ORACLE DATABASE ADMINISTRATOR ORACLE DATABASE ADMINISTRATOR ORACLE DATABASE ADMINISTRATOR - AFLAC HEALTH INSURANCE Dallas, TX Work Experience ORACLE DATABASE ADMINISTRATOR AFLAC HEALTH INSURANCE - Sanger, TX November 2015 to Present   Worked with other team members to upgrade/migrate oracle 11gR2 database to Oracle 12c on Oracle Enterprise Linux 6 and 7.   Supporting multiple databases for production, development, test and staging purposes on Linux and Windows environments.   Applying upgrade patch, maintenance and interim (opatch) patches on all the databases.   Refreshing Dev and Test instances with data from Production on a regular basis   Manage and maintain oracle database instances running on AWS cloud, Ec2, RDS, S3   Developed PL/SQL packages, DML, DDL, Oracle tables, Stored Procedures, functions, cursors, and triggers.   Performed Zero Downtime Database Data Center Migration using Golden Gate and Data Guard.   Installed and configured OEM cloud control 12c for monitoring oracle database prod and preprod environments   Implemented Oracle ASM 12c software installation and configuration (Grid Infrastructure) and partitioning Disks in Linux.   Worked on ASM redundancy, Managing ASM disk failures & replace failed ASM disk   Installed and configured Oracle 11g database on a test server using Oracle standard procedures and OFA, for performance testing and future 10g production implementation.   Implemented and managed optimum physical database design (table spaces, data files, extents, redo logs, archive logs) and assessed database capacity by monitoring online storage, growth and file system space, in adherence to the Optimal Flex Architecture   Provided instance level performance monitoring and tuning for Event Waits, Sessions, Physical and Logical IO and Memory Usage.   Experience in RMAN recovery testing, RAC and standalone database   Recovered huge Database (1 Terabyte) when UNDO table space got corrupted in Real Application Cluster (RAC)   Experience in setting up Oracle ASM storage for Oracle RAC databases.   Created a Clone Database using RMAN on remote Server and used SRVCTL commands for Real Application Cluster (RAC) Databases Implemented Data Guard with high availability and performance configurations and participated in Data Guard Fail over tests.   SQL Server Agent jobs Backups / RMAN point in time recovery and Instance recovery done on 11g and 12c.   Developed compliance reports and performed auditing at

higher levels.   Scheduling repetitive activities like gathering schema statistics, exports, table space usage report using crontab and batch shell scripting   Implemented Oracle ASM 12c software installation and configuration (Grid Infrastructure) and partitioning Disks in Linux.   Implemented Oracle 12c Multi-tenant RAC data base with 2 node cluster and instances using ASM storage. Troubleshooting of various database performances by proper diagnosis at all levels like SQL, PL/SQL, database design, database tables, indexes, Instance, memory, operating system Creation, Configuration and Setting up of RMAN Catalog databases and registering target Databases with the Catalog.   Worked closely with the Oracle developers for the better performance in Applications in writing the Packages, Triggers and Indexes on the tables   Worked extensively on Performance tuning of Queries by maintaining Aggregates, Compression, partition, indexing and use of Hints, Stored outlines, Statistics   SQL tuning and Database performance tuning has been done based on reports generated by SQL Trace, TKPROF, STATSPACK, Explain Plan, AWR, ADDM and monitor the database performance on daily basis. ORACLE DATABASE ADMINISTRATOR INTEGRATED TELECOM SOLUTIONS - Dallas, TX October 2013 to October 2015   Lead successful project implementation like, Data Migration, Upgrade/patching projects, Data Guard setup   Information Technology- Data transmission, data retrieval, data manipulation, data processing and data storage   Used information management system for data processing, data storage and data transmission and migration with Golden Gate   Applied Bug fixes patches and Quarterly Security Patches for the stand-alone databases and 2-node RAC databases with in the maintenance window.   Installed RAC/GRID Infrastructure on Oracle 11g, 12c, and worked on ASM feature of Oracle on HP-UNIX/LINUX. Worked on the ACFS file system and scheduled backup using RMAN on ACFS file system sharing between the nodes   Maintained a 2-node RAC environment on LINUX AS 5.0(RHEL) for the staging purpose to support the business requirements and provide High Availability in Oracle and SQL Server databases.   Upgraded DEV/QA/performance databases from 11.2.0.3 to 12.1.0.2   Responsible for Database Backup and Recovery, daily monitoring of database & network issues   Deployed OEM 12C to monitor and manage all the databases on clients and batch shell scripting   Extensive Performance Tuning, Memory (SGA) Tuning, Net

backup, EMC (Time finder and SRDF), RAID, RAW Devices.   Provided instance level performance monitoring and tuning for Event Waits, Sessions, Physical and Logical IO and Memory Usage.   Upgraded Grid Infrastructure and Databases from 11.2.0.2 to 11.2.0.3 by creating a new home of 11.2.0.3 and relinking the binaries.   Working with Oracle Support to fix the production issues and also to get the merge patches   Administering the databases using Grid Control including but not limited to Space Management, Performance Tuning, and Workload Analysis (AWR, ADDM)   Providing application support to create database objects and apply database changes   Planned and implemented high availability solutions such as Real Application Cluster (RAC) in Oracle 11gR2 Grid.   Data loads using SQL*Loader and refresh the test environments using Data Pump export/import Education A.A.S in Database Administration in Database Administration North Central Texas College Certificate in Database Administration University of Buea Skills Database (6 years), Database design (3 years), Db2, Microsoft sql server (3 years), Microsoft sql server 2012 (3 years), Sql server (5 years), Sql server 2012 (3 years), Mysql (1 year), Oracle (6 years), Oracle 10g, Oracle tools, Sql, Linux (5 years), Solaris, Unix (4 years), Rman (4 years), Php (2 years), Visio (2 years), Ec2, Nosql, DBA, Oracle Dba (6 years), RAC (5 years), Sql Dba Additional Information CORE COMPETENCIES   Oracle/SQL Server DBA Support   Database Design & Maintenance   Team Building & Mentor/Leadership   12c multitenant Architecture   Windows & Linux systems Performance Tuning   Installation and Troubleshooting   Solution Integrations   Aws management   Post-Production Support   Linux & windows OS Support   Deployment & RMAN   Technical Support   System Migrations& Upgrades   TECHNOLOGICAL SKILLS   Oracle Database Admin (10g, 11g, 12c)   SQL Server Admin (2012, 14, 16, 17)   Performance tuning & up-to-date expertise   DATAGUARD 10g, 11g, 12c   Oracle RMAN 10g, 11g, 12c   Oracle RAC on Solaris, and Linux OEM (11g, 12c)   Golden Gate   High Availability (RAC) & ASM Admin / Installation   SQL Server, MySQL, DB2, NoSQL,   Data Security, Backup & Recovery / Failover   Unix Versions: Solaris, RedHat/Oracle Linux, HP Unix, PHP   Linux OS & RedHat enterprise Linux, Oracle Linux 5, 6 and 7   Windows OS, Oracle iLearning, Visio, and Packet Tracer   ISDLC processes, ISD   AWS, EC2, RDS, S3   ADDITIONAL SKILLS Oracle Real Application Clusters (RAC), Data Guard and VMware

Technologies, VM box, Automatic Storage Management (ASM), Oracle Enterprise manager cloud control 12c   ORACLE TOOLS Oracle Tools: Data Pump, Export/ Import, Oracle Universal Installer, Database Configuration Assistant, Database Upgrade Assistant, SQL*Plus, Apex and SQL*Plus, Oracle cloud Control 12c (OEM), Microsoft SQL Server 2012 / 2008 R2 / 2008 / 2005, Oracle 10g R1&2,11gR1&2and 12c
