Software Developer Software Developer Software Developer - Great America Financial Chicago, IL Authorized to work in the US for any employer Work Experience Software Developer Great America Financial - Chicago, IL March 2018 to Present Responsible for developing and maintaining the web/windows applications used within the organization for migrating from a legacy platform to an established environment. Key Achievements: * Worked on Visual Studio 2017/ Dot Net Framework to implement Business Logic. * Provide ongoing development and maintenance of existing functionality, as well as designing new solutions. * Designing the modules - Fetching the data from Enterprise Architecture and, display in adaptive and responsive widgets/dashboards using ASP.NET, HTML5, CSS3, JavaScript and jQuery. * Developed Custom Directives using Angular2 and Implemented Routing, imperative Routing and Guards with the help of React.JS and Angular2 Router Module. * Developed ADO.NET Entity Framework to use relational data with a data service by defining a data model that maps to relational data. Used JQuery for web interface development with good looking web application. * Implemented Microsoft Unity Dependency injection using SOLID Principles in all parts of the code * Worked with User Controls with C#.NET code-behind files, debugging and Quality Testing of the code. * Extensively used Collections, LINQ, Lambda expressions with entity framework. * Extensively worked with Events, Delegates, Anonymous Methods, Indexers, Generics, Async, Task, and Multithreading. * Created and utilized Web API methods for database operations (CURD) through Entity Framework. * Extensively worked with WPF application using MVVM and React.Js pattern as well as ASP.NET using HTML5 and CSS3. * Created client side RDLC reports using Microsoft reporting Technology. * Created stored procedures for updating and retrieving data from SQL server * Used SSIS for data transformation from Excel data base to SQL Server 2014 and SSRS for reporting. * Coordinate with the QA Team for Unit Testing and Integration Testing of different modules. Environment:ASP.NET, C#, Web forms, Web API, Ado.net, HTML5, CSS, jQuery, JavaScript , Data tables, SQL Server 2012, SSRS Reports, GIT. .Net Developer TSYS - Tempe, AZ January 2016 to February 2018 Key Achievements: * Application design Using Scrum (Agile) Model for N-tier architecture. * Developed application using ASP.NET MVC 5 to enable the full control over the rendered HTML5 and JQuery

for client-side scripting. * Building Strongly Typed applications with the React and Angular2 and ASP.NET MVC. * Implemented OAuth authentication using Azure Active Directory. * Developed library using SignalR for implementing real-time updates. * Implemented client-side validations using JQuery/Java script and ASP.NET MVC 5 Data annotations to do validations on the Model Data. * Develop and Consume Windows Communication Foundation Services (WCF) which interfaces with Windows Active Directory and SQL Server. Designing of WCF based Service, Data, Fault and Message Contracts * Worked on creating Custom Azure Templates for quick deployments and advanced PowerShell scripting. * Worked with User Controls with C#.NET code-behind files, debugging and Quality Testing of the code. * Designed and developed Web forms and Win forms using C#.Net * Implemented MVVM (Model View Model) pattern to create Silver light user controls. * Used Kendo controls for web pages. Used JavaScript to enhance the dynamics & interactive features of web page by allowing user to perform calculations, validate form inputs, and add special effects and Customize selections. * Used Angular and React.JS as the development framework to build a single-page application. * Write automation test cases for regression suite using Selenium. * Worked on Angular to simplify both development and testing of such applications by providing a framework for client-side MVC architecture. Environment: Visual Studio 2015, .NET Framework 4.5, C#, Ajax, JSON, Angular, Bootstrap, React JS, Kendo, HTML5, Unity framework, WCF, LINQ, SQL Server 2008R2, SSIS, SSRS, IIS, Visual Studio Test frame work, Team foundation Server. Dot Net Developer Intelenet Global Services - Hyderabad, Telangana May 2014 to January 2016 JR. DOTNET DEVELOPER SAKSOFT - Hyderabad, Telangana June 2011 to April 2014 In this project, we developed an application that helps the client to provide the new proposals and manage the products along with their transactions. This will help the employee and client to organize the things more professional way. Key Achievements: * Involved in designing and coding for web forms of the application with ASP.NET * Worked with ADO.NET to interact with the SQL database (i.e. retrieving, updating and inserting data into the tables) for Alerts. * Involved in all the phases of SDLC including Requirements collection, Design and Analysis of the customer specifications, Development and Customization of the application. *

Developed presentation layer using server-controls, HTML controls and user and custom controls. * Used AJAX to trade data with a web server, without reloading the page. * Created Database and Database Objects like Tables, Stored Procedures and Views, Triggers, Rules, Defaults and functions. * Responsible for design and development of Web Forms using VB.Net * Developed, enhanced and maintained multi-tier ASP.NET and ASP web applications Systems * Developed the web pages using Visual Studio, HTML, and CSS for styling the Web pages. * Used Data Grid control to display and edit data and for data paging and sorting. * Implemented Form Authentication to authenticate the users. * Created event driven Web Forms using ASP.NET and implemented form validation. * Used ADO.NET objects such as Data Adapter, Data Reader and Data Set for consistent data access. * Created classes and methods in VB.NET using OOP Concepts.

Environment: ASP.NET, C#.NET, VB.NET, CSS, SQL Server 2008, ADO.NET, Visual studio 2008, HTML, CSS, JavaScript and AJAX. Education Bachelor's Skills .net, Ms visual studio, Ms visual studio .net, Ms visual studio .net 2012, Visual studio, Visual studio .net, Visual studio .net 2012, C#, C++, Design patterns, Git, Html, Javascript, Bootstrap, Typescript, Json, .net core, Wcf, Object oriented, Object oriented programming
