Database Developer Database Developer Silver Spring, MD I have 10 years experience in the IT Industry. I have strong background in several Business Intelligence Application. I am Oracle Business Intelligence Developer and Database Developer with expertise in Presentation Services and building Repository. Strong engineering professional with a Bachelor's degree focused in Information Technology from University of Maryland University College. Specialties/Expertise * Oracle OBIEE Developer * Application Design, Implementation, and Integration with VA * Oracle Database Developer Active Clearance(s) (List All) * Investigation: Open Investigation - SF85P, 2016 10 16, OPM * Agency: VA * Eligibility: Public Trust Authorized to work in the US for any employer Work Experience Database Developer Favor TechConsulting, LLC - Vienna, VA 2016 to Present OBIEE Developer / Database Developer Veterans Administration (VA) Veterans Health Administration (VHA) 2016 to Present Enterprise Reporting and Analytical Support, (2016 - Present)

Worked on building with OBIEE Repository at 3 layers i.e., Physical Layer, Business Model and mapping Layer and Presentation Layer. Create/Modify Metadata repository (rpd) as per the data requirements by using Oracle BI Analytics Server Admin tool. Worked with Business Groups to identify, analyze, and document Business Requirements. Created Business Facts, Dimensions and defined Logical relation between them at the Business model and mapping layer. Worked on setting up Dimensional Hierarchy. Extensively worked on IBots using OBIEE Delivers to create alerts based on results. Identified and created aggregate tables to improve query performance. Created Aggregate level and level based measures. Created Web-groups for security purpose with access privileges. Created Dashboards & Answers. Created Time Series Measures Year ago, Month Ago, Year-to-date measures using AGO and To Date functions. Involved in setting up Ibots to run reports at scheduled time for Cache Seeding to Improve Query Performance using Caching. Created dimensions in the Business model & Mapping layer. Assigned Data level & UI level security to the Users. Managed security privileges for each subject area and dashboard according to user requirements. Customized Reports look and Feel using Column Formatting, Conditional formatting. Customized Dashboard reports using drill-down capabilities. Worked on cache purging strategy using event-polling table cache purging technique. Created filters using

repository variables, Presentation variables.   Also created saved filters that can be reused by multiple reports.   Migrated Analytics RPD and Web catalog from one environment to another. Designed and Developed Custom Mappings and Workflows in Informatics to bring the data from other data   source systems and Integrated using Universal Adapters in DAC.   Monitored Incremental and Full load of Data through Data Warehouse Administration Console (DAC) and Informatics Workflow Monitor.   Involved in Integrating Oracle BI Presentation Services with BI Publisher. OBIEE Developer XO Communication - Baltimore, MD 2011 to 2016 OBIEE Developer XO Communication 2011 to 2016   Worked on building reports in answers and placing them in dashboards and formatting changes as per requirements.   Implemented RPD for Project Accounting and created the reports and worked on RPD Model Changes for different requirements.

 Modified some of the existing reports and related dashboards, and fixed the issues related to reports, performance, during production support.   Worked on LDAP implementation and External table authentication.   Worked on merging Repositories and catalogs.   Worked on setting usage tracking in OBIEE.   Worked on creation of repository variables and session variables.   Worked with the Security settings in OBIEE Admin Tool to set up users, groups, access privileges. Managed security privileges for each subject area and dashboards according to user requirements.

 Designed and developed interactive navigational drill down reports in OBIEE Answers, requests and Intelligence   Dashboards using various reporting features and functionalities such as formulas, filters, charts, pivot tables.   Created connection pools, physical tables, defined joins in the physical layer of the repository.   Used the Catalog manager and maintained the Analytics web catalog to manage Dashboards, Answers and Delivers.   Configured Agents to deliver analytics content based on schedule to obtain weekly reports and sent notification Alerts.   Worked on Informatics (ETL Mapping changes).   Worked on ETL Monitoring. Sr. OBIEE Developer and Administrator TIAA - Baltimore, MD 2010 to 2011   Worked with Business Groups to identify, analyze, and document Business Requirements.   Migrated and merged OBIEE Repository and Catalogs.   Server Space management as per the need provided extended production support based on the demand and complexity of the issue.   Implemented Over all security, SSO, OBIEE content and Data level

security.   Create/Manage Repository/Web Users and Groups and assigning permissions using Enterprise Manager and Console.   Experience in Preparing Design Specification documents based on functional requirements and also involved the preparation of Technical Design Documents.   Worked in End to End construction of the BI model from repository to reports development.   Worked with OBIEE Answers, Intelligence Dashboards in OBIEE 11g.   Demonstrated knowledge in dealing with various functionalities like prompts, views, aggregates, global filters, guided navigation, customization, conditional formatting of reports to satisfy the end users.   Designed and developed physical, logical and presentation layers of the repository with new data model changes.   Developed dimensional hierarchies to facilitate the drill down and report navigation.   Configured Bi Scheduler and created Ibots to schedule and deliver Analytics content to multiple delivery destinations and also a Cache Seeding mechanism.   Enabled Usage Tracking to monitor the usage and performance of reports.   Implemented MUDE (Multi User Development Environment) in OBIEE.   Created new Repository Variables, Session variables and Initialization blocks to configure security, data access and authorization on Repository and Catalog objects.   Created Answers reports using various analytics views like Table, Pivot tables, Charts, Column Selectors, View Selectors, Narrative, Static text etc.   Was responsible for performance improvement of the reports by using various strategies in both the database and OBIEE like Indexes, Hints in Physical Layer, Materialized views and Caching.   Experienced in working with BI (XML) Publisher, Data Templates, RTF, and XSL Templates and provided the capability to download the reports in the user defined formats.   Experience in designing Mini Schemas/Data Models/Data Marts for Legacy Systems in Oracle and develop Reports out of OBIEE answers, dashboards as per business requirement.   Responsible for project documentation (documenting functional, technical documents, preparing test cases/test plans and KT plans). Education Bachelors of Technology in Information Technology University of Maryland University College Skills Database, Mysql, Sql, Sybase, Html Certifications/Licenses Driver's License
