.NET Developer .NET Developer NET Developer - National Flood Services Oak Grove, MO To gain employment with a company that provides a challenging working environment leveraging my current experience while developing my skill set in emerging technology. Work Experience .NET Developer National Flood Services January 2019 to Present General   Part of a team responsible for maintaining and updating in house developed web and windows software   Maintain current pages and fix any bugs found by users   Design/Develop new sections as needed   Tools: Visual Studio 2015, Visual Studio 6, NET Framework 2.0, 3.0, 3.5, 4.0, 4.5, JavaScript, VBScript, TFS, Subversion.   Agile, Scrum Principle Engineer Savannah River Nuclear Solutions March 2018 to December 2018 General   Part of a team responsible for upgrading a Access 2010 application to a Web Application   Team Foundation Server Setup for project   User testing and support documentation   Software and Web deployment   Mentor Junior Developers   Tools: Visual Studio 2017, C#, MVC 5, Entity Framework 6.0, Team Foundation Server 2017, HTML, JavaScript, CSS, jQuery, Linq, Agile, Scrum   ComTec Information Systems Senior .NET Developer Golftown.com September 2017 to March 2018 General   Part of a team responsible for all development on the Golftown.com website utilizing the .NET platforms   Design/Develop all aspects of the Golftown.com website   User testing and support documentation   Web deployment   Website production support   Mentor and train new team members   Tools: ASP.NET 2005-2010, C# 2008, 2010, NET Framework 2.0, 3.0, 3.5, 4.0, Able Commerce 7.0, SQL Server 2005-2008 R2, JavaScript, VBScript, Classic ASP, Ajax, CSS, Subversion Responsibilities: Maintain current pages and fix any bugs found by users   Design/Develop new sections as needed   Develop applications using object oriented techniques   User testing   Software releases   Software documentation Senior .NET Developer on the Golftown.com website Golfsmith International March 2015 to September 2017 General   Part of a team responsible for all development on the Golftown.com website utilizing the .NET platforms   Design/Develop all aspects of the Golftown.com website   User testing and support documentation   Web deployment   Website production support   Mentor and train new team members   Tools: ASP.NET 2005-2010, C# 2008, 2010, NET Framework 2.0, 3.0, 3.5, 4.0, Able Commerce 7.0, SQL Server 2005-2008 R2, JavaScript, VBScript, Classic ASP, Ajax, CSS,

Subversion Responsibilities: Maintain current pages and fix any bugs found by users Design/Develop new sections as needed Develop applications using object oriented techniques User testing Software releases Software documentation Software Developer Durcon Corporation October 2013 to March 2015 General Part of a team responsible for all Internet and Windows Development utilizing the .NET platforms Design/Develop all aspects of any application for Internet and Windows User testing and support documentation Software and Web deployment Software, Web and 3 tier application support Report Scheduler Service - The purpose of this project was to automate reports and email notifications sent to external Customers and internal Customer Service representatives. All Websites - The purpose of these projects were to provide payment ability and in house support to customers and internal staff necessary for day to day business operations. E-Project Manager Casting Application Fabrication Process Application Develop applications using object oriented techniques User testing Tools: ASP.NET 2008-2012, C# 2008, 2010, 2012, NET Framework 2.0, 3.0, 3.5, 4.0, 4.5, SQL Server 2005-2008 R2 and Reporting Services, JavaScript, VBScript, MVC, CSS, jQuery, Linq, Entity Framework 5.0 - 6.0, Subversion Responsibilities: Maintain current pages and fix any bugs found by users Design/Develop new sections and sites as needed Develop applications using object oriented techniques User testing Software Developer Experis March 2013 to October 2013 General Part of a team responsible for internal systems for validating, analyzing, and apply customer Ghost and WIM images to the ordered systems coming out of the factory through the Quick Web processes. Contribute to Design/Development of all aspects of web site and backend processes User testing and support documentation Software and Web deployment Tools: Classic ASP, ASP.NET 2005-2012, C# 2005- 2012, NET Framework 2.0, 3.0, 3.5, 4.0, SQL Server 2008, JavaScript, VBScript, Ajax, CSS, XSLT Senior Software Developer Gila Corporation January 2011 to February 2013 General Part of a team responsible for all Internet and Windows Development utilizing the .NET platforms Design/Develop all aspects of any application for Internet and Windows User testing and support documentation Software and Web deployment Software, Web and 3 tier application support All Websites - The purpose of these projects were to provide payment ability

and in house support to customers and internal staff necessary for day to day business operations.

Tools: ASP.NET 2005-2010, C# 2005, 2008, 2010, NET Framework 2.0, 3.0, 3.5, 4.0, SQL Server 2005-2008 and Reporting Services, JavaScript, VBScript, Source Safe Responsibilities: Maintain current pages and fix any bugs found by users Design/Develop new sections and sites as needed Develop applications using object oriented techniques User testing Software releases Software documentation Filetransfer Console - The purpose of this project was move any file, whether a client file or internal file to any server for additional processing, PGP Encryption and Zip Compression. Tools: C# 2008, NET Framework 3.5, SQL Server 2005 and Reporting Services Responsibilities: Maintain, add or remove current definitions Design/Develop new sections as needed Develop application using object oriented techniques User testing Software releases Software documentation FTPTransfer - The purpose of this project was to FTP any file to or from and FTP site. Special versions were developed for certain client due to special circumstances such as FTP over TLS or application running on a special schedule. Tools: C# 2008, 2010, NET Framework 3.5, SQL Server 2005 and Reporting Services Responsibilities: Maintain, add or remove current definitions Design/Develop new sections as needed Develop application using object oriented techniques User testing Software releases Software documentation Gila PGP Plus - The purpose of this project was to encrypt or decrypt incoming and outgoing client files with PGP or GPG. Tools: C# 2008, 2010, NET Framework 3.5, SQL Server 2005 and Reporting Services Responsibilities: Maintain, add or remove, current definitions Design/Develop new sections as needed Develop application using object oriented techniques User testing Software releases Software documentation Application Analyst and Developer Great American Financial Resources, Supplemental Benefits Group January 2008 to January 2011 General Part of a 5 person team for all Internet and Windows Development Design/Develop UI for Internet and Windows applications User testing and support documentation 3 tier application support Software deployment Wrote necessary programs in Informix to convert the Kansas City claims history to text files to be imported into the Austin LifePro Policy Management System. Help convert Kansas City Websites to the AgentView website by providing information and specifications to mimic

functionality.   Help convert the Kansas City proposal software to the new EZQuote proposal software by providing information and specifications to mimic functionality.   AgentView Agent Support Website - The purpose of this project was to provide external sales agents the tools necessary to record and track the sales of our products and provide a site to provide any items of support necessary such as Medicare Supplement Applications.   Tools: ASP.NET 2005-2008, C#, VB.NET, NET Framework 2.0, 3.0, 3.5, SQL Server 2005 and Reporting Services,   JavaScript, VBScript, Team Foundation Server, Source Safe Responsibilities: Maintain current pages and fix any bugs found by users   Design/Develop new sections as needed   Develop application using object oriented techniques   User testing   Software releases   Phone Verification Workflow - The purpose of this project was to provide the Underwriting Department and quick way to conduct a phone interview with a potential customer and store the data to display in a report later as well as commit an image of the report created into the OnBase imaging system.   Tools: VB.Net, .Net Framework 2.0, SQL Server 2005 Responsibilities: Help design/develop supporting database   Help design/develop UI and application   Design/Develop new sections as needed   User testing and support documentation   Fix any bugs found by users   Software releases   Rapid Entry New Business Application - The purpose of this project was to provide the New Business Department and quick way to enter information from customer application into an interface that will be input into the LifePro Policy Management   System.   Tools: VB.Net, .Net Framework 2.0, SQL Server   Responsibilities: Help design/develop supporting database   Help design/develop UI and application   Design/Develop User Controls for reusability   Design/Develop new sections as needed   User testing and support documentation   Fix any bugs found by users   Software releases Programmer/Analyst Ceres Group November 2000 to January 2008 General   Lead Programmer for all Internet Development   Lead Programmer for Informix Medicare Claims Processing System   Lead Programmer for Insurance Illustration Software   Design/Develop Database Schemas in Informix and SQL Server   Design/Develop DTS Packages for data consumption   Develop SQL Jobs to support WebView   Develop Email Notification System to replace SQLMail   Design/Develop Common Data Access Libraries for in-house development

Design/Develop Common Utility Libraries for in-house development   Design/Develop Upgrade Manager to maintain CGI software installations   Design/Develop/Distribute software updates/patches   Design/Develop/Distribute installation packages for all 32bit software   Maintain systems listed above   Claims2000 - This purpose of these continuing projects were to develop the necessary applications, reports, data files and tables necessary to process Medicare Supplement ANSI files and claims.   Tools: HP Unix, C script, Informix DBMS, 4GL, FTP, Attachmate Terminal Emulator, DynaComm Terminal Emulator Responsibilities: Developed programs to process Medicare Part A and Part B ANSI files, develop programs to pay Medicare Supplement claims and maintain existing programs   Automate nightly processing schedule   Design/Develop/Distribute 4GL programs, screens and reports as needed   Design/Develop database tables as needed   Maintain current programs and activities   CGIView, CRLView, ProvidentView, GASBView - Agent Websites - The purpose of these websites were to replace the ViLink Internet Application to promote a paperless office. These projects expended the WebView application.   Tools: Microsoft Visual InterDev 6.0, ADO, COM, ADSI, ASP, VB Script, Java Script, SQL Server 2000, Visual Basic 6.0, Adobe Dreamweaver, and Source Safe. Responsibilities: Design structure to support reporting concept   Email Management System - Mass-mailing system used for manager, agent, support staff notifications   Report Central Management System - Reporting frame used to deliver critical reports to agents, supports paperless office   Download Center - Manage agent software downloads and log system data   Agent Inquiry - Agent lookup component, providing historically correct data to managers and agents   Online Proposal System - 32-bit Illustration systems brought to the web   Online Report System - Agent Production, Agent Commission, Premium Status Report, Daily Activity Report, Medicare Supplement Rate Increase Report   WebView - This project replaced the ViLink E-commerce application using IIS 5 on a Windows 2000 Server Active Directory domain implementing SSL, and SQL Server 2000. Tools: Microsoft Visual InterDev 6.0, ADO, COM, ADSI, ASP, VB Script, Java Script, SQL Server 2000, Visual Basic 6.0, Adobe Dreamweaver, and Source Safe. Responsibilities: Document all process flows related to web site   Design security model for authenticating users and processes   Design Active Directory objects   Map Active

Directory fields to data   Design database structure to support site and user administration   Develop utility libraries to provide data and AD access from site   Build components to support framework   Convert current applications to the new model   Create new applications and websites as needed   ViLink Agent Websites - The purpose of these projects were to eliminate weekly and monthly paper reports sent to agents via the mail.   Tools: ViLink eCommerce Application 4.0 - 4.3, Visual InterDev 6.0, Visual Basic 6.0, COM, and SQL Server 7.0/2000, Access 97 Responsibilities: Design structure to support reporting concept   Develop concept and implement with ViLink eCommerce Platform   Illustration System - The purpose of this continuing project was to replace existing 16 bit illustration applications to 32-bit object oriented design and develop a version per company as well as update rates and requirements as needed. An Internet application was also developed for each company and added to the View websites.   Tools: Visual Basic 6.0, Crystal Reports 8.5, ADO, Access97, ADO, ASP, VB Script, and IIS Responsibilities: Create object model for application   Design database to support model   Develop application using object oriented techniques   Develop COM object for Internet application   User testing   Platform Testing   Software release Programmer/Analyst National Cinema Network January 1998 to November 2000 Informix Business System - Part of a 4 person team responsible for developing the Business system for necessary reports, applications and tables in an Informix DBMS.   Tools: Informix DBMS, Sun Unix, Informix 4GL, Terminal Emulator   ReportView - The purpose of this project was to develop a report viewing system to interface with the Informix Business System.   Tools: Visual Basic 6.0, Crystal Reports 6.0, Dev FTP, Informix DBMS, COM, and DCOM Responsibilities: Design and develop the system   Develop all User Interface components of the system   User testing   Platform testing   Software rollout and installation Education Associates Degree in Computer Programming Technology in Programming Languages Vatterott College - Kansas City, MO August 1996 to May 1998 Skills C#, .Net, MVC, Javascript, Jquery, ASP Certifications/Licenses Certified ScrumMaster (CSM) May 2018 to Present Certificate through The Brain Trust Group and the Scrum Alliance.
