Senior Mobile Developer Senior Mobile Developer Senior Mobile Developer - Toyota Connected, Inc Senior Mobile Developer with over four years experience. Currently, I am working on the UIUX team at ToyotaConnected.  I work closely with designers, product owners, developers, and clients to bring products to everyday consumers and how  they utilize their vehicles. I head the localized development of iOS and WatchOS applications by collaborating with  designers and gaining user feedback to create a different experience for our regional consumers. Recently, I have taken  the role of mentoring other developers within the company in order to maintain a unified approach to a Toyota branded  application.   My goal as a developer is to create amazing applications that will provide an experience that will make one's everyday life  better.
