Full Stack Java Developer Intern Full Stack Java Developer Intern Boston, MA Authorized to work in the US for any employer Work Experience Full Stack Java Developer Intern University of Massachusetts, Boston January 2016 to Present Assist Professor Cheung, head of the Software Engineering Research Lab (SERL), with maintaining the Online Application for Tutoring Services (OATS) for UMB.   I help troubleshoot any issues that the administrators may encounter during the school semesters.   OATS consists of SQL, Java, and HTML/CSS.   I improve upon the queries by adding more cases to include more information that help the administrators analyze the data about tutor-student interactions.   I mainly improve analysis reports to aid the administrators with their end of the semester analysis of the tutoring system.   I also perform in-depth test-casing to make sure that the website is running smoothly. Education Master's Skills MySQL
