Team Manager, Consultant, Software Developer Team Manager, Consultant, Software Developer Team Manager, Consultant, Software Developer Englewood, CO Work Experience Team Manager, Consultant, Software Developer FAST Enterprises LLC October 2016 to January 2019 As a team we designed and improved the Arkansas Integrated Revenue System, which is responsible for collecting, processing, and verifying all tax information in the state of Arkansas. Started as a software developer and then was promoted to manage a team of three developers in December of 2017. Assign tasks and monitor progress of team projects. Diagnose system problems, devising and implementing solutions using a combination of Microsoft SQL Server and Visual Basic .NET. File daily reports on the progress of projects for upper management and state representatives. First point of contact for developers in my team when they need guidance on how to approach or complete a solution to a problem. Conduct reviews of other developer's solutions to ensure the best product is put forward to our clients. Run meetings with non-technical Arkansas State representatives in order to discuss upcoming changes and gather state requirements. Work closely with state representatives on a daily basis to determine problems and to conduct state testing. Preform formal demonstrations of new system functionality to non-technical state staff Education Bachelor's in Mechanical Engineering, ABET Accredited Oregon State University - Corvallis, OR September 2012 to June 2016 Skills Solidworks, SQL, Visual basic .NET, Project Management, CAD, Microsoft Office, Python, Matlab, Labview, Engineer, FEA, Composite Materials, Mechanical Design, Autodesk, CSS Certifications/Licenses Engineer In Training (EIT) I passed the fundamentals of engineering exam in July 2016.
