdated basketball camp site over to a modern WordPress theme. Applied custom styles with CSS and imple- mented an EventBrite API feed for ticket sales.   Built an Amazon ecommerce affiliate site and blog with WordPress. Linking a 100+ products, and installing plugins for forms and analytics to track visits and sales.   Installed a WordPress theme for a mobile car detailer and adjusted styles base off of clients requests using CSS.
