Technical Lead/Oracle DBA Technical Lead/Oracle DBA Technical Lead/Oracle DBA - Vonage

Fairfax, VA   Strong Oracle and MySQL Database Administration skills on Linux and Windows

Operating systems   Strong technical background and solutions oriented. Also possess solid

leadership, interpersonal and communication skills   Possess strong skills and experience with

patching and upgrading databases, performance tuning, PL/SQL skills, Oracle Data Pump (Export /

Import, SQL*Loader) for bulk uploads and export / import jobs   Strong Experience with DataGuard

(Disaster Recovery), High Availability solutions, Real Application Clusters (RAC), backup and

recovery (RMAN and flashback)   Effective working knowledge and experience with AWS and

Cloud Solutions   Solid Experience with Agile Methodology. Organized and facilitated Agile / Scrum

meetings, which includes Sprint Planning, Daily scrums, Sprint Review and Retrospectives

Successfully delivered cloud solutions with innovation and excellence   Successfully provide

Subject Matter Expertise, Technical guidance and documentation to client and team members

Effectively configured, setup and deployed Oracle Network Environment / Tools   Successfully

administering user accounts (Creating, Establishing and Managing Users, Roles, Privileges and

Profiles) for database users   Possess effective skills to monitor databases and server resources to

maintain peak performance and pre-empt potential issues   Self-motivated, results driven and

reliable team player with strong problem solving skills Authorized to work in the US for any employer

Work Experience Technical Lead/Oracle DBA Vonage January 2015 to Present   Effectively perform

Database Administration duties (performance tuning, backup and recovery, Disaster recovery /

DataGuard, Database Migration, Patches and Upgrades) for Oracle databases   Provide technical

guidance and subject matter expertise on our Cloud Infrastructure, successfully lead the integration

of new applications and migrating databases into cloud environment   Assume responsibility for

performance monitoring, health assessments and threat detection for Web hosting cloud

environment.   Work together with developers, PMS, Operations team to maintain high level of

excellence and performance   Participate in scrums, code releases, release management and

development cycles necessary for the upkeep of the site   Provide the most efficient and cost

effective solutions for Web Hosting. Leading initiative to fully transition from licensed software

applications to open source technologies and solution   Train team members, conduct and participate in knowledge sharing sessions   Patched databases by applying quarterly CPUs   Effectively migrated and cloned databases using imp / exp utility, RMAN backups and DataGuard

Database Administrator American Institute for Research June 2013 to December 2014   Effectively performed database backup, restore and recovery using RMAN   Effectively setup and maintains standby database via Data Guard / Disaster recovery   Ensured database availability and optimal performance   Resolved issues using ServiceNow ticketing system   Patched databases by applying quarterly CPUs   Effectively administered user accounts assigned appropriate privileges   Successfully deployed Real application clusters (RAC) on ASM Storage   Ensured database is tuned for optimal performance running Automatic Workload Repository (AWR), Explain plans, Automatic Database Diagnostic Management (ADDR) and SQL Optimizer   Setup and configures database for network connectivity   Effectively restoring development and test databases with production backup   Used Export / Import tools for importing and exporting schemas, tables, tablespaces and databases   Effectively migrated and cloned databases using imp / exp utility, RMAN backups and DataGuard   Effectively resolved problems relating to data inserts and available space   Effectively documented Database related issues, upgrades and changes   Delivering accurate and timely logging of issues and resolution in ticketing system (Contactual 8x8)

Database Administrator USDA July 2011 to May 2013   Managed user accounts and assigned appropriate privileges   Performed Database duplication with RMAN   Installed, configured Oracle Database Software   Performed Database Backup, restore and recovery using RMAN   Upgraded the database and applied quarterly patches   Tuning database for optimal performance using AWR, ADDR and Advisors.   Diagnosing and resolving issues associated with the Database   Setup and configured database network connectivity   Schedules backups with Enterprise Manager.   Monitored alert log and trace log files daily for potential problem identification and resolution   Documented all important database related topics, issues, resolution and changes   Participated in seminars, workshops and continuous learning events   Facilitates and takes initiative on acquisition of Authority to Operate (ATO) from government agency   Ensure adherence to Agile methodologies

and guidance, Ensures adherence to government standards and regulations (FISMA, FIPS 140-2, FedRAMP)   Validate functional specifications provided by the Office of Head Start (OHS) and Drives the architecture and design of the Web Hosting solution. Ensures compliance with industry best practices and government mandates IT Specialist NTConnections April 2010 to July 2011 Troubleshoot incidents related to Windows OS and network connectivity issues   Responsible for image deployment on new user workstations   Ensured PCs are compliant with latest Windows OS patches   Set up user workstations, printers and peripheral Installations   Create, manage, reset and edit user accounts   Effectively resolved user problems with hardware, software, and network related issues   Setting up and configuring desktop workstations, phones, laptops and peripheral Installations   Installing software and ensuring computers are compliant with OS patches Performing Asset Management (PCs, Laptops, Phones) using BMC Remedy   Granting badge access to Employees   Setting up user VPN access on Laptops Education M.Sc Computer Science George Mason University - Fairfax, VA 2006 B.Sc Computer Science Babcock University Skills Data migration, Database, Mysql, Oracle, Sql, Rman, Linux, Red hat, Ios, Jira, Ms office, Performance tuning, Excel, Outlook, Powerpoint, Word, Loader, Sql Dba, Oracle Dba, Sql Server, DBA Additional Information SKILLS / TOOLS Oracle 12c v.2, Oracle 11gR2, Agile Methodology, MySQL, Data Guard, SQL*Loader, Data Migration (Export and Import / Expdp, Impdp), Flashback Database, RMAN Backup and Recovery, Performance Tuning, AWR, ADDM, NETCA, NETMGR, DBCA, DBUA   OTHER TOOLS / OPERATING SYSTEMS   Linux(Oracle, Red Hat), Windows(7/8/10), iOS, Jira, Slack, Google Hangouts, Confluence, WinSCP, MS Office (Excel, Word, PowerPoint, Outlook, Project, Access)
