Involved in the preparation of POM framework design.   Writing and executing Test scripts using Web Driver.   Manual test case design/review and execution/ Defect management   Experience with databases like MySQL   Project demos, knowledge transfer and presentation Environment: Windows XP, Java, SQL Server 2012, Selenium webdriver2.56, Eclipse neon, Assembla, Excel, SAP, Google Double Click QA Consultant AMK Technology March

2012 to January 2013 Vertica Database Administrator role AMK Technology - MY March 2012 to January 2013 Malaysia Mar 2012 - Jan 2013 HP Astro EDW EDW gets data feed from Amdocs snapshot database in Oracle structure. The snapshot database contains 3 Amdocs sources: Billing (ABP), CRM and Order (OMS). Apart from these sources there are feeds are provided in flat file and CSVs on ad-hoc and schedule basis. Most of the EDW jobs have target as Vertica database table. Understanding the EDW system from HLD, LLD docs   Vertica Database Administrator role Maintaining Vertica user and production server.   Estimation and Test Plan design.   Development and production data sync.   Uploading and executing test cases.   Defeat reporting and retesting Environment: Windows XP, Java, Vertica, HP QC, Excel Sr.QA Associate Sapient June 2011 to March 2012 Associate QA L2 Sapient Corporation Pvt Ltd June 2011 to March 2012 Markit ERD is the data source for Equity Reference Data in MIMS. MIMS holds copies of data from the ERD database. Changed or new reference data is pushed from ERD to MIMS at regular intervals. Markit BA requests for new reference data to be added through In Data. The request is an XML file referred to as "List of Interest". The ERD warehouse system picks up this file and processes the request by updating MIMS' copy of ERD, if required data is already available. If the data is unavailable, it sends an email notification to the ERD operations team, who then runs a stored procedure to manually add the required reference data to the ERD warehouse. This data is then replicated into MIMS' copy of reference data. ERD team also manages corporate actions data that it receives from external systems through a third party application called XSP.   Understanding the ERD-MIMS system from the required docs and HLD, LLD docs.   Manual execution of the flow of the ERD - MIMS system.   Updating the enhancement by adding the scenario and test cases into QC.   Uploading and executing test cases into/from QC for VM6 environment. Environment: Windows XP, SQL Server 2008, QC, Excel, QA Associate Headstrong India Pvt. Ltd June 2010 to June 2011 Sr. Associate HeadStrong June 2010 to June 2011 eDelivery Enrollments & Notifications CientServ, 3D eDelivery Enrollment project on Client-server and 3D will be enhanced to allow enrollment of new document types for eDelivery. The email address provided by the client to sign-up for an online username to Client-server will be used to deliver the electronic notifications for the

supported document types. In addition to current eDeliverable document types, Tax Documents (all current 1099 Forms and 1099 Corrections), and General Correspondence will be supported. Release estimation and Planning   Study requirement document, test plan, test case book etc. Conducted System Testing, Functional Testing, Sanity Testing and Regression Testing   Test case writing and Test Case execution..   Report bugs against the test cases and took bugs to closure after verifying.   Report defect and Test result   Knowledge transfer/help peers from onsite team in developing understanding of business requirements.   Onsite calls handling.   Environment: Windows XP, Java, SQL Server 2005, QC Software Test Engineer Global Logic August 2008 to June 2010 Associate QA L2 Global Logic, India Pvt. Ltd August 2008 to June 2010 Mamasource Mamasource is the free, local online Mother's community. Mamasource provides a safe and easy way for moms of all ages to connect with other moms in their local areas.
